

Cosmic rays & their interstellar medium environment CRISM-2014

mardi 24 juin 2014 - vendredi 27 juin 2014

Montpellier, France

Recueil des résumés

Contents

Welcome	1
An observational view of particle acceleration in cosmic ray sources	1
Direct detection of cosmic rays: Recent observational progresses	1
The highest galactic cosmic ray energies	1
Origin of Cosmic Rays	1
High energy emission from massive star clusters	1
Cosmic Ray driven instabilities	1
Relativistic cosmic-ray back-reaction instabilities along the background magnetic field .	1
Cosmic-Ray Ionization of Molecular Clouds	2
Wind-driven Exclusion of Cosmic Rays in the Protoplanetary Disk Environment	2
Recent results from Herschel	2
The Multi-wavelength ISM: from CRs to dust emission	2
Non-Thermal Radiation from the Inner Galaxy	2
Low-Energy Cosmic Rays in the Galactic Center Region	2
Cosmic Ray diffusion in magnetized turbulence	2
Cosmic Ray propagation close to their acceleration site	2
Cosmic ray driven winds	2
Hadronic TeV emission of the supernova remnant W51C observed with the MAGIC Telescopes?	3
Recent results by Voyager	3
Particle acceleration in the stellar graveyard and the case of young SNRs	3
Gamma-ray emission from supernova remnants	3
SNR and molecular cloud associations as seen by H.E.S.S.	3
Gamma Rays from supernova remnants	3

TeV sources in the Cygnus region observed with VERITAS	3
The cosmic-ray, dust, and gas content of the local Chamaeleon clouds + Results from Voyager	4
A database of charged cosmic rays (CRDB) and constraints on the interstellar flux	4
Particle acceleration in Supernovae and subsequent gamma-ray emission	4
The impact of magnetic turbulence spectrum on particle acceleration in SNR IC443	4
Hydrodynamics of Young Supernova Remnants and the Implications for their Gamma-ray emission	4
Cosmic Rays in star forming galaxies	4
The role of cosmic rays on magnetic field diffusion and the formation of protostellar discs	5
Magnetic field structure from cosmic ray driven dynamo in spiral galaxies	5
Cosmic-ray induced ionization of a molecular cloud shocked by the W28 supernova remnant	5
Propagation of cosmic rays into diffuse clouds	5
Cosmic Ray Transport in the Astrospheres of Solar Twins	5
Cosmic-ray heating of molecular cloud cores	5
Wide-Field Polarimetry: A Unique Probe of Interstellar Turbulence	6
Polarized thermal dust emission from Planck	6
X-shape magnetic fields in galactic halos	6
Synchrotron emission from molecular clouds	6
Localized SiO emission triggered by the passage of the W51C supernova remnant shock	6
Localized SiO emission triggered by the passage of the W51C supernova remnant shock	6
APEX observations of non-stationary magneto-hydrodynamical shocks in W44	6
Irradiated shocks in the W28 A2 star-forming region: sites of cosmic-ray acceleration ? .	7
The Contribution of Cosmic Rays Interacting With Molecular Clouds to the Galactic Center Gamma-Ray Excess	7
Propagation of high-energy cosmic-ray electrons in the interstellar medium	7
Picard: A new Code for The Galactic Cosmic Ray Propagation Problem	7
Charged-particle heating in imbalanced MHD turbulence	7
Voyager 1 events and GCR data since 2012	7
A solution to the cosmic ray anisotropy problem	8

The cosmic-ray, dust, and gas content of the local Chamaeleon clouds + reports on Voyager results	8
A Catalogue of High-Energy Observations of Galactic Supernova Remnants	8
X-shape magnetic fields in galactic halos	8
Informations from Very High Energy Muons and Neutrinos contained in Extensive Air Shower cores	8
Secondaries from supernova remnants and new AMS-02 data	8
Proton analysis with AMS-02 and solar modulation level	8
3D simulations of the emission from young supernova remnants including particle acceleration	9
Gas towards the gamma-ray sources HESS J1731-347 and HESS J1729-345	9
Cosmic ray propagation in local magnetic fields	9

