

## Structure des ions lourds et nucléosynthèse dans les étoiles massives

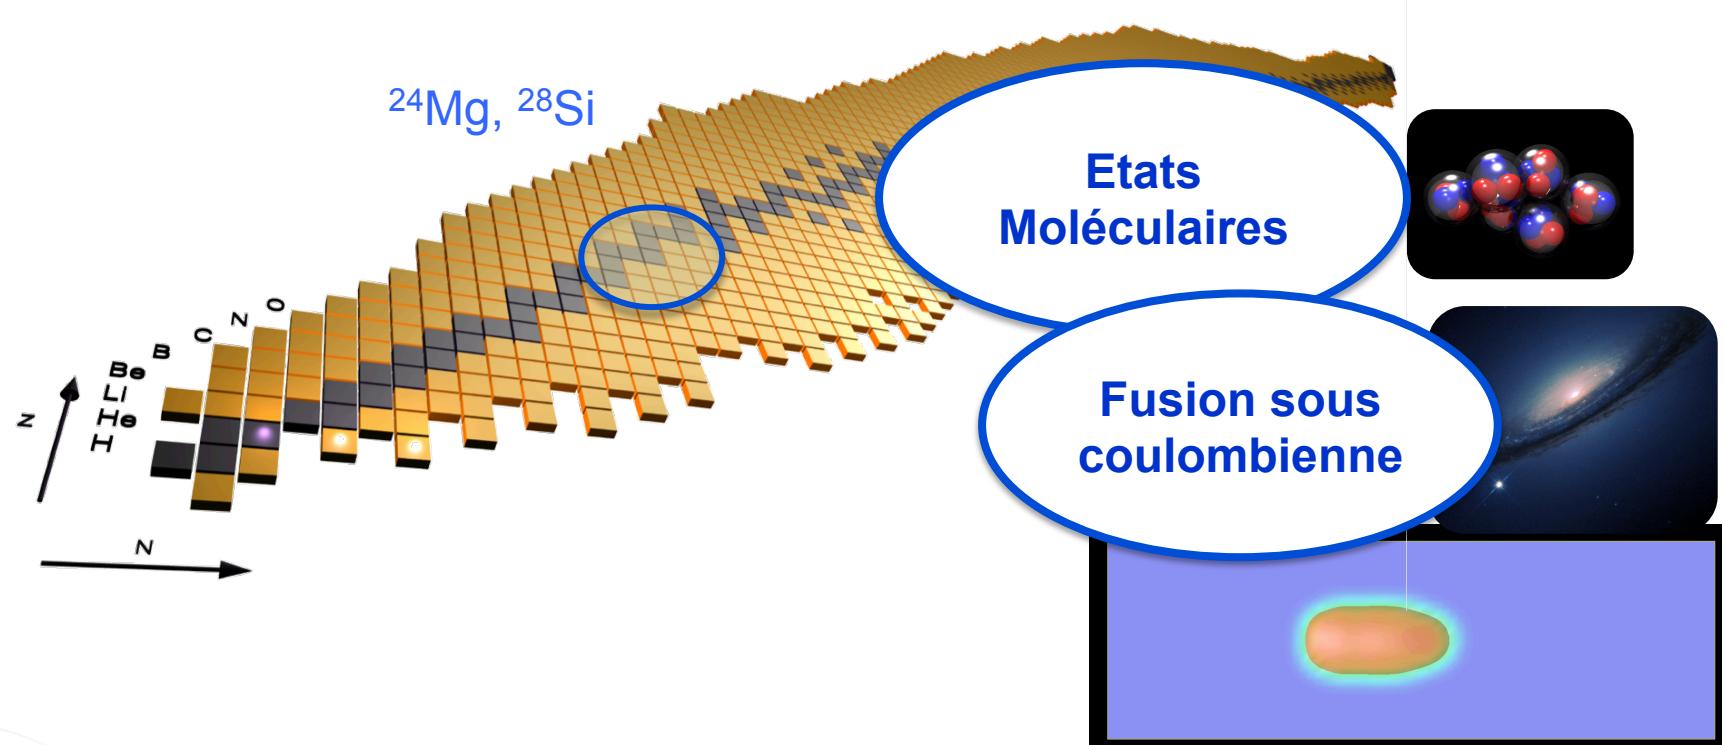

*Sujet de Stage et thèse pour la rentrée 2015*

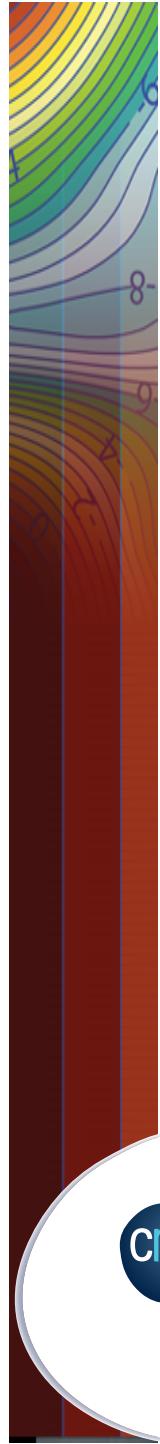

- Sandrine COURTIN (Pr, UDS et IPHC) & David JENKINS (Pr, Institut des Etudes Avancées de l'UDS, IPHC et Université de York)
- IPHC, Département des Recherches Subatomiques,  
Groupe Couches et Amas dans les Noyaux
- Contacts :

