Euclid - An update on the mission and its processing plan

jeudi 15 juin 2017 14:00 (40 minutes)

The preparation of the Euclid mission is progressing, with the instruments entering the production of the Qualification models, and the data processing ground segment in its design review. I will make a brief update of where the mission stands today, and focus on the plans that are made for operation and data processing. Details will also be given on how Euclid relies on external collaborations for input data, and on the planned public data releases and their content.

Topic:

Computing infrastructure and data management

Orateur: Dr SAUVAGE, Marc (CEA/DRF/Irfu/SAP)

Classification de Session: Workshop
