Workshop wrap-up

FJPPL computing workshop 2015

Fabio Hernandez

fabio@in2p3.fr
IN2P3 / CNRS computing center, Lyon , France

CCIN2P3

Topics of potential common interest

- International connectivity

  understand "weird" behaviour of long distance links

- Cloud technology

  integration of cloud technology to batch service

  monitoring of OpenStack Nova (Wataru's work at CERN)

- Computing equipment cost modelling and forecasting

  integrate currency exchange risk

- Outreach: coordinated booths at SuperComputing

- Docker (including eTricks)

- Xeon Phi

- GHI (GPFS + HPSS)

- COMET and g-2 (?)

- Facility management: machine room design (?)

Thanks

有難う 御座います

Merci

to our guests for coming

to the speakers for sharing their work

to all the attendees for their active participation

to Ghita and Rolf for their work as session conveners

to Laure and Gaëlle for the logistics