# Structure Nucléaire

Structure nucléaire dans la couche sd  
et fusion

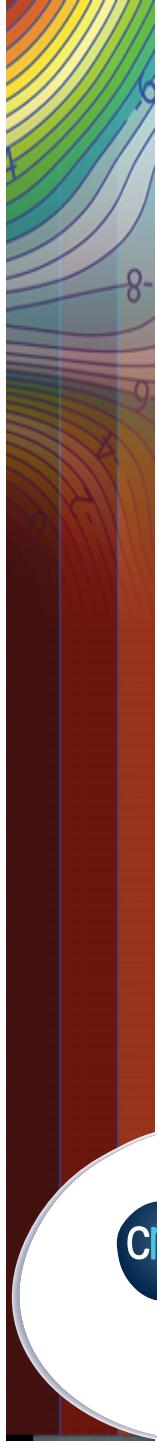

## Fusion et nucléosynthèse

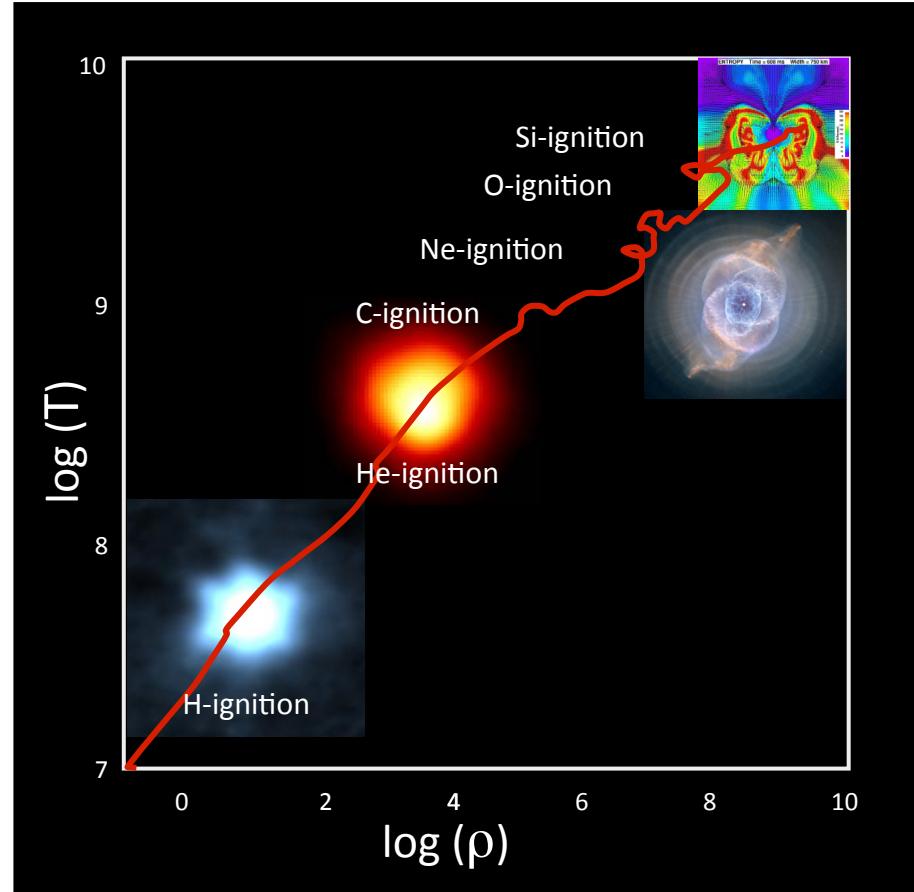

IN2P3  
Institut national de physique nucléaire  
et de physique des particules

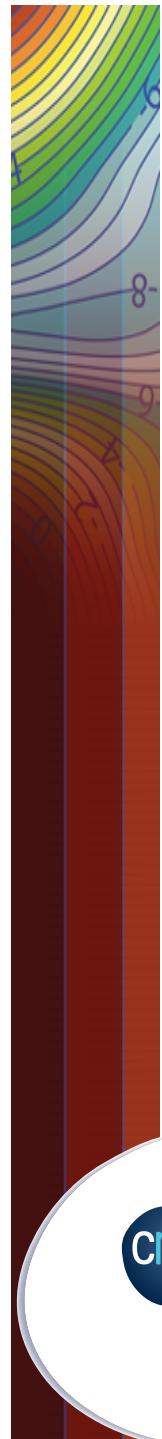

S. Courtin et D. Jenkins, IPHC et Université de Strasbourg  
Journée des étudiants M2 PSA, Stage / Thèse 2015

