ACQ problems

Problem 1: shift of correct physics in 1 or 2 DIFs ACQ->ACQ+1 and loosing of correct physics in ACQ+1 in same DIFs

dif0	physics	physics	physics	physics
dif1	physics	physics	physics	physics
dif2	physics		physics	physics
	acq-1	acq	acq+1	acq+2

dif0	physics		physics	physics
dif1	physics	physics	physics	physics
dif2	physics		physics	physics
	acq-1	acq	acq+1	acq+2

Problem 2: loosing of correct physics in 1 or 2 DIFs

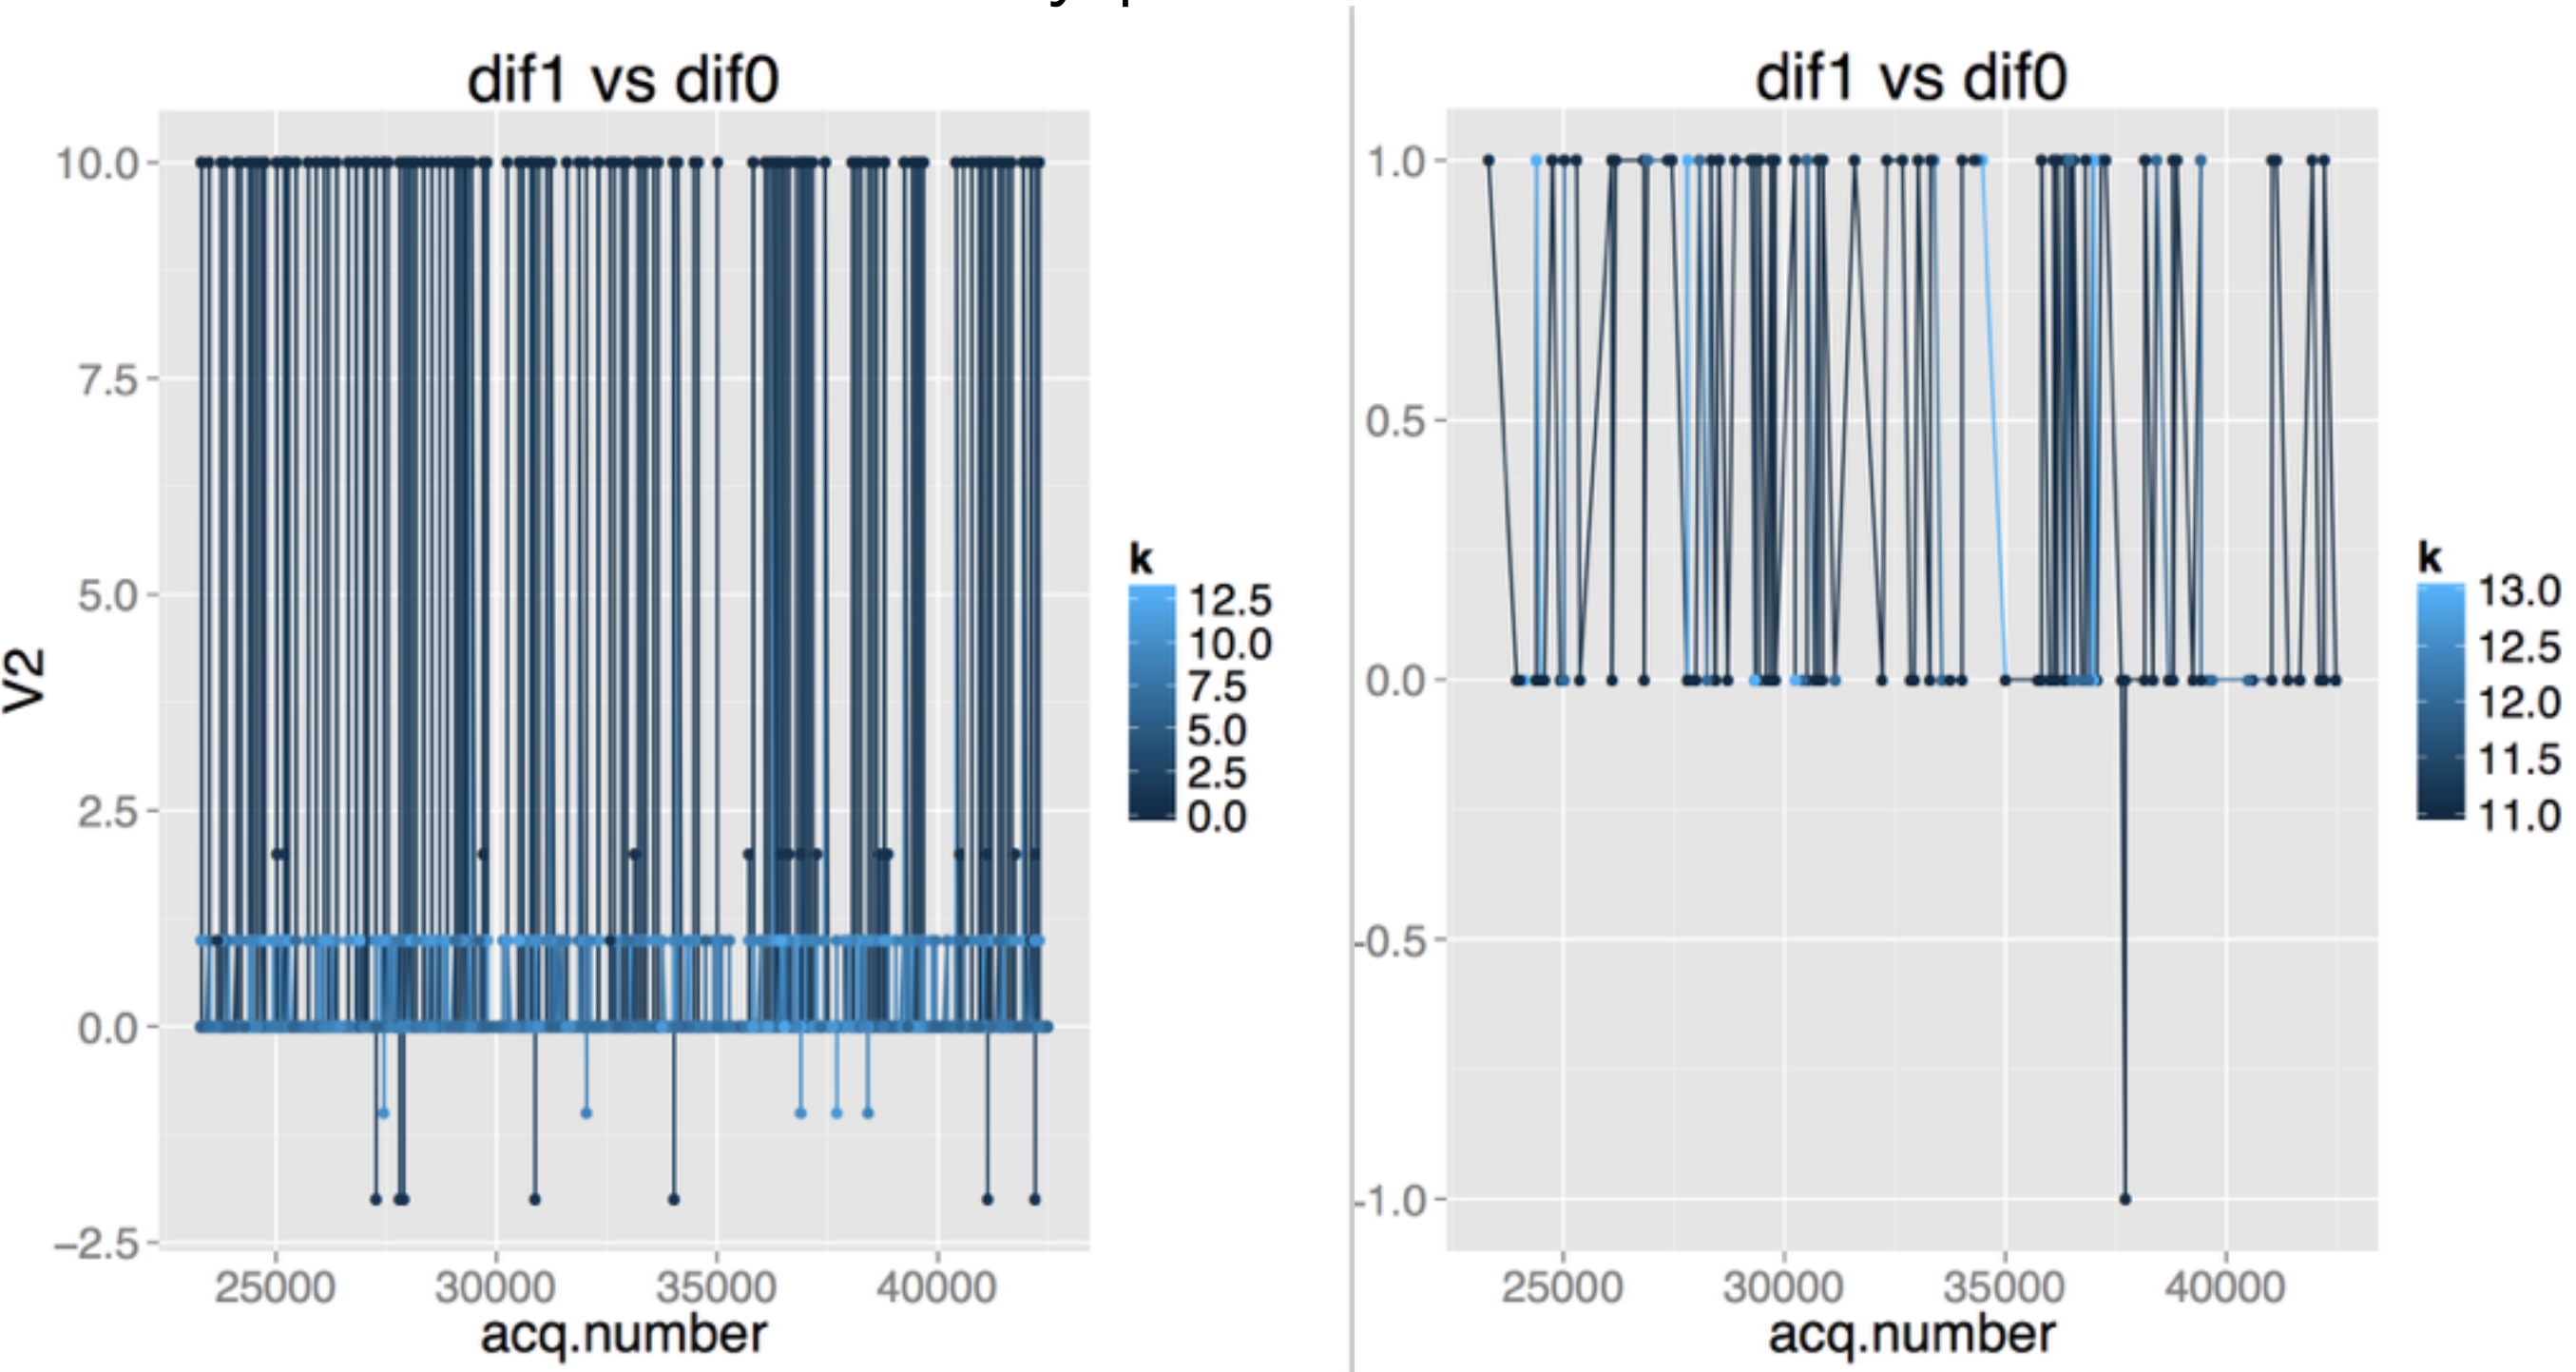

dif0	physics	physics	physics
dif1	physics	physics	physics
dif2	physics		physics
	acq-1	acq	acq+1

dif0	physics		physics
dif1	physics	physics	physics
dif2	physics		physics
	acq-1	acq	acq+1

