

2nd SVOM Scientific Workshop

SVOM General Program Organization

Xuhui Han, Andrea Goldwurm

Qiannan, China, April 27, 2017

Outline

- **General Concept of General Program**
- **Working Procedure of General Program**
- **Support from Science Centers**

General Concept of General Program

Observing Programs of SVOM:

- Instrument Calibration
- Core Program
- Targets of Opportunity (ToO)
- **General Program**

A fraction of the total observing time is allocated to the observations of pre-planned targets.

General Concept of General Program

Who

- one Co-I (the Responsible Co-I)
- one Guest Observer, provided that at least one SVOM Co-I is associated with the proposal

What:

- Scientific objectives detailed in “Non Gamma-Ray Burst Science with SVOM”

Duration of observation sequences:

- 1 - 14 orbits
- 14 targets maxim per day

Distribution of Time:

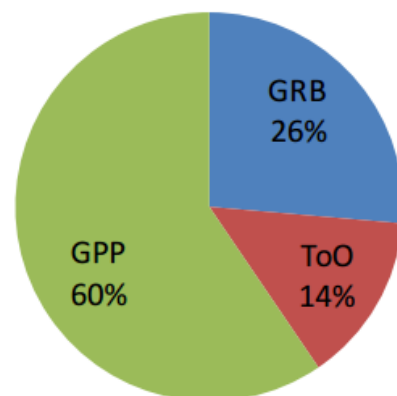

- 60% to Chinese Co-Is
- 40% to French Co-Is

General of General Program

NOMINAL MISSION

First 3 years

Nominal Mission
USEFUL MISSION TIME
(per year) – MRR GP2

Progressive evolution

EXTENDED MISSION

Last 2 years

Extended Mission
USEFUL MISSION TIME
(per year) – MRR GP2

The **TOTAL TIME** :

1. Core Program
2. ToO Program
3. General Program

USEFUL
TIME

4. Calibrations
5. South Atlantic Anomaly(SAA)
6. Satellite failure
7. PF maintenance and Orbit Manoeuvres

10% outside of B1 law

50% outside of B1 law

General Concept of General Program

GP “A-target”:

- **High priority observations in GP**
- **Resume or be rescheduled after interruption**
- **Rescheduled in GP of following year**
- **50% observing time of nominal mission**
- **30% observing time of extended mission**

