

**We are pleased to announce that the next workshop on
Acoustic and Radio EeV Neutrino detection Activities
will be held from Tuesday, June 29, 2010 (2 pm), to Friday, July 2 (noon),
at the Université de Nantes, France.**

ARENA 2010 is the 4th edition of the workshop on the detection of ultra-high energy neutrinos and cosmic rays via radio or acoustic methods. The aim of the conference will be to review the state of the art of the technique as well as of the theoretical predictions of fluxes, and to discuss future prospects in this field. The workshop will bring together theorists and experimentalists to present the latest and most relevant theoretical and experimental results.

The sessions of the conference will be held in the morning and afternoon, structured around short presentations (~ 15') and longer invited presentations (~ 30'), followed by breaks of questions and answers. Poster presentations will be possible during each coffee break on the conference venue. The publication of the proceedings by Elsevier is envisaged. The length of the manuscripts will be 8 pages for 30' oral presentations and 4 pages for all other contributions. We invite you to submit a paper/abstract to the conference.

**Further conference details will be available from February 1st, 2010, only on Web at:
<http://arena2010.in2p3.fr>**

Important deadlines are:

Abstract submission: February 1st to May 1st, 2010

Notification to the authors: May 15th, 2010

Deadline for registration: June 1st, 2010