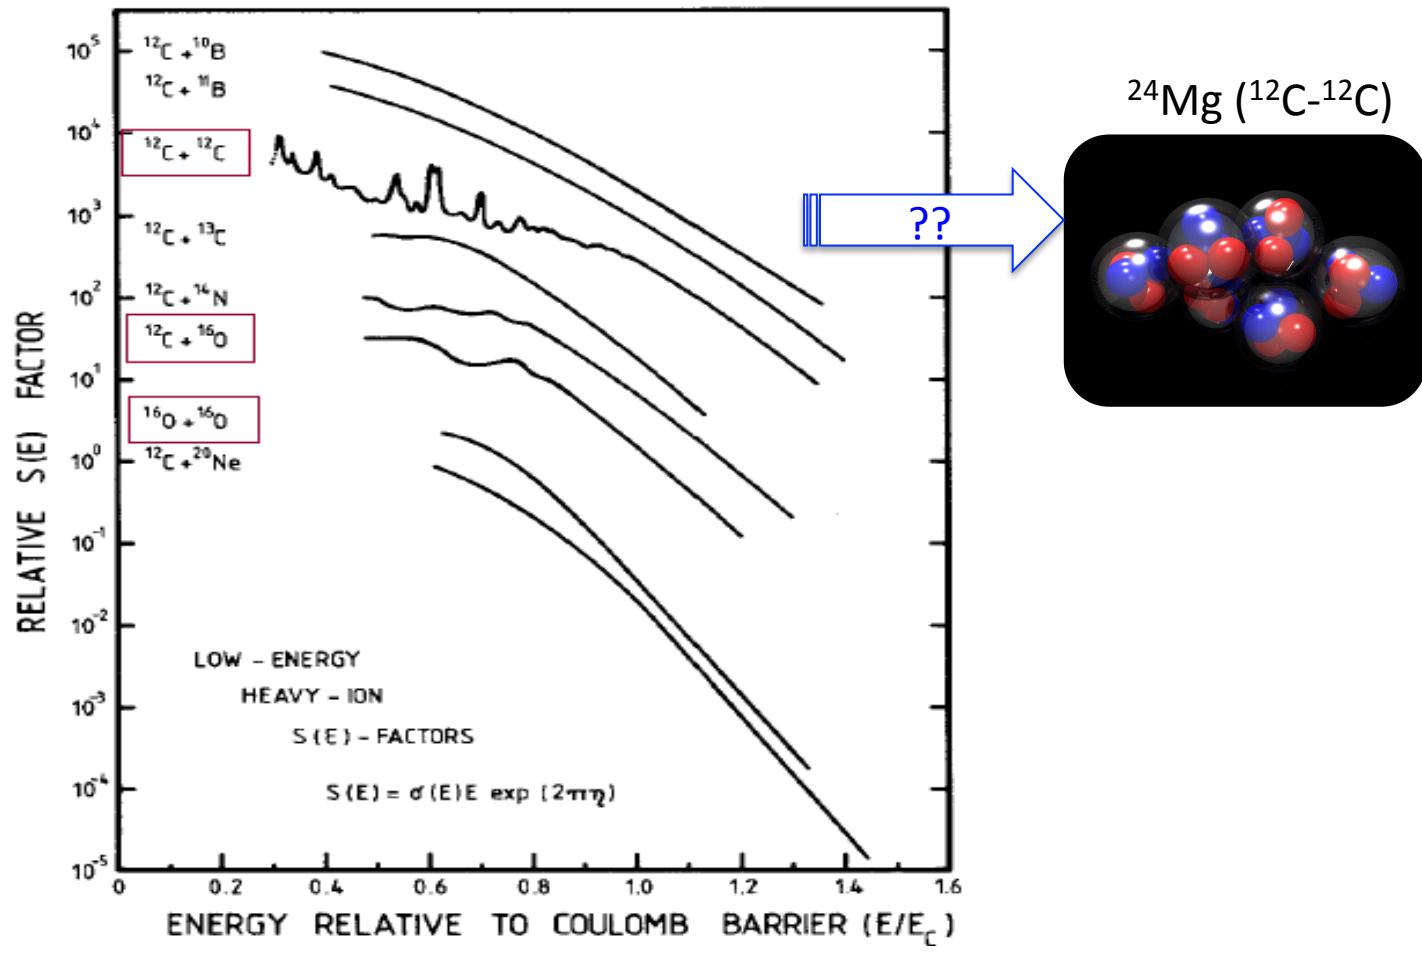

# $^{12}\text{C} + ^{12}\text{C}$ , une réaction majeure en astrophysique

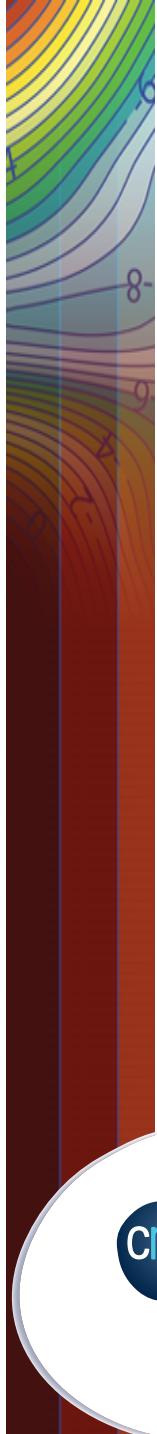

# $^{12}\text{C} + ^{12}\text{C}$ , une réaction majeure en structure nucléaire

Cross-sections for some light systems at subcoulomb energies

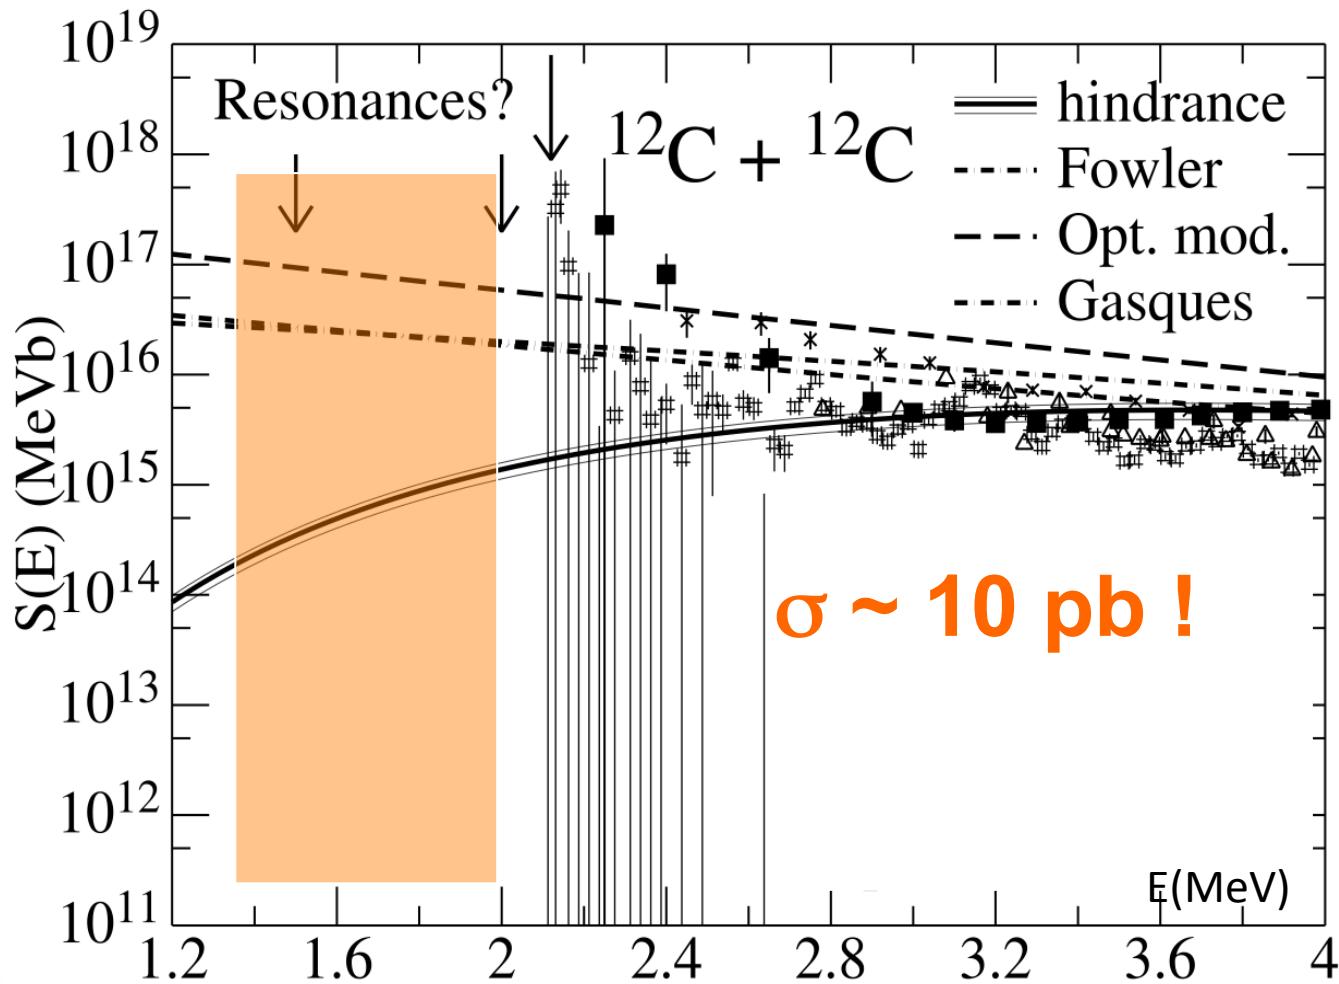

R. Stokstad et al., Phys.Rev.Lett. 37 (1976)

S. Courtin et D. Jenkins, IPHC et Université de Strasbourg  