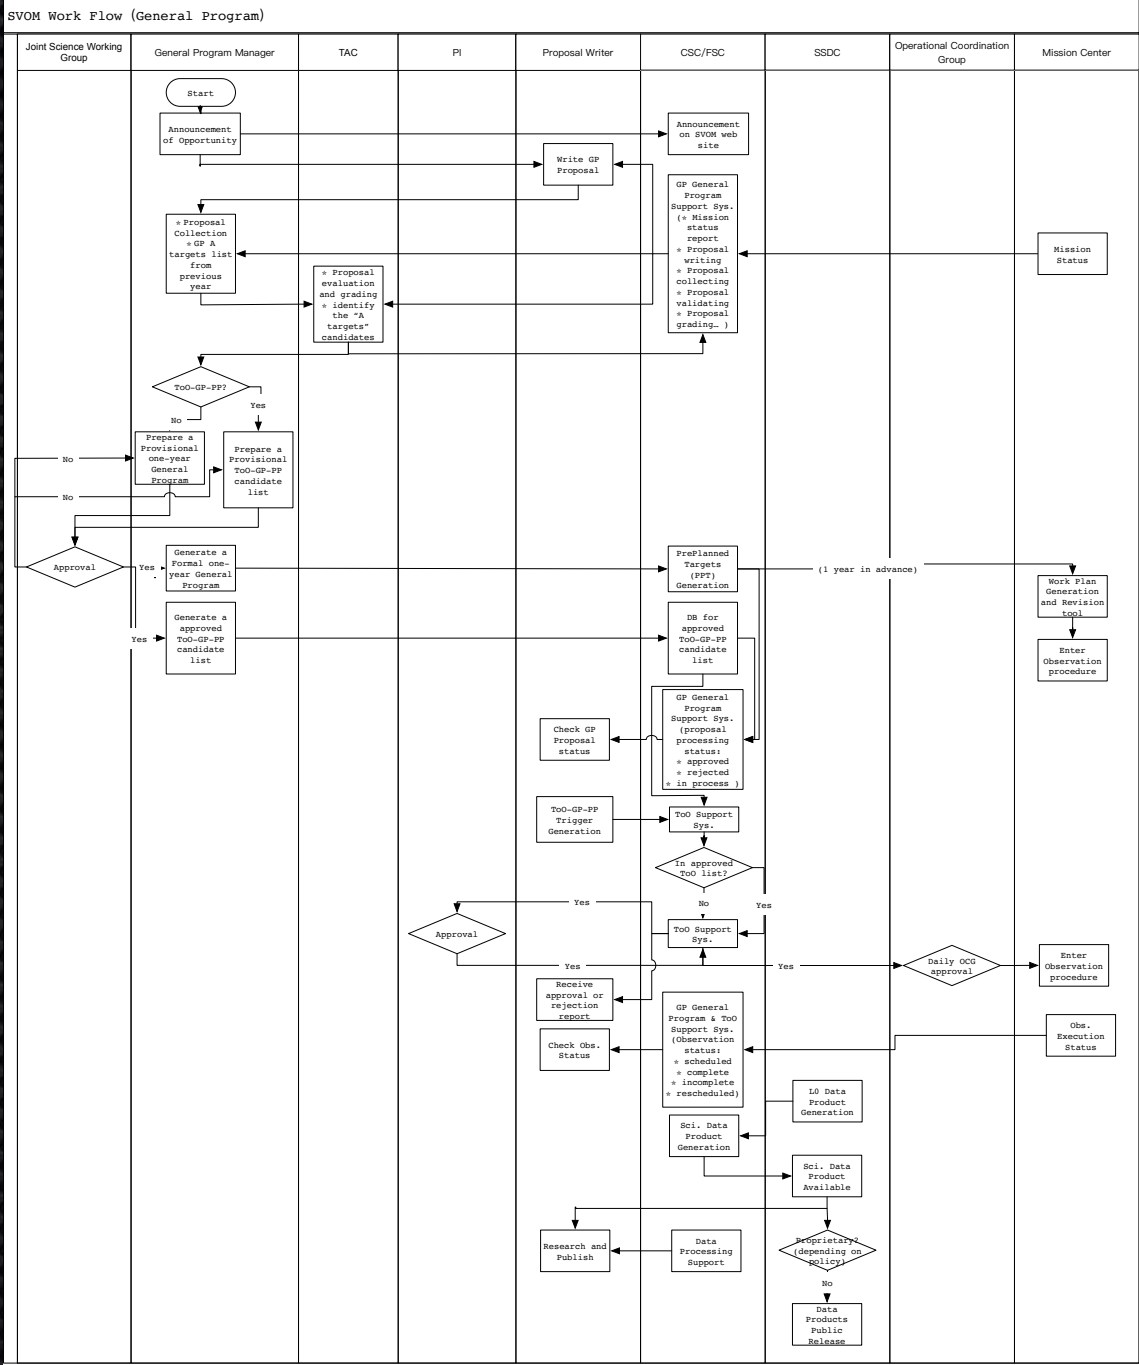

General Concept of General Program

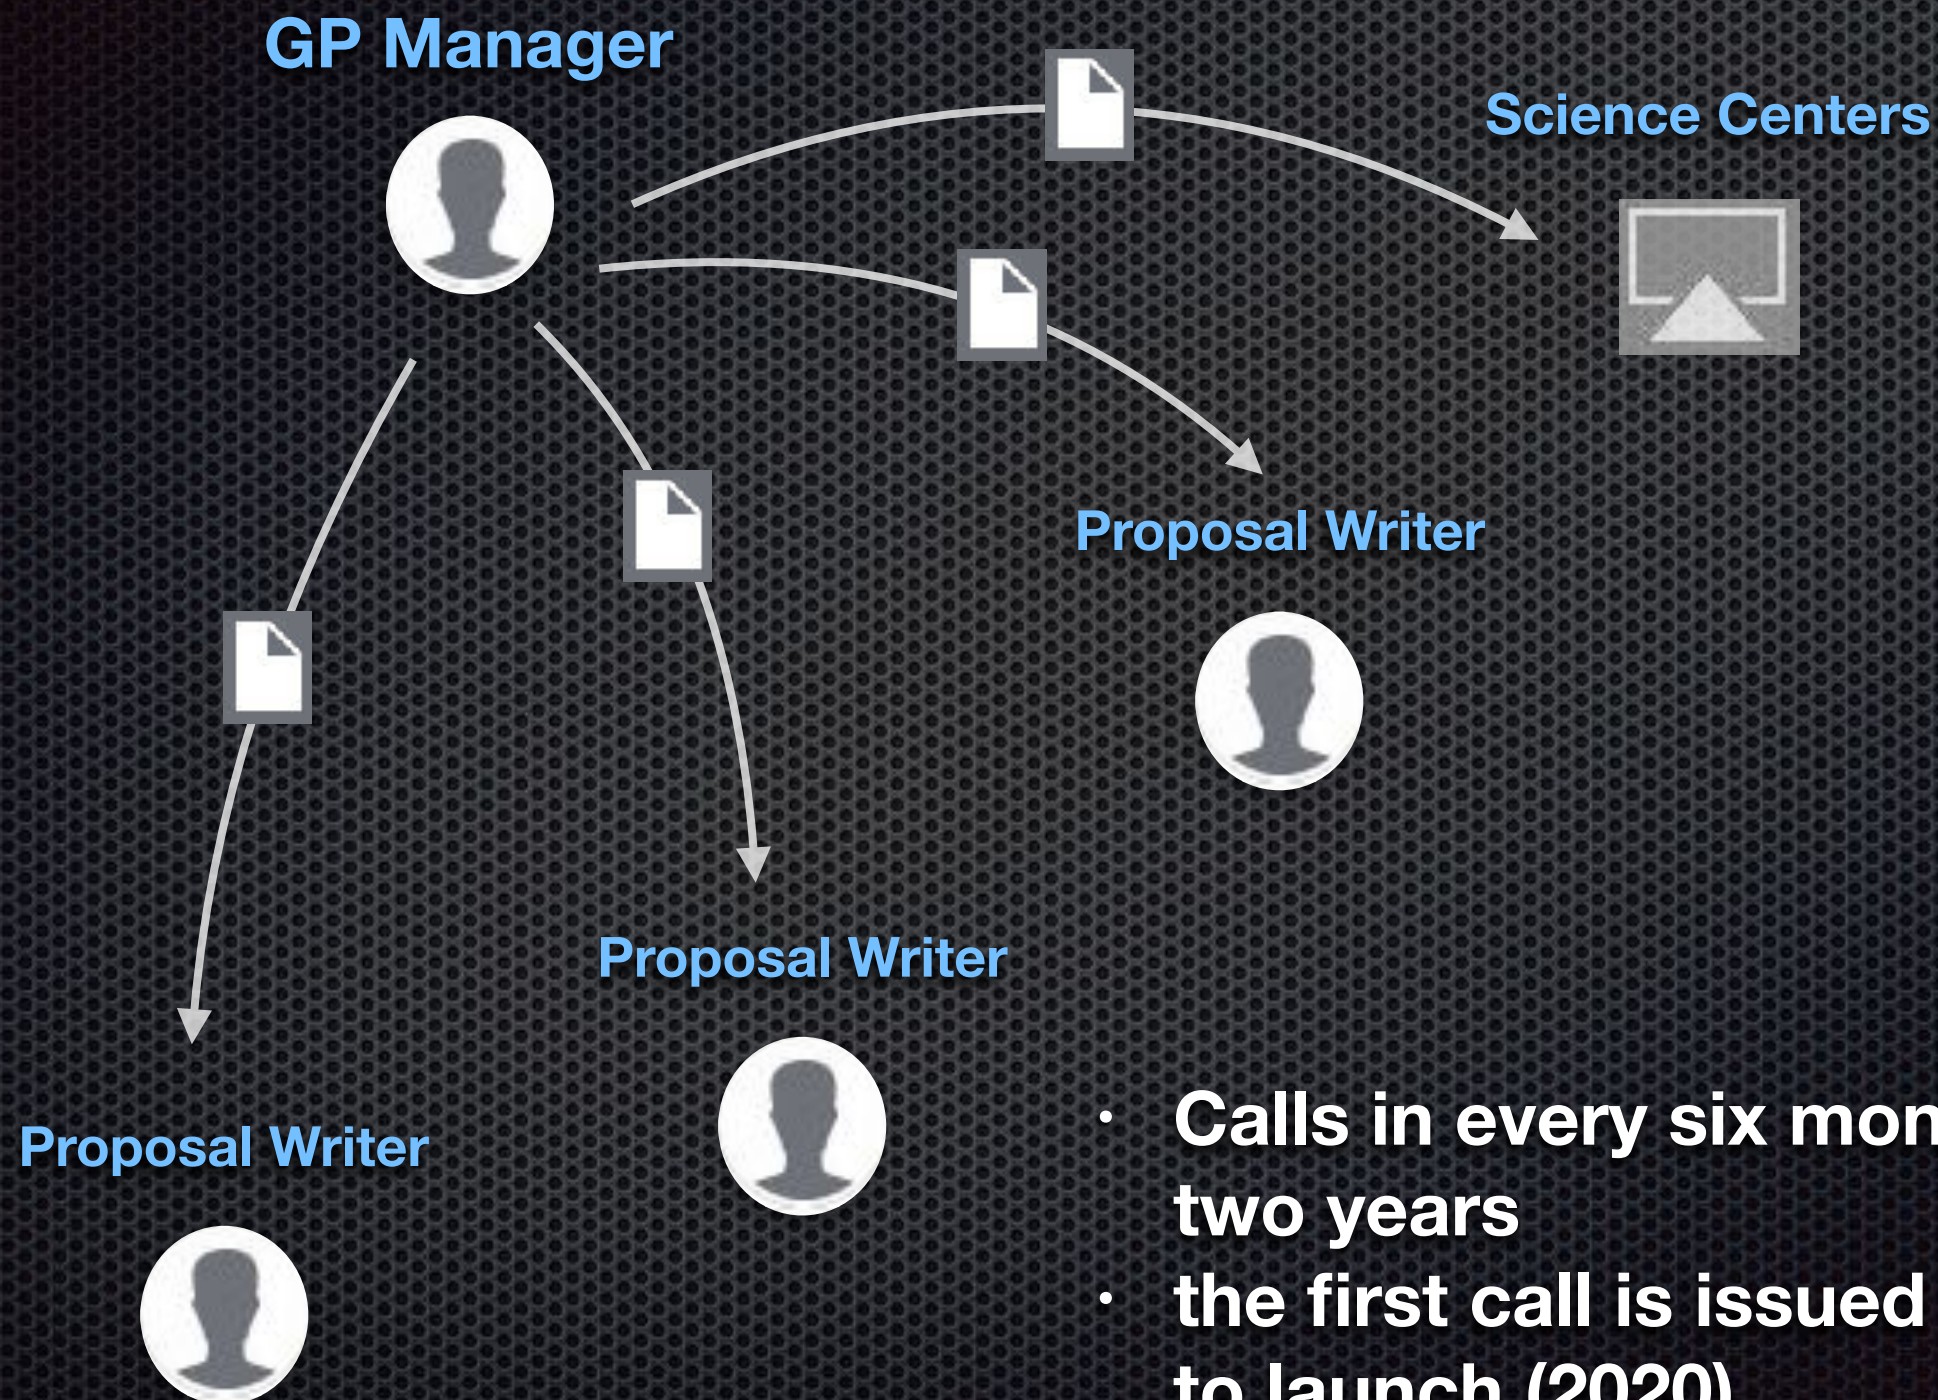

GP ToO:

- **Known sources**
- **GP selection process**
- **Approved by Time Allocation Committee (TAC)**

