

Sebastien Incerti serves as director of research at the National Centre for Scientific Research (CNRS) and the National Institute for Nuclear and Particle Physics (IN2P3), France. He is coordinating the development of the open source Geant4 Monte Carlo toolkit (<http://geant4.org>) for the simulation of low energy particle-matter electromagnetic interactions, as well as the Geant4-DNA extension (<http://geant4.web.cern.ch/geant4/>) of Geant4 at the frontier between physics and radiobiology. His research activities focus on the investigation of biological effects of ionizing radiation in several application domains, including radiobiology, medical physics and space science.

Review of Geant4-DNA applications for micro and nanoscale simulations, S. Incerti et al., Phys. Med. 32(10) (2016) 1187-1200
