

Andrea Sartirana

### \*Naples, 9-10 Oct 2014:

- http://indico.cern.ch/event/324705/ ;
- > thanks to the INFN for the hospitality;

# 20 participants Australia, France, Italy, Poland, Taiwan, UK; France represented by F. Chollet, A. Sartirana (+ M. Jouvin remotely);

#### \$ just a brief summary. See also:

https://indico.cern.ch/event/272779/ (Keeble).

## the collaboration

**\***DPM now run as a **community effort**:

> CERN takes care of the core development;

> partners: complementary skills/resources

It was not possible to put this proposition (web admin interface) into practice.

GRIF\_{IRFU|LLR}
active on puppet.
QWG care of quattor.

GRIF\_LAL, LAPP
+ GRIF\_LLR contrib.
to WLCG middleware
validation.

Area	Partner
DMLITE/VFS	CESNET
Admin tools, rebalancing	GridPP
I/O Monitoring	Japan
W <del>eb admin interface</del>	France
Support (beyond local responsibilities, not necessarily on rota)	GridPP
Documentation & web presence	GridPP, ALL
Configuration, puppet, YAIM transition	France, GridPP
Permanent pilot testing (EPEL-test) – for validation of all updates	GridPP, France, Italy
Ad-hoc testing: HTTP/DAV	GridPP
Ad-hoc testing: S3 validation	GridPP
Ad-hoc testing: HTTP federations	Italy,GridPP
Ad-hoc testing: IPv6	GridPP
Ad-hoc testing: GridFTP redirection	Needed
Hammercloud & I/O optimisation	GridPP, ASGC
All activities not mentioned above, see note	CERN

## <u>echos from site</u>s

Struggling with SRM perfs.

- drain/load bal. pains;
- mostly Quattor. Some puppet and hybrid sites.

- Interest in diff. backend: Lustre, GPFS, HDFS, Cloud;
  - > argus integration;
  - > need load spikes mgmt;
  - interest on non-SRM ops.

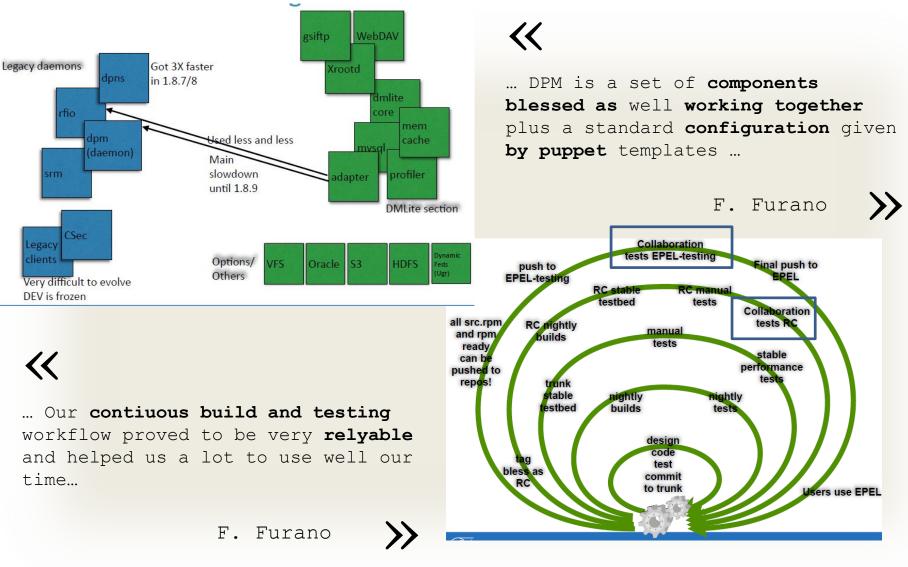

- Part of the Canada HTTP dynafed federation;
- > also run DPM on Belle II

- Open Stack High Avail.;
- distr. T2 proto (NA-RO)
- http/WebDav fed. (inc StoRM).

## the dev status

## \*Released on 05/11 in epel:

- > lcgdm 1.8.9, dmlite 0.7.1, dpm-dsi 1.9.3, dpm-xroot 3.3.6, webdav 0.15;
- > @ FR sites: GRIF\_{IRFU|LAL|LLR},...;

## **\*not yet** in WLCGBaselineVersions

All delayed until new SAM probe available (15/12);

\*A lot of work on performances:

- > memcached is now part of the standard
  install ;
- > removed most of interactions with dpm/dpns;
- > up to x10 peak perf wrt 1.8.8 in opening files;

\$triggered by CMS-AAA tests: > round of test ran by F. Fanzago; > target: 100Hz file open / 150MB/s file read; > precious feedback from sites.