GP workflow

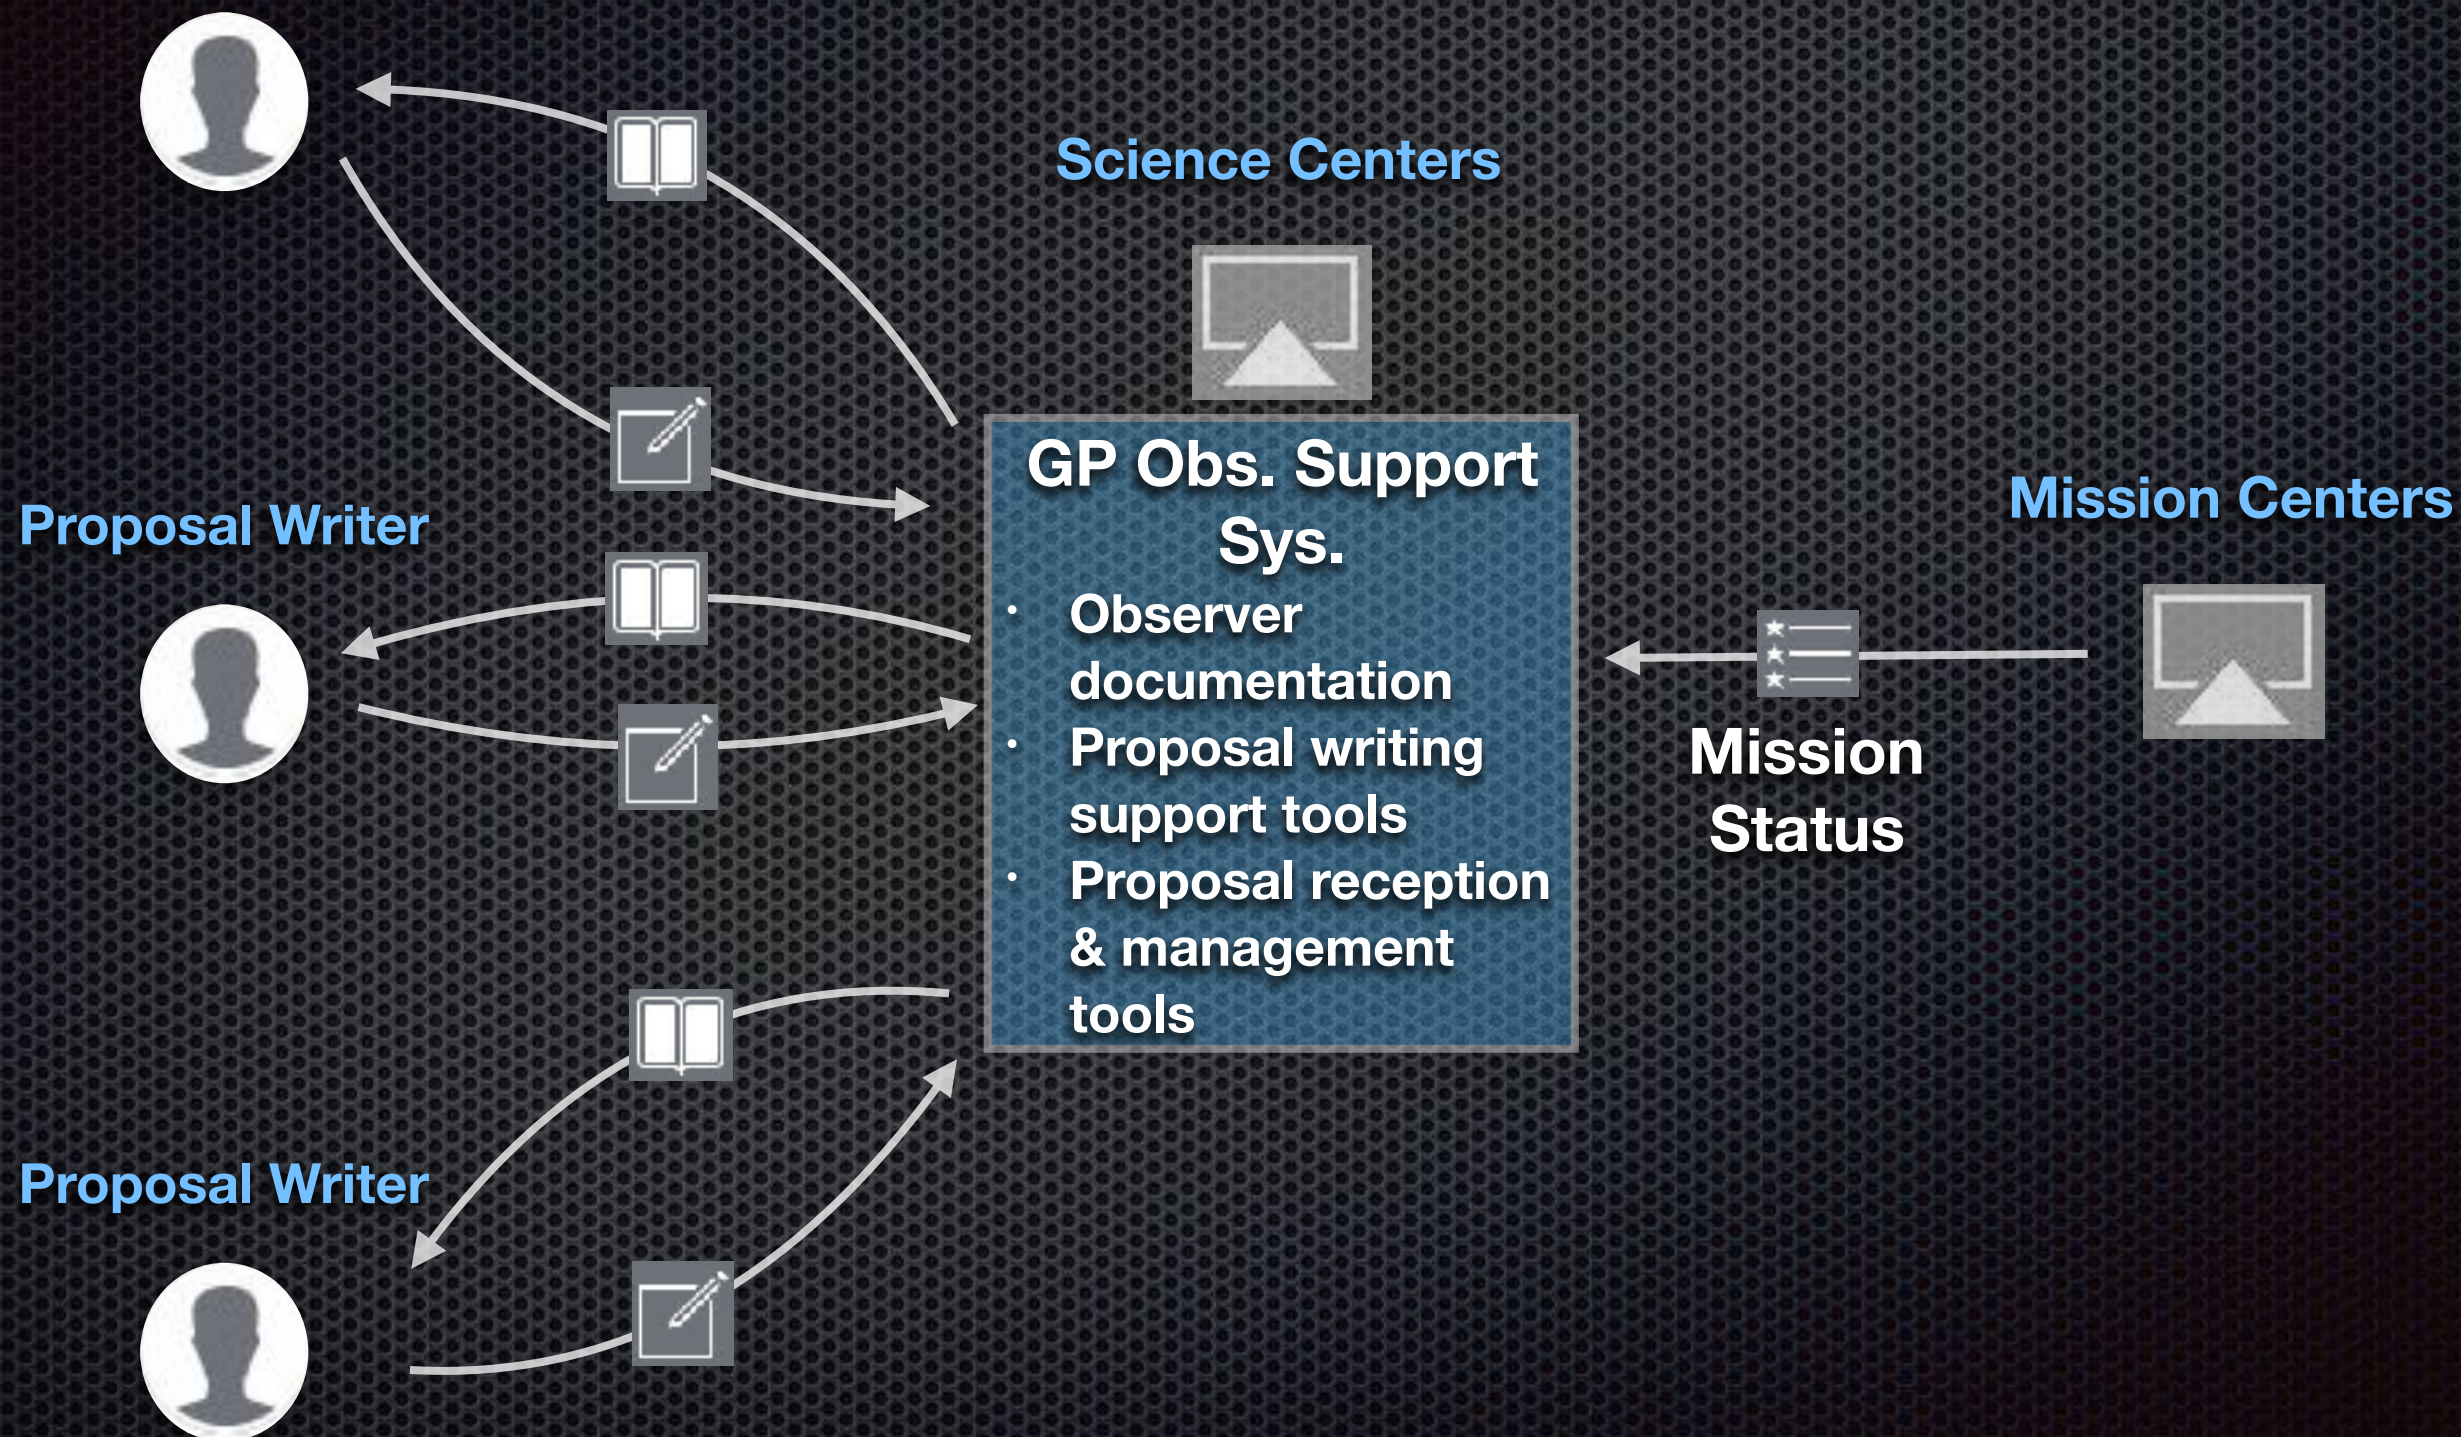

Call for Proposals

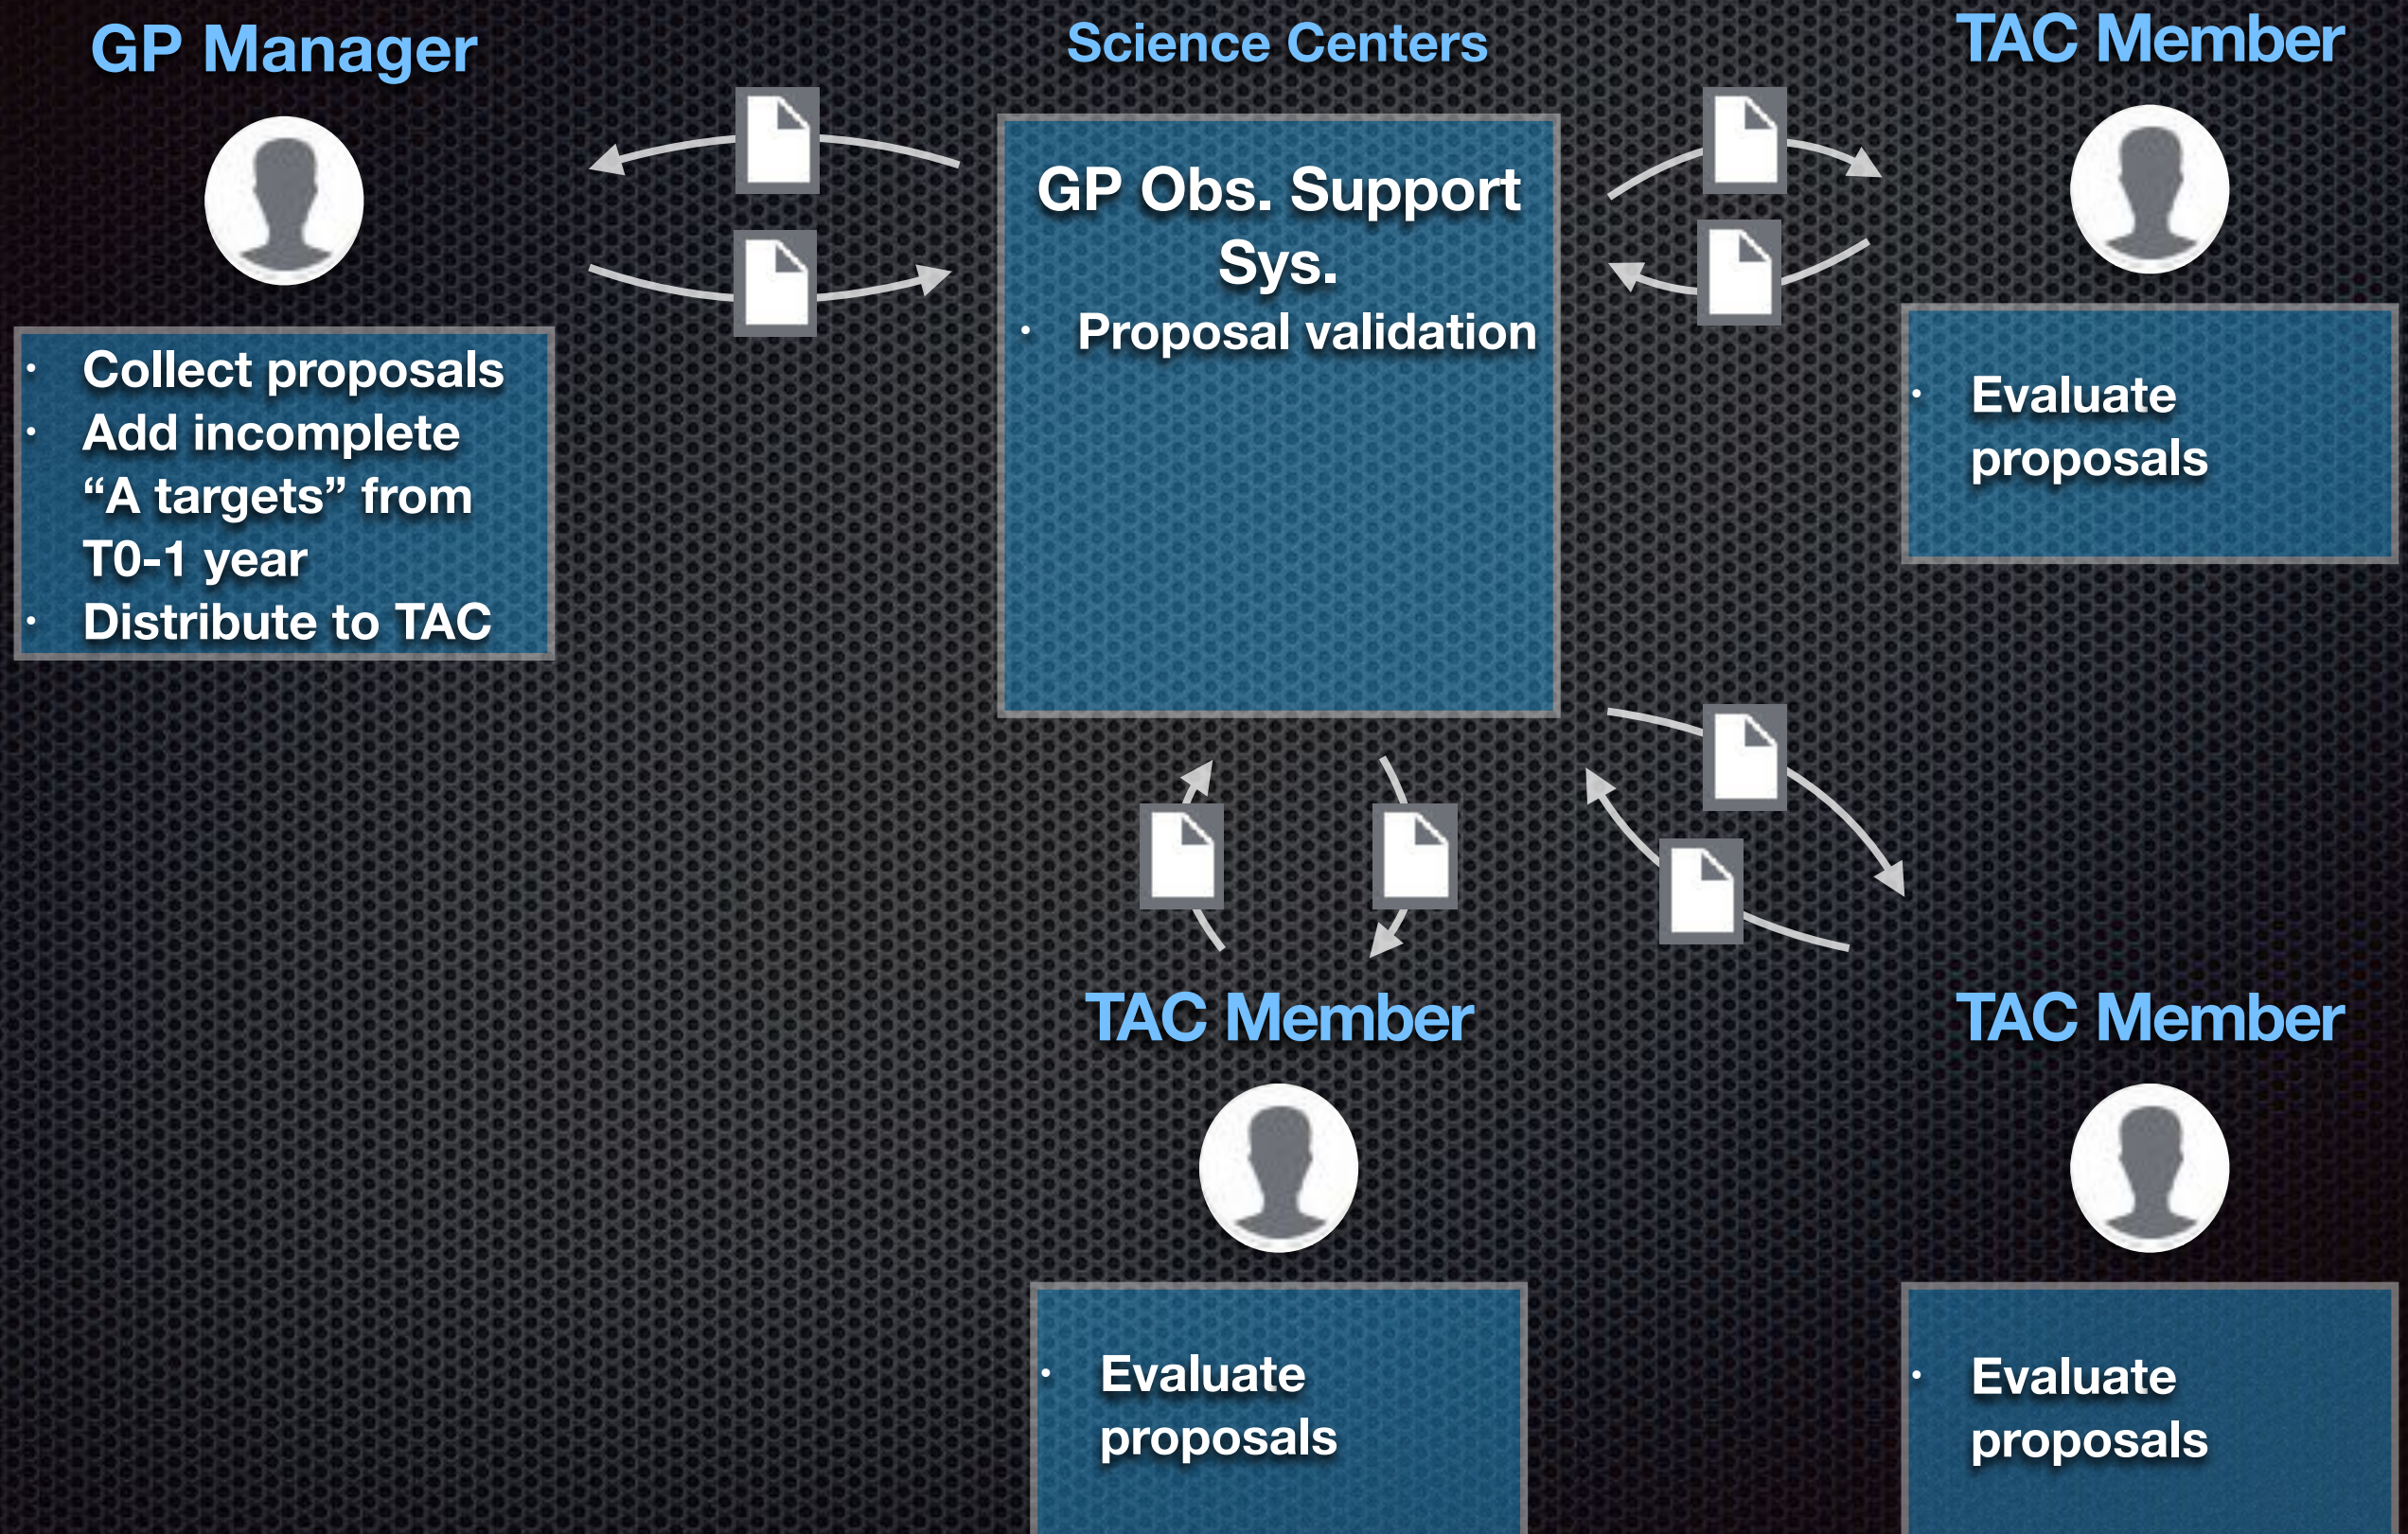

- Calls in every six months in the first two years
- the first call is issued one year prior to launch (2020)

Writing Proposals

Proposal Writer

Processing Proposals

Processing Proposals

GP Manager

- Organize a time allocation review meeting

Science Centers

GP Obs. Support Sys.

