SRB service at STFC and the road to iRODS

lundi 2 février 2009 17:30 (30 minutes)

STFC (Science and Technology Facilities Council, UK) is a long-time user of SRB in varied projects for internal and external customers alike. In this talk we describe how SRB has been used to meet the requirements of our main customers, and how the challenges associated with running a production service in this environment have been addressed.

We also outline our plans for evaluation and migration to iRODS, noting which features we need to be present in order to migrate existing services without provoking a redesign of the infrastructure beneath.

Orateurs: M. O'NEILL, Kevin; M. DOWNING, Roger

Classification de Session: Talks from various projects