17

Welcome

Multiwavelength view of cosmic ray sources / 18

An observational view of particle acceleration in cosmic ray sources

The cosmic ray spectrum / 19

Direct detection of cosmic rays: Recent observational progresses

The cosmic ray spectrum / 20

The highest galactic cosmic ray energies

Cosmic ray sources: theory / 21

Origin of Cosmic Rays

Cosmic ray sources: theory / 22

High energy emission from massive star clusters

Plasma instabilities and cosmic rays / 23

Cosmic Ray driven instabilities

Plasma instabilities and cosmic rays / 24

Relativistic cosmic-ray back-reaction instabilities along the background magnetic field

Low energy cosmic rays / 25

Cosmic-Ray Ionization of Molecular Clouds

Low energy cosmic rays / 26

Wind-driven Exclusion of Cosmic Rays in the Protoplanetary Disk Environment

The turbulent Interstellar medium / 27

Recent results from Herschel

The turbulent Interstellar medium / 28

The Multi-wavelength ISM: from CRs to dust emission

The galactic center / 29

Non-Thermal Radiation from the Inner Galaxy

The galactic center / 30

Low-Energy Cosmic Rays in the Galactic Center Region

Cosmic Ray propagation / 31

Cosmic Ray diffusion in magnetized turbulence

Cosmic Ray propagation / 32

Cosmic Ray propagation close to their acceleration site

Plasma instabilities and cosmic rays / 33

Cosmic ray driven winds

Multiwavelength view of cosmic ray sources / 47

Hadronic TeV emission of the supernova remnant W51C observed with the MAGIC Telescopes?

48

Recent results by Voyager

Multiwavelength view of cosmic ray sources / 71

Particle acceleration in the stellar graveyard and the case of young SNRs

72

Gamma-ray emission from supernova remnants

Auteur correspondant diane.fernandez@lupm.univ-montp2.fr

Multiwavelength view of cosmic ray sources / 73

SNR and molecular cloud associations as seen by H.E.S.S.

Multiwavelength view of cosmic ray sources / 74

Gamma Rays from supernova remnants

Auteur correspondant diane.fernandez@lupm.univ-montp2.fr

Multiwavelength view of cosmic ray sources / 75

TeV sources in the Cygnus region observed with VERITAS**Auteur correspondant** maria.krause@desy.de**76****The cosmic-ray, dust, and gas content of the local Chamaeleon clouds + Results from Voyager****Auteur correspondant** isabelle.grenier@cea.fr**The cosmic ray spectrum / 77****A database of charged cosmic rays (CRDB) and constraints on the interstellar flux****Auteur correspondant** dmaurin@lpsc.in2p3.fr**78****Particle acceleration in Supernovae and subsequent gamma-ray emission****Auteur correspondant** mrenaud@lupm.univ-montp2.fr**Cosmic ray sources: theory / 79****The impact of magnetic turbulence spectrum on particle acceleration in SNR IC443****Auteur correspondant** igor.telezhinsky@desy.de**Cosmic ray sources: theory / 80****Hydrodynamics of Young Supernova Remnants and the Implications for their Gamma-ray emission****Auteur correspondant** vikram@oddjob.uchicago.edu**Cosmic ray sources: theory / 81**

Cosmic Rays in star forming galaxies

Auteur correspondant pierrick.martin@irap.omp.eu

Plasma instabilities and cosmic rays / 82

The role of cosmic rays on magnetic field diffusion and the formation of protostellar discs

Auteur correspondant marco.padovani@lupm.univ-montp2.fr

Plasma instabilities and cosmic rays / 83

Magnetic field structure from cosmic ray driven dynamo in spiral galaxies

Low energy cosmic rays / 84

Cosmic-ray induced ionization of a molecular cloud shocked by the W28 supernova remnant