Journée des étudiants M2 PSA, Stage / Thèse 2015

# Une grande question de l'astrophysique nucléaire

S. Courtin *et al.* prospectives IN2P3-IRFU 2012, Astrophysique Nucléaire

# Demain : $^{12}\text{C} + ^{12}\text{C}$ , nouveaux dispositifs expérimentaux

Le stage

Particules et  $\gamma$

A new setup :

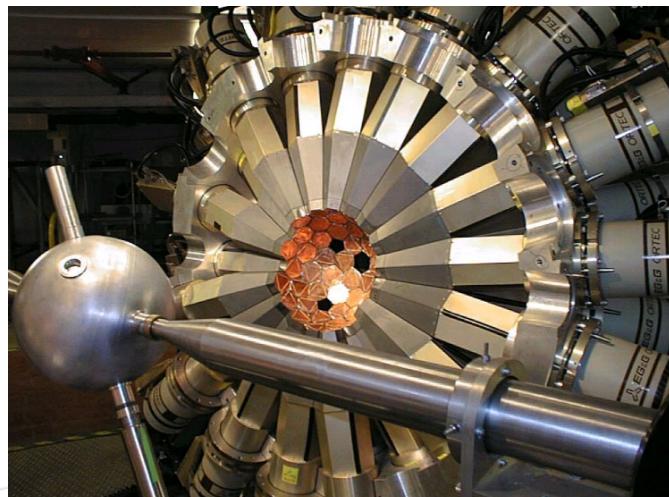

'Fusion measurements of  $^{12}\text{C}+^{12}\text{C}$  at energies of astrophysical interest'

