

# GDR QCD 2016

## jeudi 10 novembre 2016

### Session 5: Interactions simples et multiples entre partons dans les nucléons - Auditorium Joliot-Curie (09:00 - 13:00)

-Présidents de session: Raphaël Dupré; Hervé Moutarde; Sarah Porteboeuf-Houssais

time	[id] title	presenter
09:00	[20] Nucleon structure studies with PANDA using time like processes	Dr RAMSTEIN, Béatrice
09:30	[21] Electromagnetic baryonic transitions in the Time like region with HADES	M. SCOZZI, Federico
09:50	[22] Quark Frangmentation Functions from pion and kaon SIDIS Multiplicities	M. PIERRE, Nicolas
10:10	[23] Drell-Yan measurements at COMPASS	M. MEYER, Marco
10:30	Coffee break	
11:00	[18] A test of the leading-twist/leading-order approach on high statistical precision DVCS data	Dr DEFURNE, Maxime
11:30	[19] Deeply Virtual Compton Scattering at Jefferson Lab in the 11 GeV era	Dr SOKHAN, Daria
12:00	[17] Exclusive photoproduction of a gamma rho pair with a large invariant mass	Prof. SZYMANOWSKI, Lech
12:30	[15] Extending a Generalized Parton Distribution from DGLAP to ERBL	M. CHOUIKA, Nabil
12:50	[16] Summary of the kick-off meeting (September 29th-30th, 2016)	Dr MOUTARDE, Hervé