Synchronisation problems

run 211

Mostly problem1

ACQ is not synchronised between
2 consecutive ACQ numbers

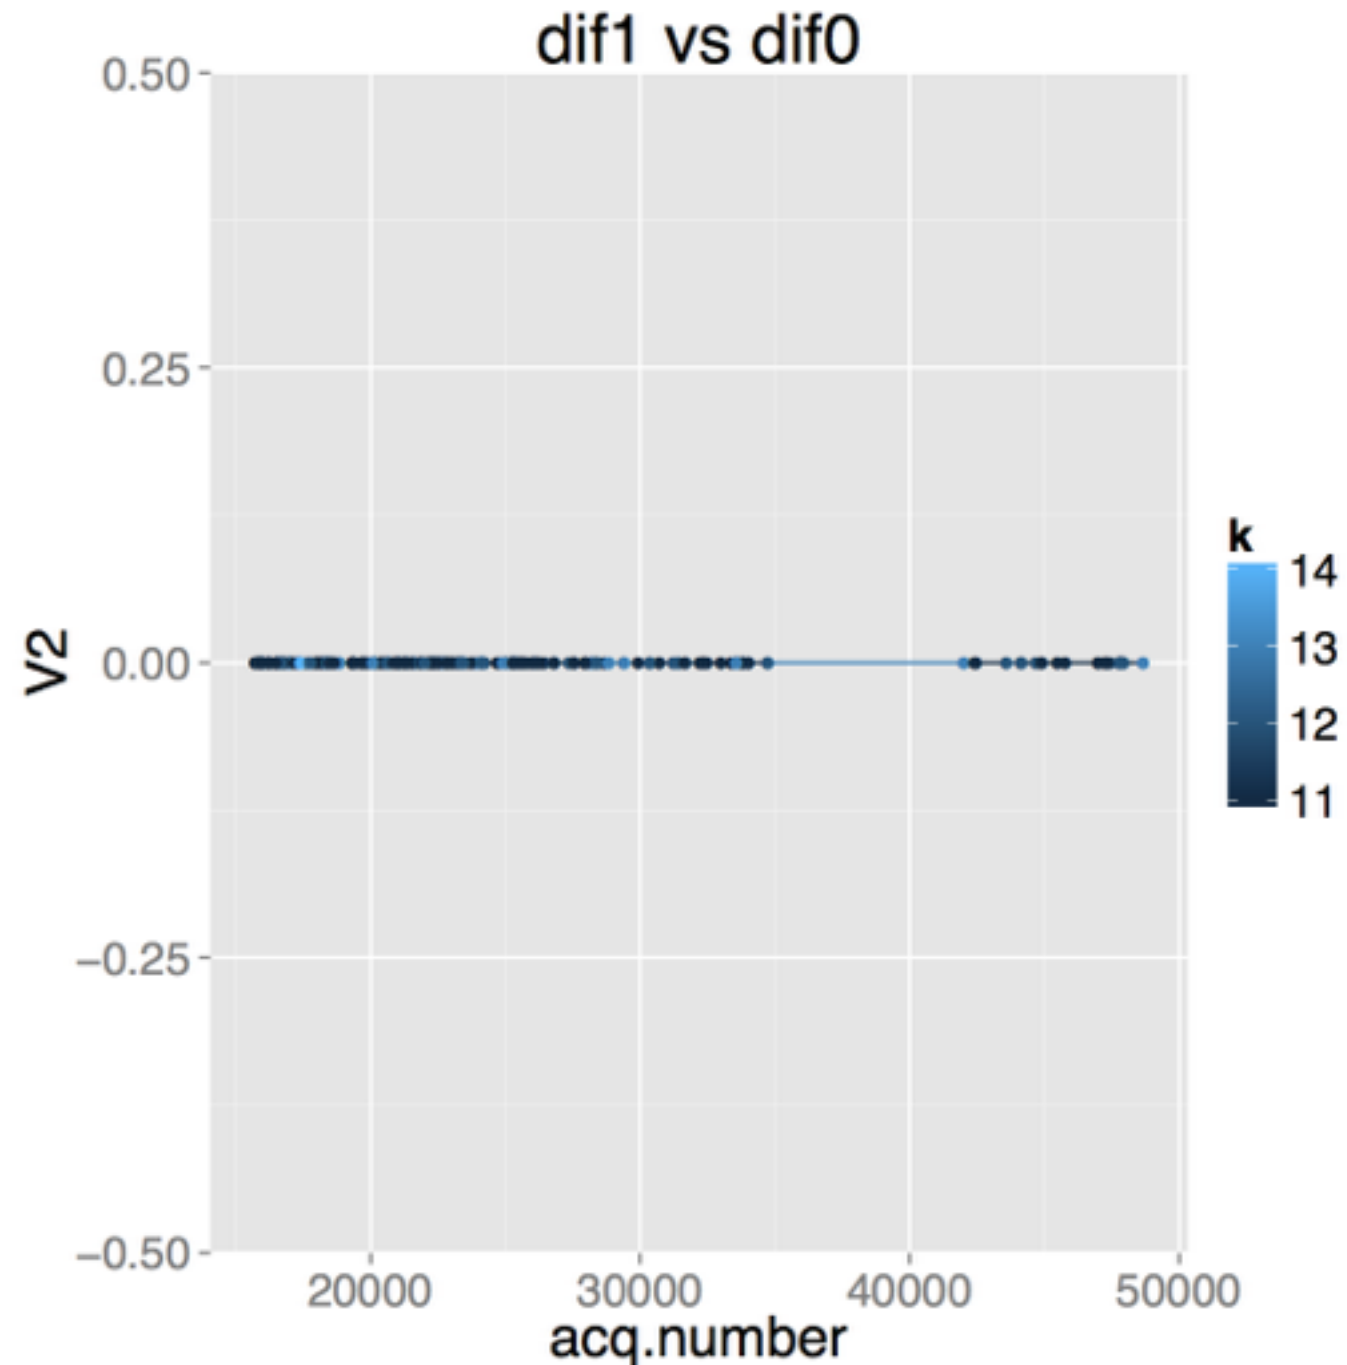

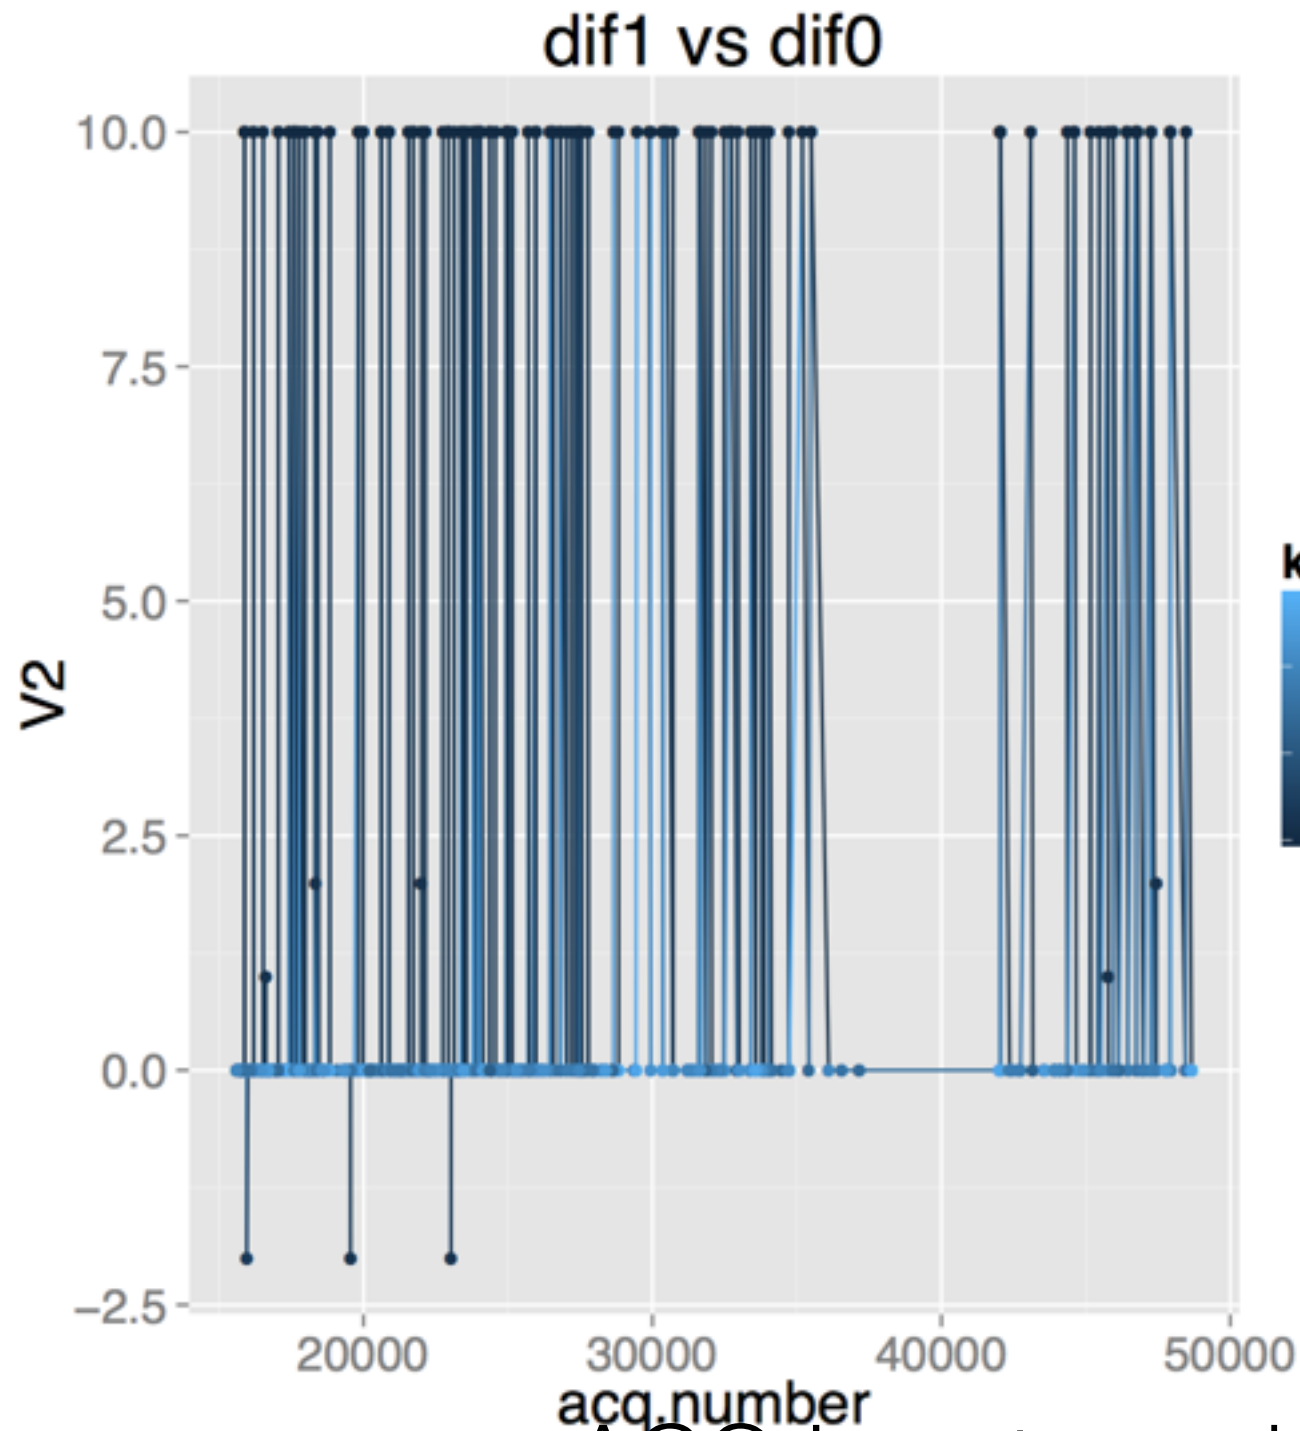

Synchronisation problems