New DMLite logging subsystem:

> log by level log by component;

> final filter through syslog;

> many log lines added to all components;

> in the config file:

LogLevel=[0..5]

Log <componentname>

2014-09-19T14:22:14.740239+02:00 lxfsra10a01 httpd.event[12384]: dmlite Memcache getValFromMemcachedKey : Exiting with value from memca 2014-09-19T14:22:14.740249+02:00 lxfsra10a01 httpd.event[12384]: dmlite Profiler extendedStat : path: /dpm/cern.ch/home, follow: 1 2014-09-19T14:22:14.740265+02:00 lxfsra10a01 httpd.event[12384]: dmlite Mysql extendedStat : parent:0 name:/ 2014-09-19T14:22:14.740468+02:00 lxfsra10a01 httpd.event[12384]: dmlite Mysql execute : Executing: 0x7f75ec046f40 nParams\_: 2 2014-09-19T14:22:14.740550+02:00 lxfsra10a01 httpd.event[12384]: dmlite Mysql execute : Executed: 0x7f75ec046f40 nParams\_: 2 2014-09-19T14:22:14.740550+02:00 lxfsra10a01 httpd.event[12384]: dmlite Mysql execute : Executed: 0x7f75ec046f40 nParams\_: 2 2014-09-19T14:22:14.740550+02:00 lxfsra10a01 httpd.event[12384]: dmlite Mysql execute : Executed: 0x7f75ec046f40 nParams\_: 2 2014-09-19T14:22:14.740550+02:00 lxfsra10a01 httpd.event[12384]: dmlite Mysql execute : Executed: 0x7f75ec046f40 nParams\_: 2

# <u>new in 1.8.9: Mo</u>n

Add to your manifest:

```
class{"dmlite::plugins::profiler":
    collectors => ["rndgled.cern.ch:9930"],
    auth => "userdn"
```

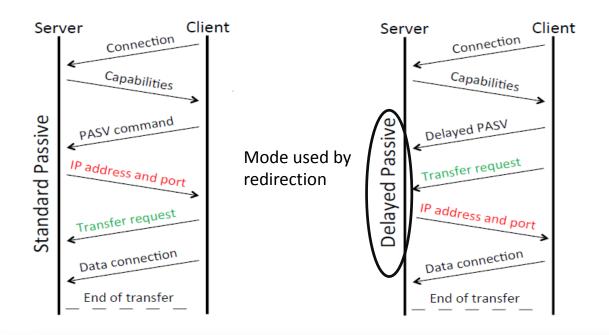

- Dmlite-plugin profiler plugin:
  - > wraps dmlite api calls;
  - > sends info to a GLED;
  - implements real-time multiVO multiprotocol
     xrootd-like IO monitoring;
- **\* integration** of HTTP to monitoring dashboard in progress.

# <u>gridftp redirection</u>

- > Allows for SRM-less gftp transfers;
- https://svnweb.cern.ch/trac/lcgdm/wiki/Dpm/GridFTP
- > not all clients support the DP mode needed
  - > old clients will trigger rfio background copies;
  - > FTS3 and gfal-2 are ok.

Available since 1.8.8

Currently testing: LAPP, GRID\_LLR and Edinbourg.

# looking forward

\*Replace RFIO with WebDav:

Davix seems to have all needed
functionalities;

\*review spacetoken and pools:

- > remove pools as we know them;
- > space management on top level directories;
- > disks labelling;

#### \$ space reporting : srm-less operation

- Cover srm functionality within the namespace ;
- proposal and consensus with dCache and StoRM on metadata report (webdav RFC).

## **Gridftp logging** too verbose

> fix provided;

\*reconsid. of metapackage for handling deps

metapackage added to epel, trying to avoid "synchronization pb" with EMI metapackage;

## rebalancing / draining

- in the forum, sites stuck with rfio (little improvement in 1.8.9 fix which prevents a hang but still bug in rfiod);
- preference to redo the tool using the recently API using webdav and gridftp.

summing up

#### **DPM community is very active:**

> sites and devs seem to be making a great job;

#### **\*1.8.9** released:

- important performance upgrade;
- some new stuff: logging and mon;

#### �other new stuff:

- > gridftp redirection;
- > ...and more to come: rfio/pools/srm bye bye;

#### **French** contribution:

- testbeds running at LAPP, GRIF {LAL|LLR};
- > active on puppet/quattor conf GRIF\_\* .