- Proposal approval

TAC Review Panel

- Select
- Identify "A-Target"

Processing Proposals

GP Manager

Science Centers

**GP Obs. Support
Sys.**

- Approved proposal
- “A target” candidates

ToO-GP-PP?

No

Yes

**Prepare a provisional
one-year pre-planned
targets**

**Prepare a
provisional ToO-GP-
PP candidate list**

Processing Proposals

GP Manager

ToO-GP-PP?

No

Yes

Prepare a provisional
one-year pre-planned
targets

Prepare a
provisional ToO-GP-
PP candidate list

Joint Science
Working Group

Processing Proposals

GP Manager

Approval

Joint Science
Working Group

Processing Proposals

GP Manager

Yes

- Formal one-year GP
- Formal ToO-GP-PP list
- Proposal approval or rejection report

Science Centers

GP Work Plan

Science Centers

- **Generate PrePlanned Targets (PPT)**

Mission Center

- **Generate the work plan**

- **Execute observation**

GP Obs. Support Sys.

- **proposal processing status:**
 - ★ approved
 - ★ rejected
 - ★ in processing

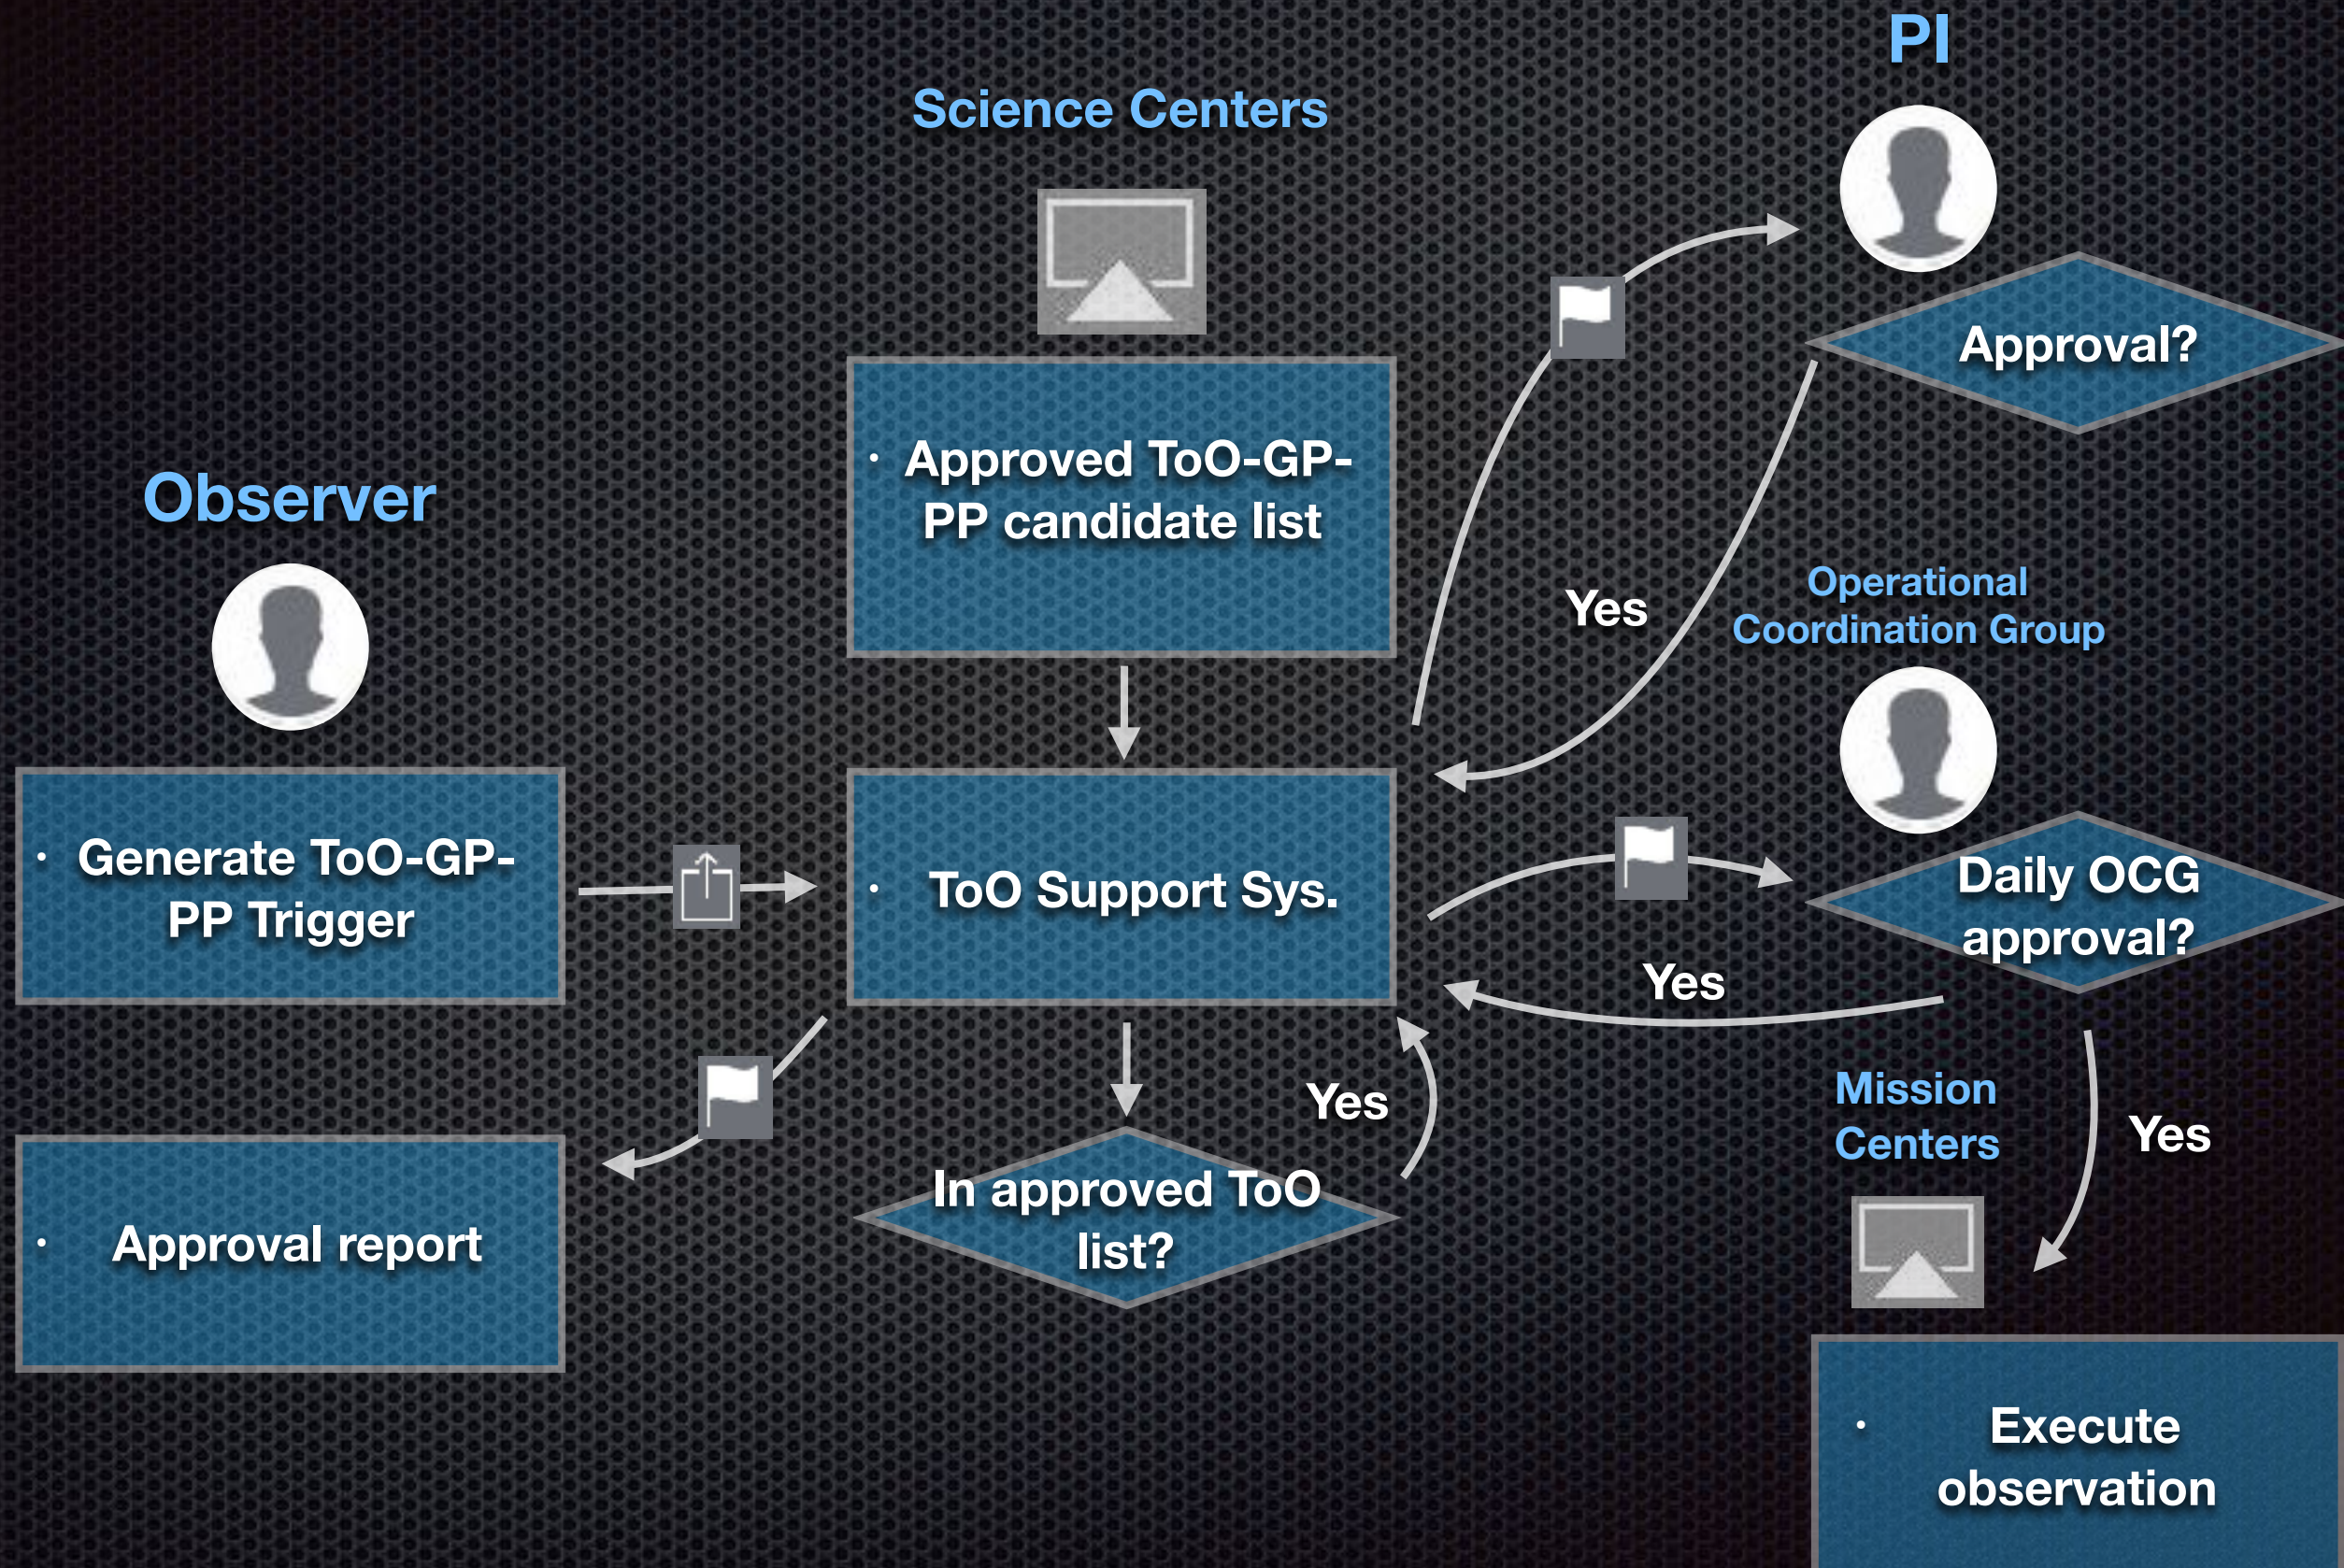

Proposal Writer

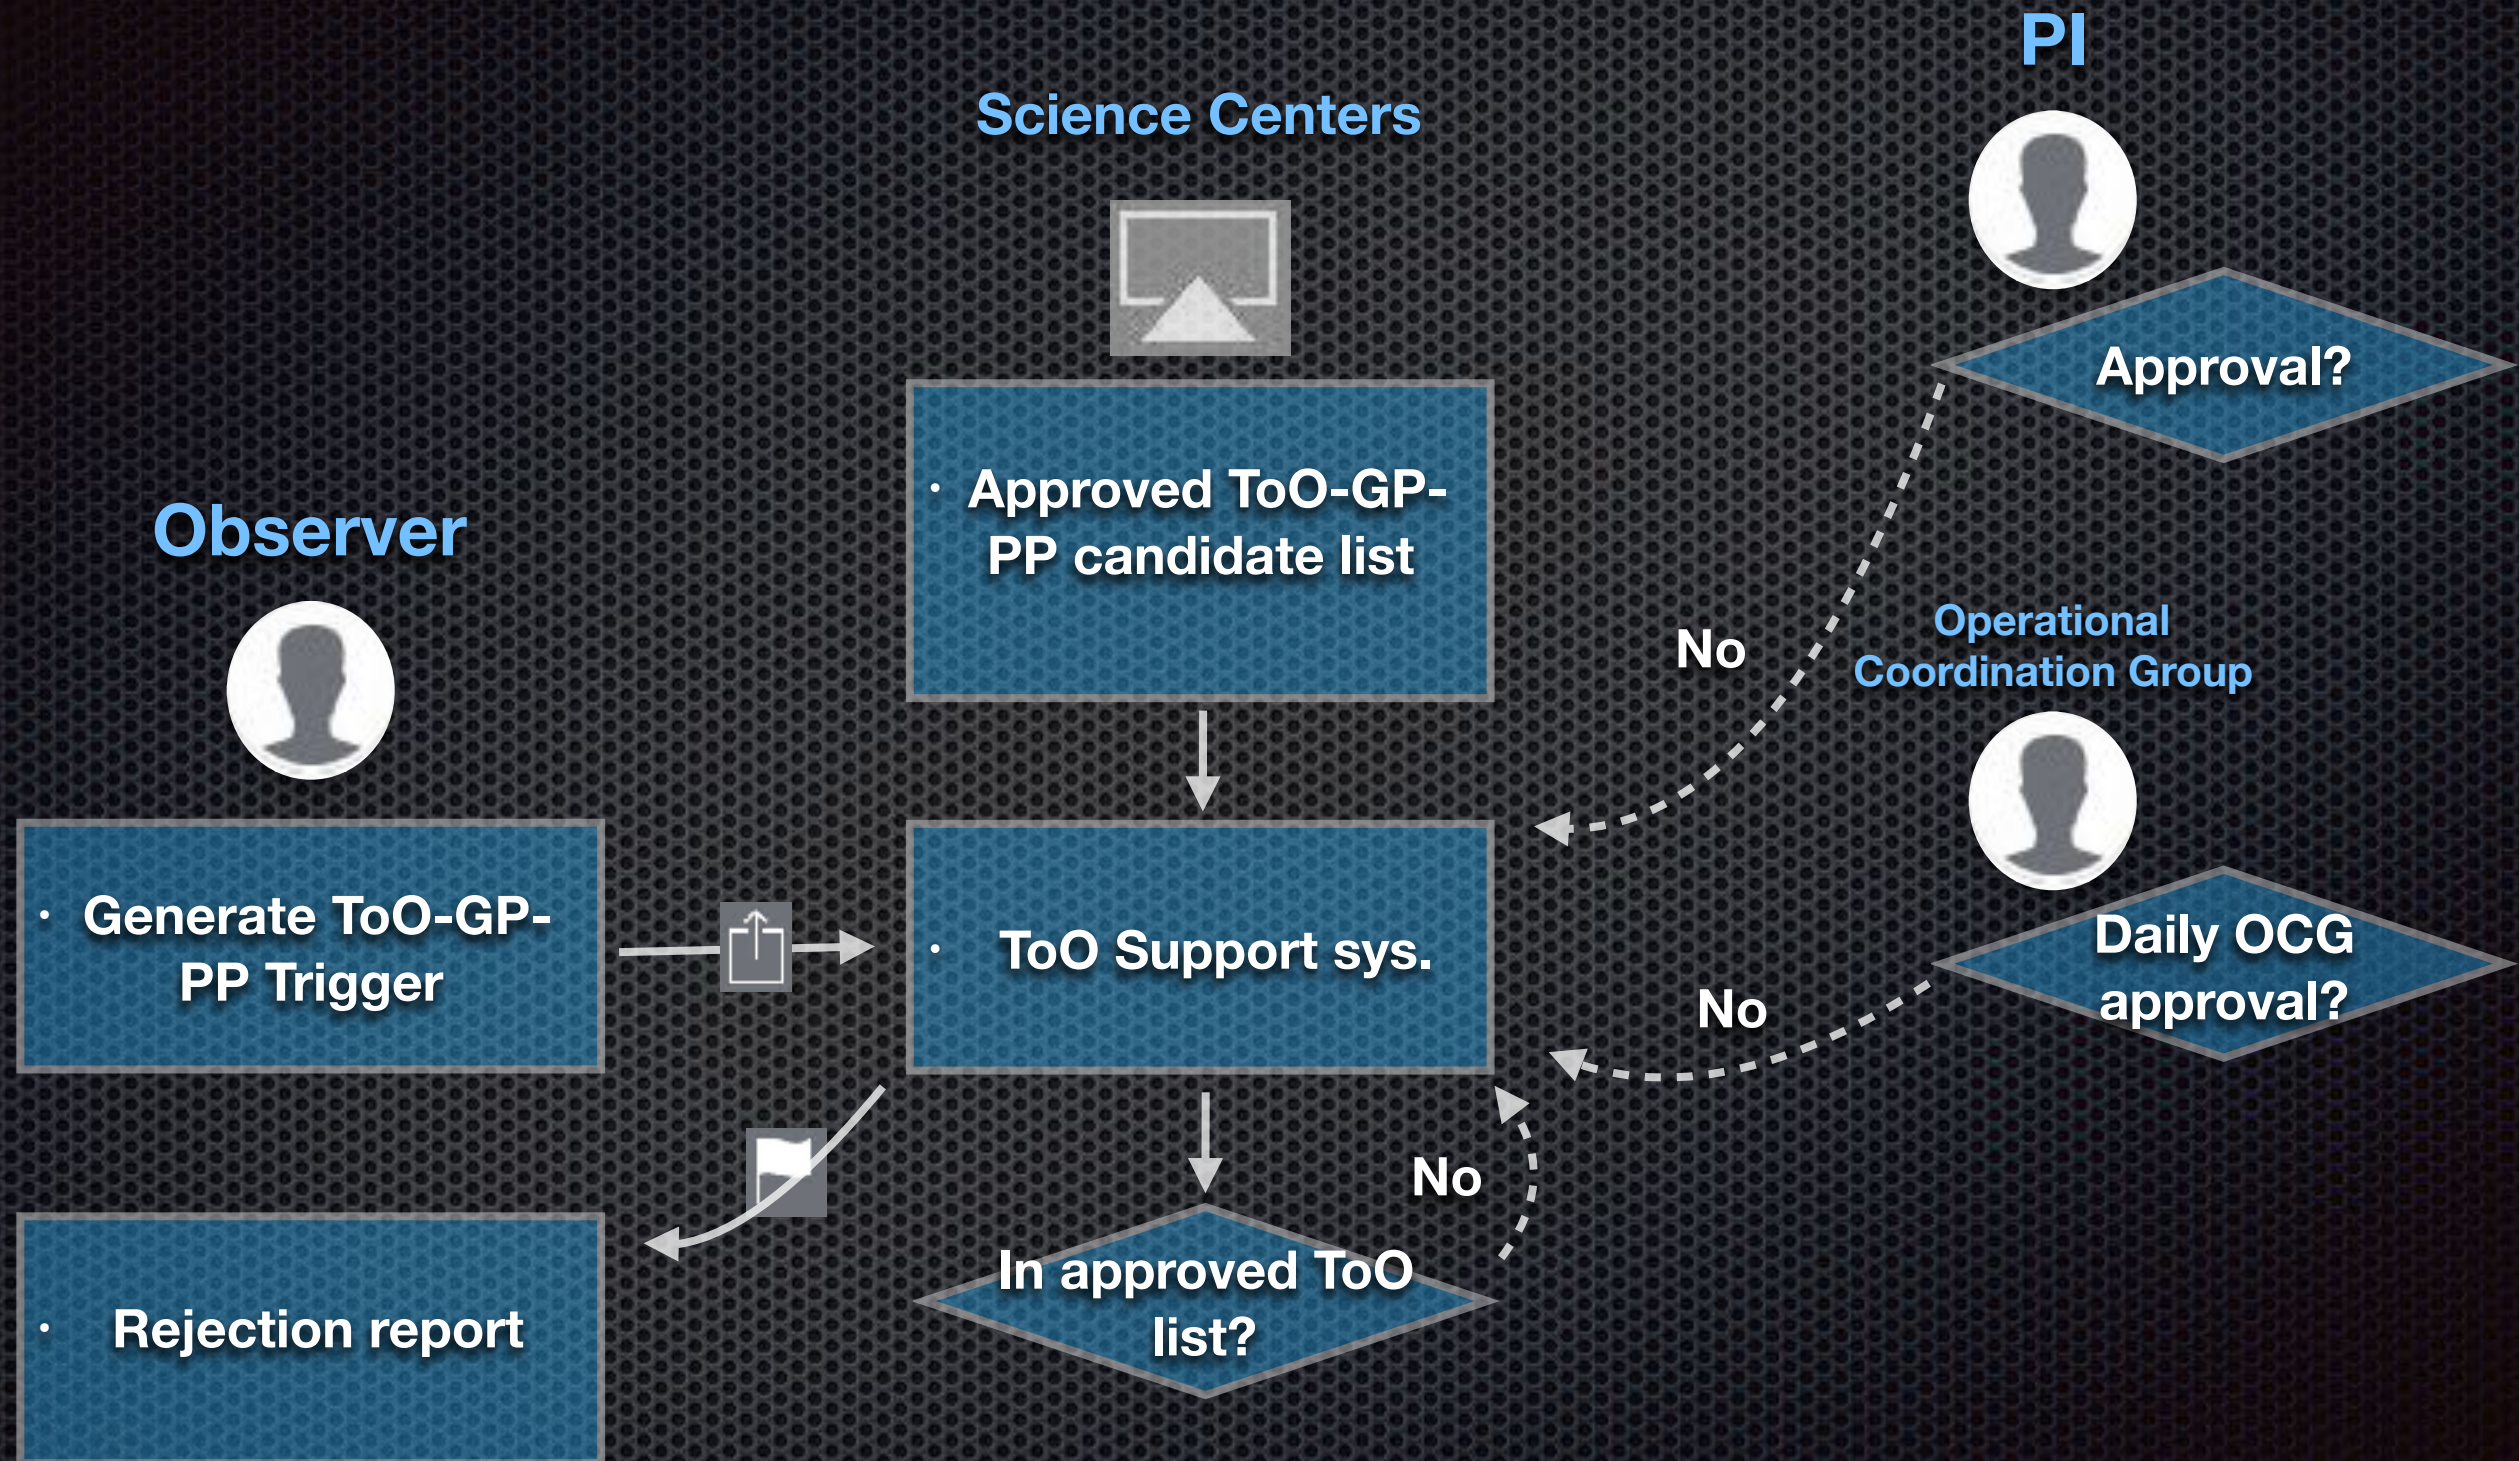

- **Check GP proposal status**

ToO-GP-PP Work Plan

ToO-GP-PP Work Plan

GP & ToO Observation

Observer

- Check observation status

Science Centers

GP Obs. Support Sys.

- Observation status:
 - ★ scheduled
 - ★ complete
 - ★ incomplete
 - ★ rescheduled