**Argonne National Laboratory, Chicago, USA (10/2014)**

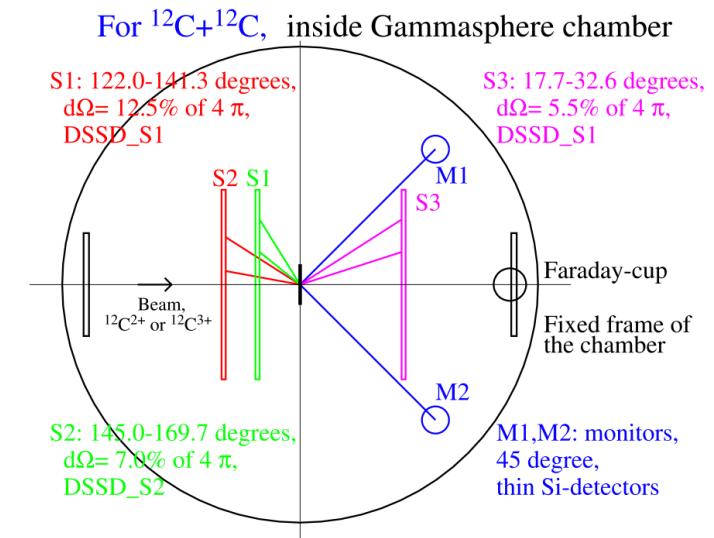

$^{12}\text{C}$ , intense beam  $E_{\text{c.m.}} = 2 - 5 \text{ MeV}$

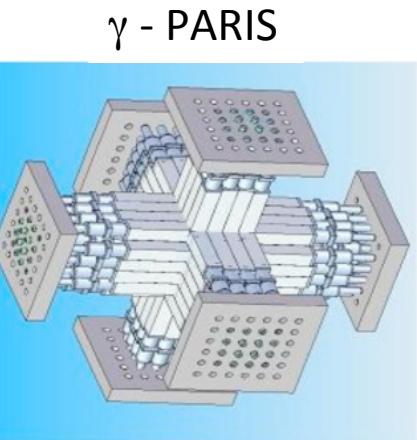

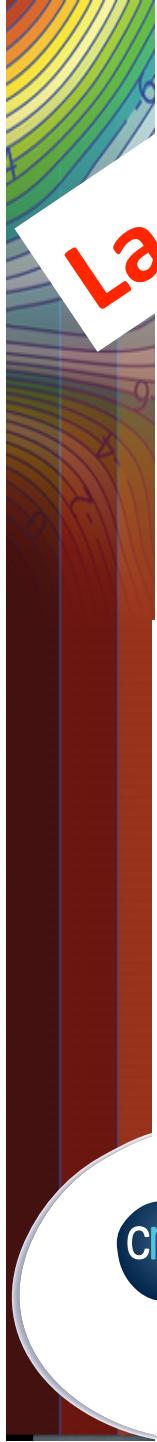

Detection system : coincidences  $\gamma + p$  and  $\alpha$

Gammasphere : 100 HPGe,  $\epsilon = 10\%$

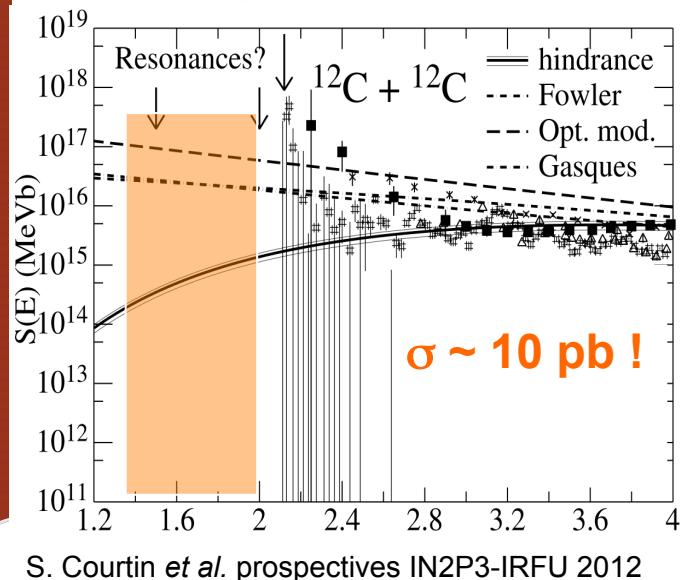

Charged particles

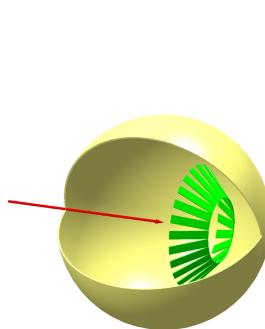