Auteur correspondant solenn.vaupre@obs.ujf-grenoble.fr

Low energy cosmic rays / 85

Propagation of cosmic rays into diffuse clouds

Auteur correspondant morlino@arcetri.astro.it

Low energy cosmic rays / 86

Cosmic Ray Transport in the Astrophospheres of Solar Twins

Auteur correspondant pr33@st-andrews.ac.uk

Low energy cosmic rays / 87

Cosmic-ray heating of molecular cloud cores

Auteur correspondant galli@arcetri.astro.it

The turbulent Interstellar medium / 88

Wide-Field Polarimetry: A Unique Probe of Interstellar Turbulence

Auteur correspondant bryan.gaensler@sydney.edu.au

The turbulent Interstellar medium / 89

Polarized thermal dust emission from Planck

Auteur correspondant edith.falgarone@ens.fr

90

X-shape magnetic fields in galactic halos

The turbulent Interstellar medium / 91

Synchrotron emission from molecular clouds

Auteur correspondant aws@mpe.mpg.de

92

Localized SiO emission triggered by the passage of the W51C supernova remnant shock

Auteur correspondant dumas@iram.fr

Low energy cosmic rays / 93

Localized SiO emission triggered by the passage of the W51C supernova remnant shock

Auteur correspondant dumas@iram.fr

The turbulent Interstellar medium / 94

APEx observations of non-stationary magneto-hydrodynamical shocks in W44

Auteur correspondant sibylle.anderl@obs.ujf-grenoble.fr

The turbulent Interstellar medium / 95

Irradiated shocks in the W28 A2 star-forming region: sites of cosmic-ray acceleration ?

Auteur correspondant antoine.gusdorf@lra.ens.fr

The galactic center / 96

The Contribution of Cosmic Rays Interacting With Molecular Clouds to the Galactic Center Gamma-Ray Excess

Auteur correspondant chris.gordon@canterbury.ac.nz

Cosmic Ray propagation / 97

Propagation of high-energy cosmic-ray electrons in the interstellar medium

Auteur correspondant reda.attallah@univ-annaba.dz

Cosmic Ray propagation / 98

Picard: A new Code for The Galactic Cosmic Ray Propagation Problem

Auteur correspondant ralf.kissmann@uibk.ac.at

Cosmic Ray propagation / 99

Charged-particle heating in imbalanced MHD turbulence

Auteur correspondant martin.weidl@ipp.mpg.de

100

Voyager 1 events and GCR data since 2012

Cosmic Ray propagation / 101

A solution to the cosmic ray anisotropy problem

Auteur correspondant pmertsch@stanford.edu

Multiwavelength view of cosmic ray sources / 102

The cosmic-ray, dust, and gas content of the local Chamaeleon clouds + reports on Voyager results

Auteur correspondant isabelle.grenier@cea.fr

Multiwavelength view of cosmic ray sources / 103

A Catalogue of High-Energy Observations of Galactic Supernova Remnants

Auteur correspondant gferrand@physics.umanitoba.ca

Plasma instabilities and cosmic rays / 104

X-shape magnetic fields in galactic halos

Auteur correspondant katia.ferriere@irap.omp.eu

Poster presentation / 107

Informations from Very High Energy Muons and Neutrinos contained in Extensive Air Shower cores

Auteur correspondant cherif.talai@univ-annaba.dz

Poster presentation / 108

Secondaries from supernova remnants and new AMS-02 data

Auteur correspondant pmertsch@stanford.edu

Poster presentation / 109

Proton analysis with AMS-02 and solar modulation level

Auteur correspondant ghelfi@lpsc.in2p3.fr

Poster presentation / 110

3D simulations of the emission from young supernova remnants including particle acceleration

Auteur correspondant gferrand@physics.umanitoba.ca

Poster presentation / 111

Gas towards the gamma-ray sources HESS J1731-347 and HESS J1729-345

Auteur correspondant nigel.maxted@univ-montp2.fr

Poster presentation / 112

Cosmic ray propagation in local magnetic fields
