LSST DM stack image differencing on CFHT images

mercredi 14 juin 2017 11:00 (30 minutes)

In an introduction part, I will present the basics of the implementation of image differencing with the LSST DM stack.
Then I will present some preliminary results obtained by running this software on a subset of the CFHTLS Deep Fields images and some comparisons using the published supernova data of the SNLS collaboration.

Orateur: M. FOUCHEZ, Dominique (CPPM)

Classification de Session: Workshop