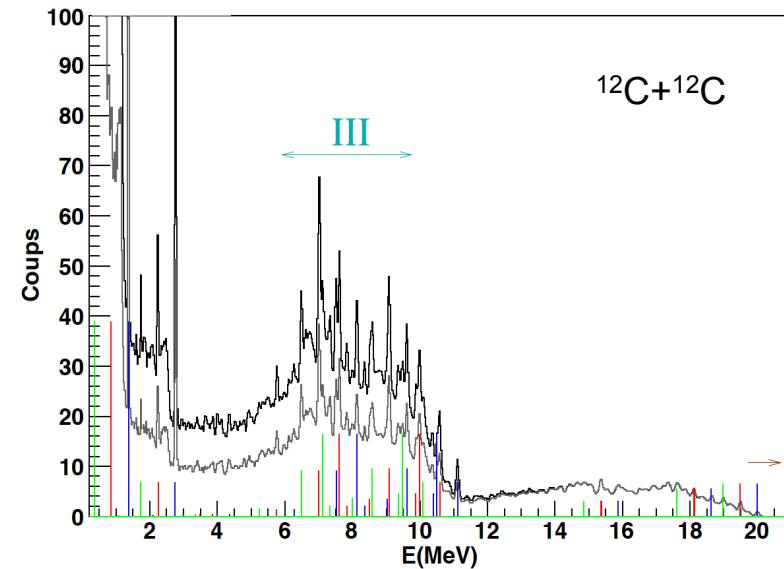

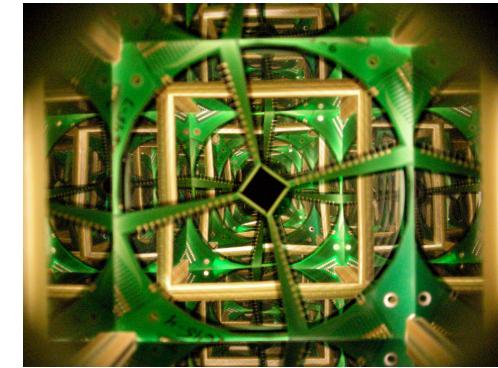

$\gamma$  - PARIS

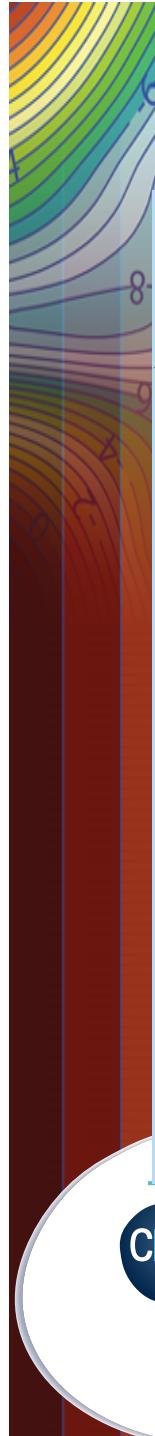

S. Courtin *et al.* prospectives IN2P3-IRFU 2012

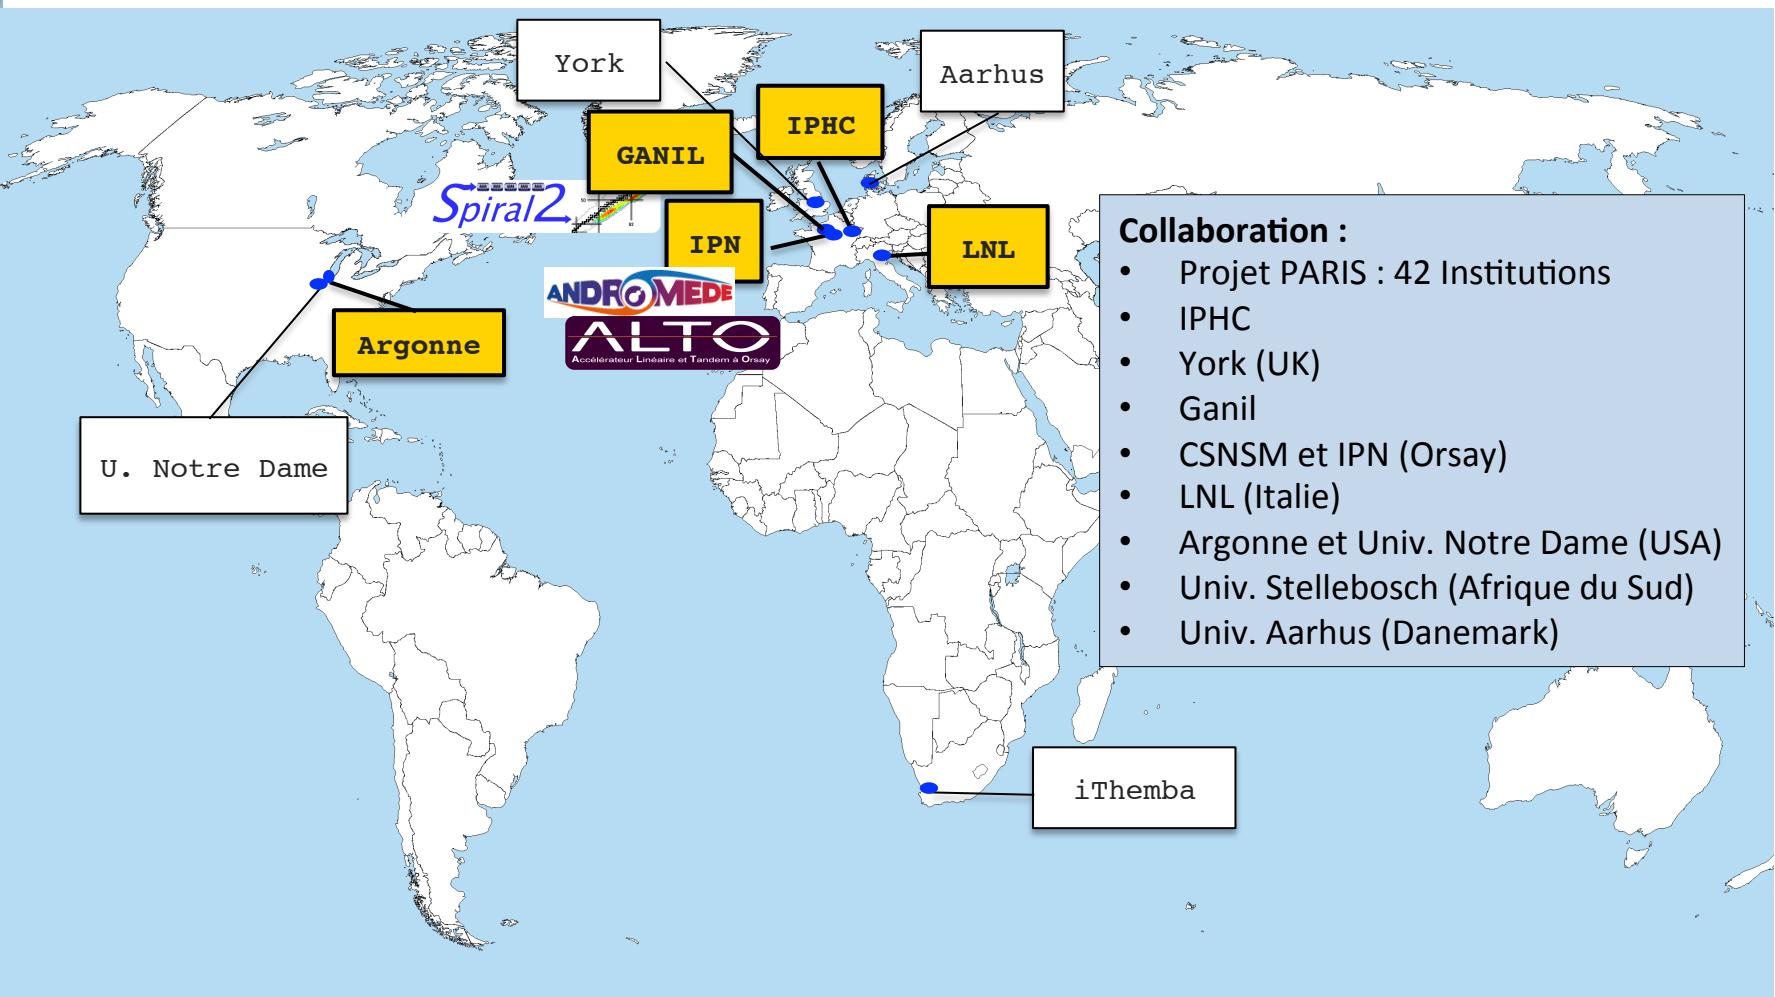

Particules

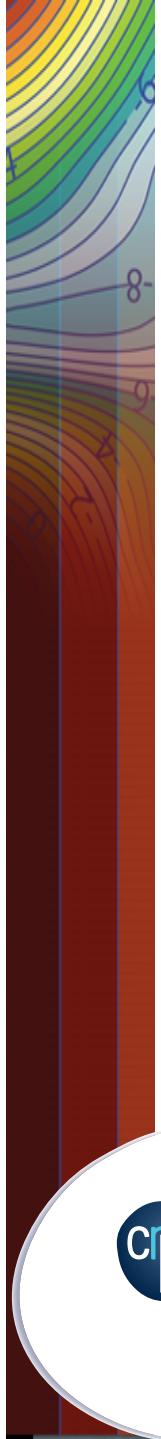

S. Courtin et D. Jenkins, IPHC et Université de Strasbourg  
Journée des étudiants M2 PSA, Stage / Thèse 2015

## Où ? Quand ? Qui ?

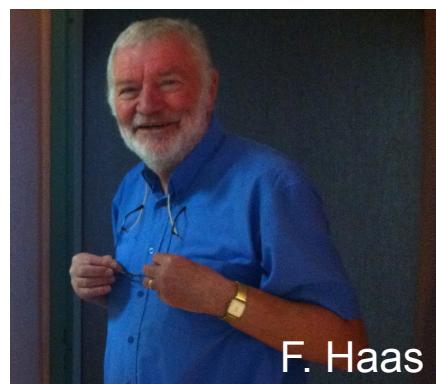

