

Christina Trautmann is head of the Materials Research Department at the GSI Helmholtz Center for Heavy Ion Research in Darmstadt (Germany) and holds a professorship at the Department of Materials Sciences of the University of Darmstadt (Germany). She graduated from the Technical University in Munich and received her PhD degree from the Johann-Goethe Universität in Frankfurt. She is an internationally recognized expert in the field of ion-beam induced material modifications and ion-beam nanotechnology and has more than 300 publications in refereed scientific journals. Since 2004 she is Editor of the Journal Nuclear Instruments and Methods in Physics Research Section B: Beam Interactions with Materials and Atoms.