Synchronisation problems

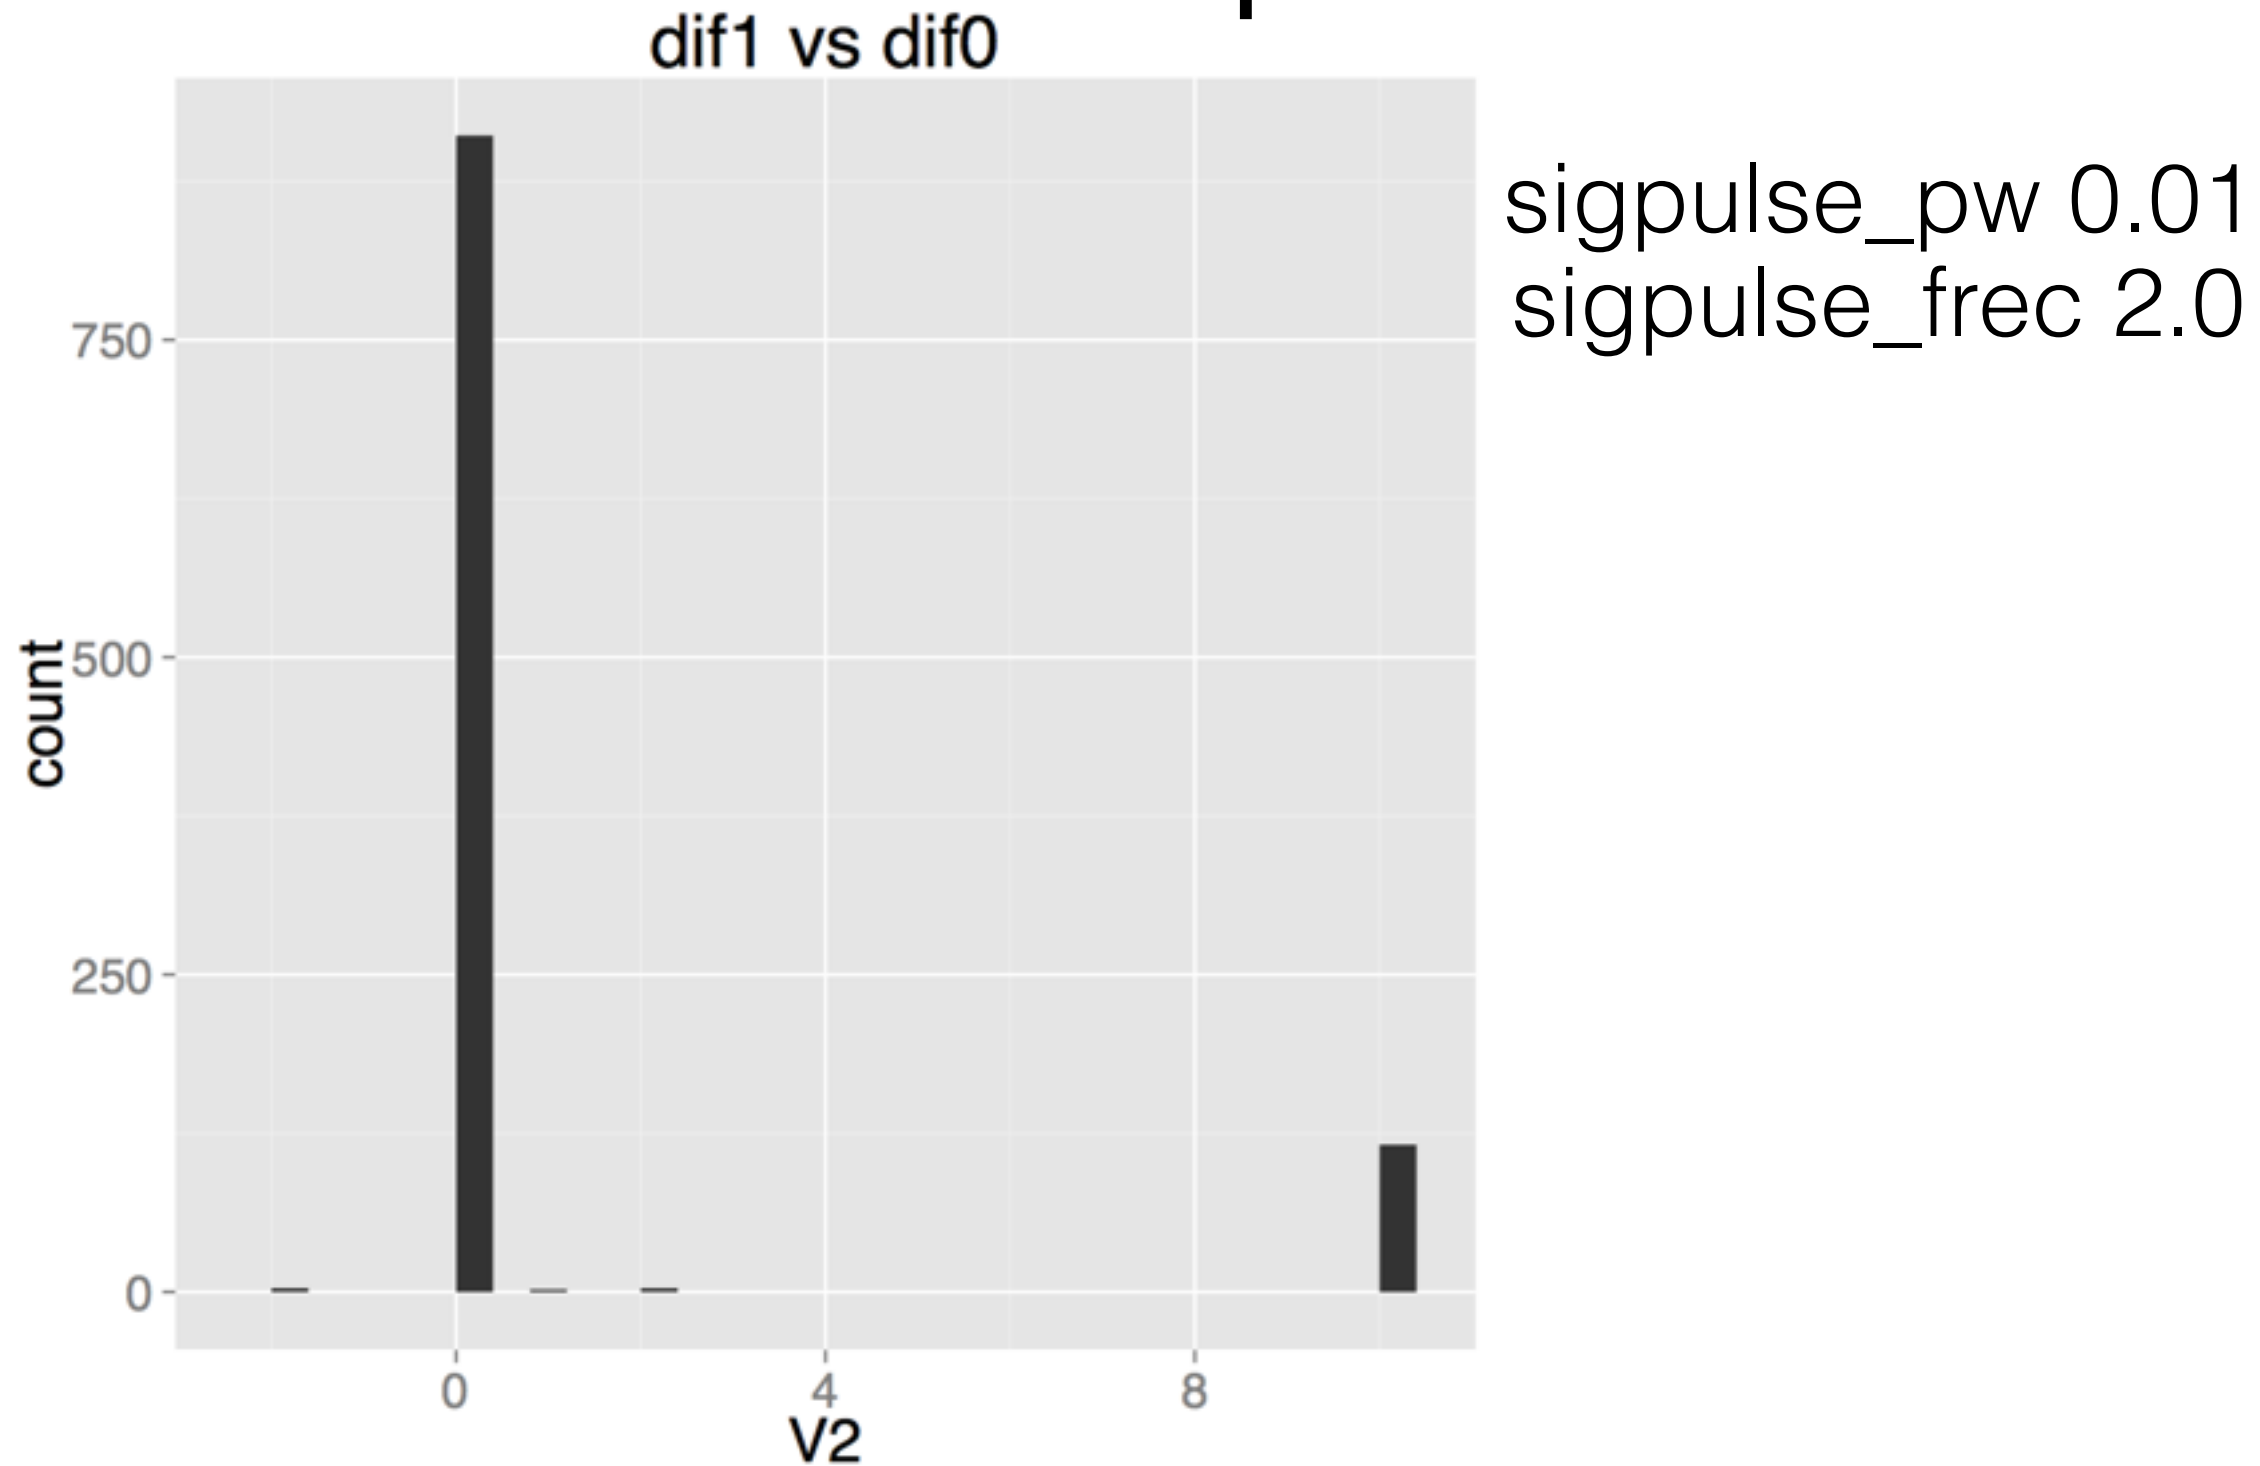

run 114

Mostly problem2

ACQ is not synchronised between
2 consecutive ACQ numbers

Synchronisation problems

run 114

Synchronisation problem

- Explanation: reading of new ACQ+1 starts before official end of ACQ

```
12c 121 127 111 127 120 129 120 122 113c 120 120 12c 1101 132 120 133 130
12d 137 135 1134 12e 1149 131 132 135 132 136 133 139 137 134 131 132 1150
133 135 135 137 134 141 140 137 131 139 139 134 13e 13d 13c 13d 140 144 14

```

- Data corruption

Synchronisation problem

- Regardless absence or presence physics in the spill DIF should count every spill (every ACQ number) one by one: in the raw files there are missing spills

- For example:

some DIF1 ACQ nubers:

24985,24987,24989,24990,24991,24993,24994,24997,24999,25001.....

- No any indication of the problem