D. Jenkins

D. Montanari

F. Haas

La collaboration :

D. Jenkins (Pr, USIAS, Univ. York), S. Courtin (Pr, IPHC UDS)  
C. Beck (Dr CNRS), D. Bourgin (Thèse), F. Haas (DR, CNRS),  
C.L. Jiang (Argonne, USA), E. Rehm (Argonne, USA), B. Back  
(Argonne, USA), P. Papka (Pr, Univ. Stellenbosch, SA)  
H. Fynbö (Univ. Aarhus, DK), O. Kirsebom (Univ. Aarhus, DK) ...

La collaboration PARIS (42 labos)

Journée des étudiants M2 PSA, Stage / Thèse 2015

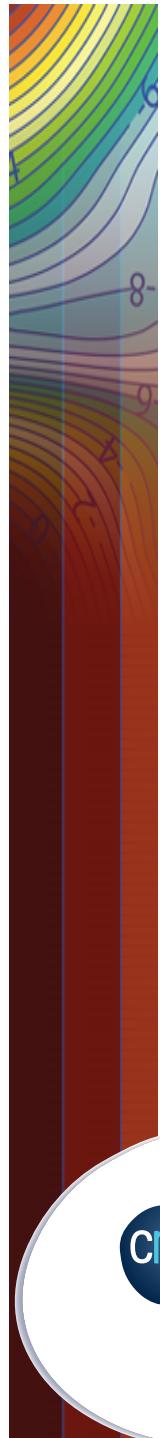

# Compléments éventuels

S. Courtin et D. Jenkins, IPHC et Université de Strasbourg  
Journée des étudiants M2 PSA, Stage / Thèse 2015

# $^{12}\text{C} + ^{12}\text{C}$ , experimental methods

## Particles and $\gamma$ -rays

Advantages of the particle- $\gamma$  coincidence technique :

- Reduction of the background from target and environment
- Use of high efficiency arrays (even if based on Ge detectors)