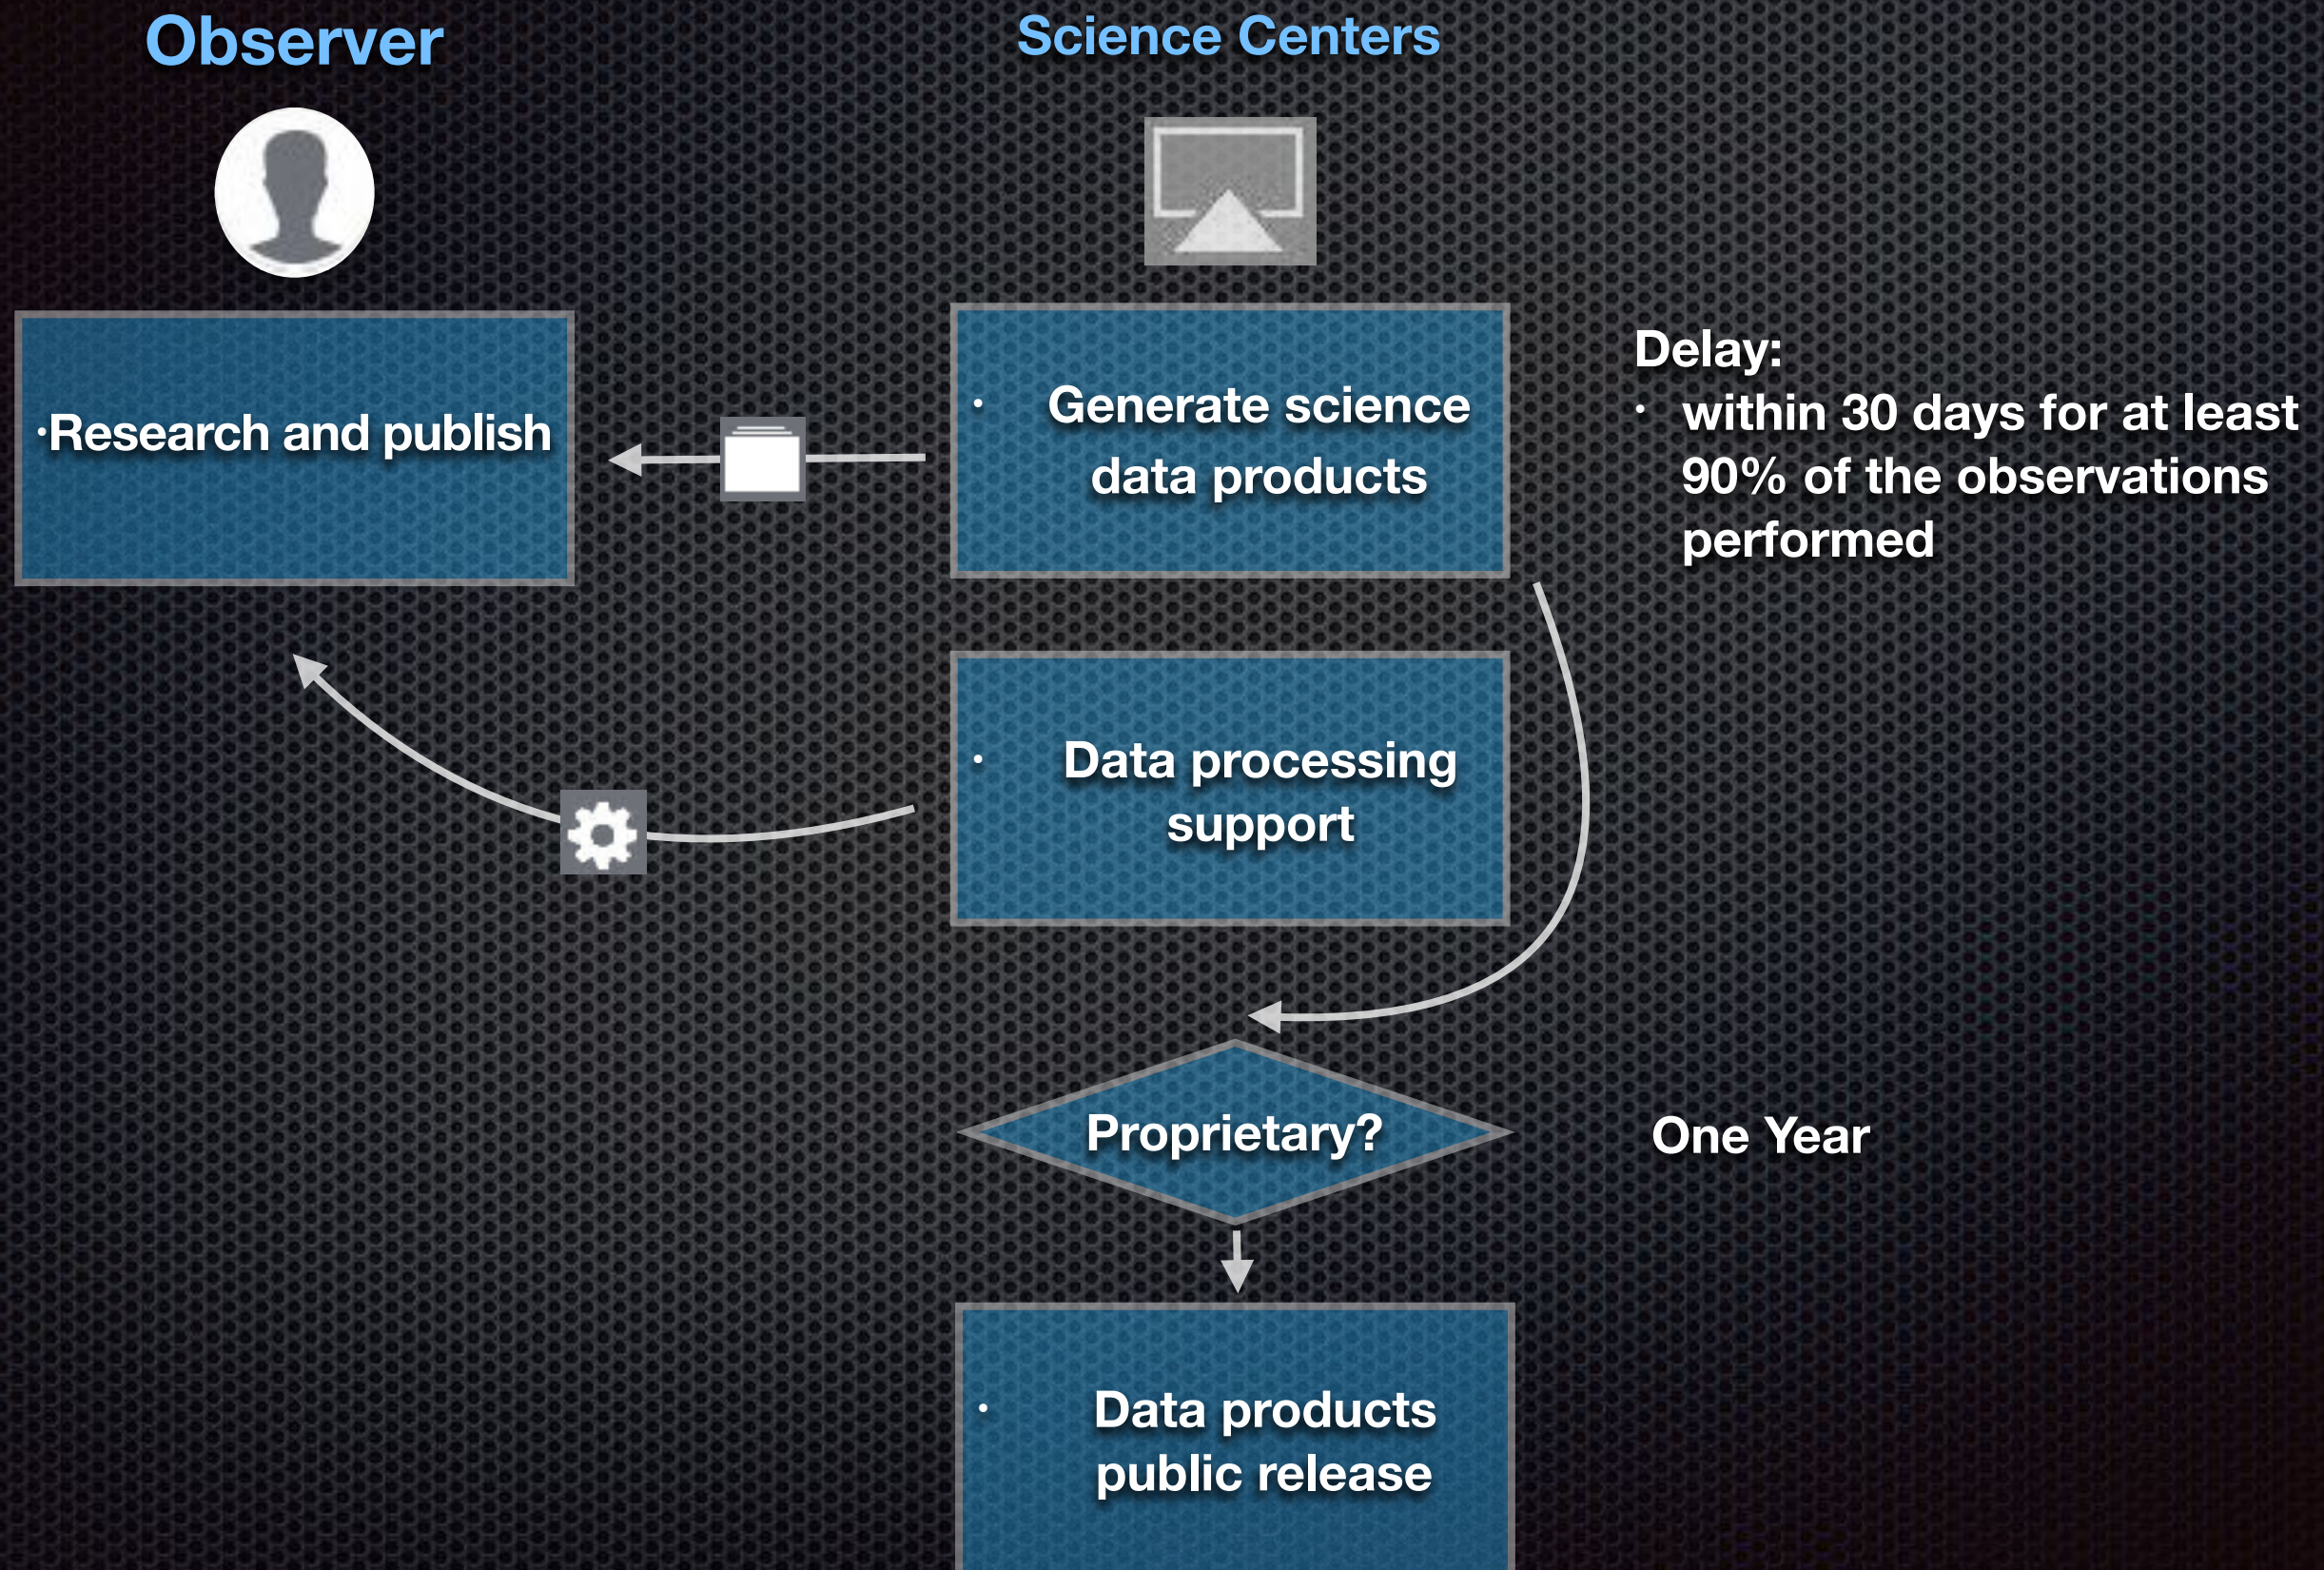

Mission Centers

- Observation status

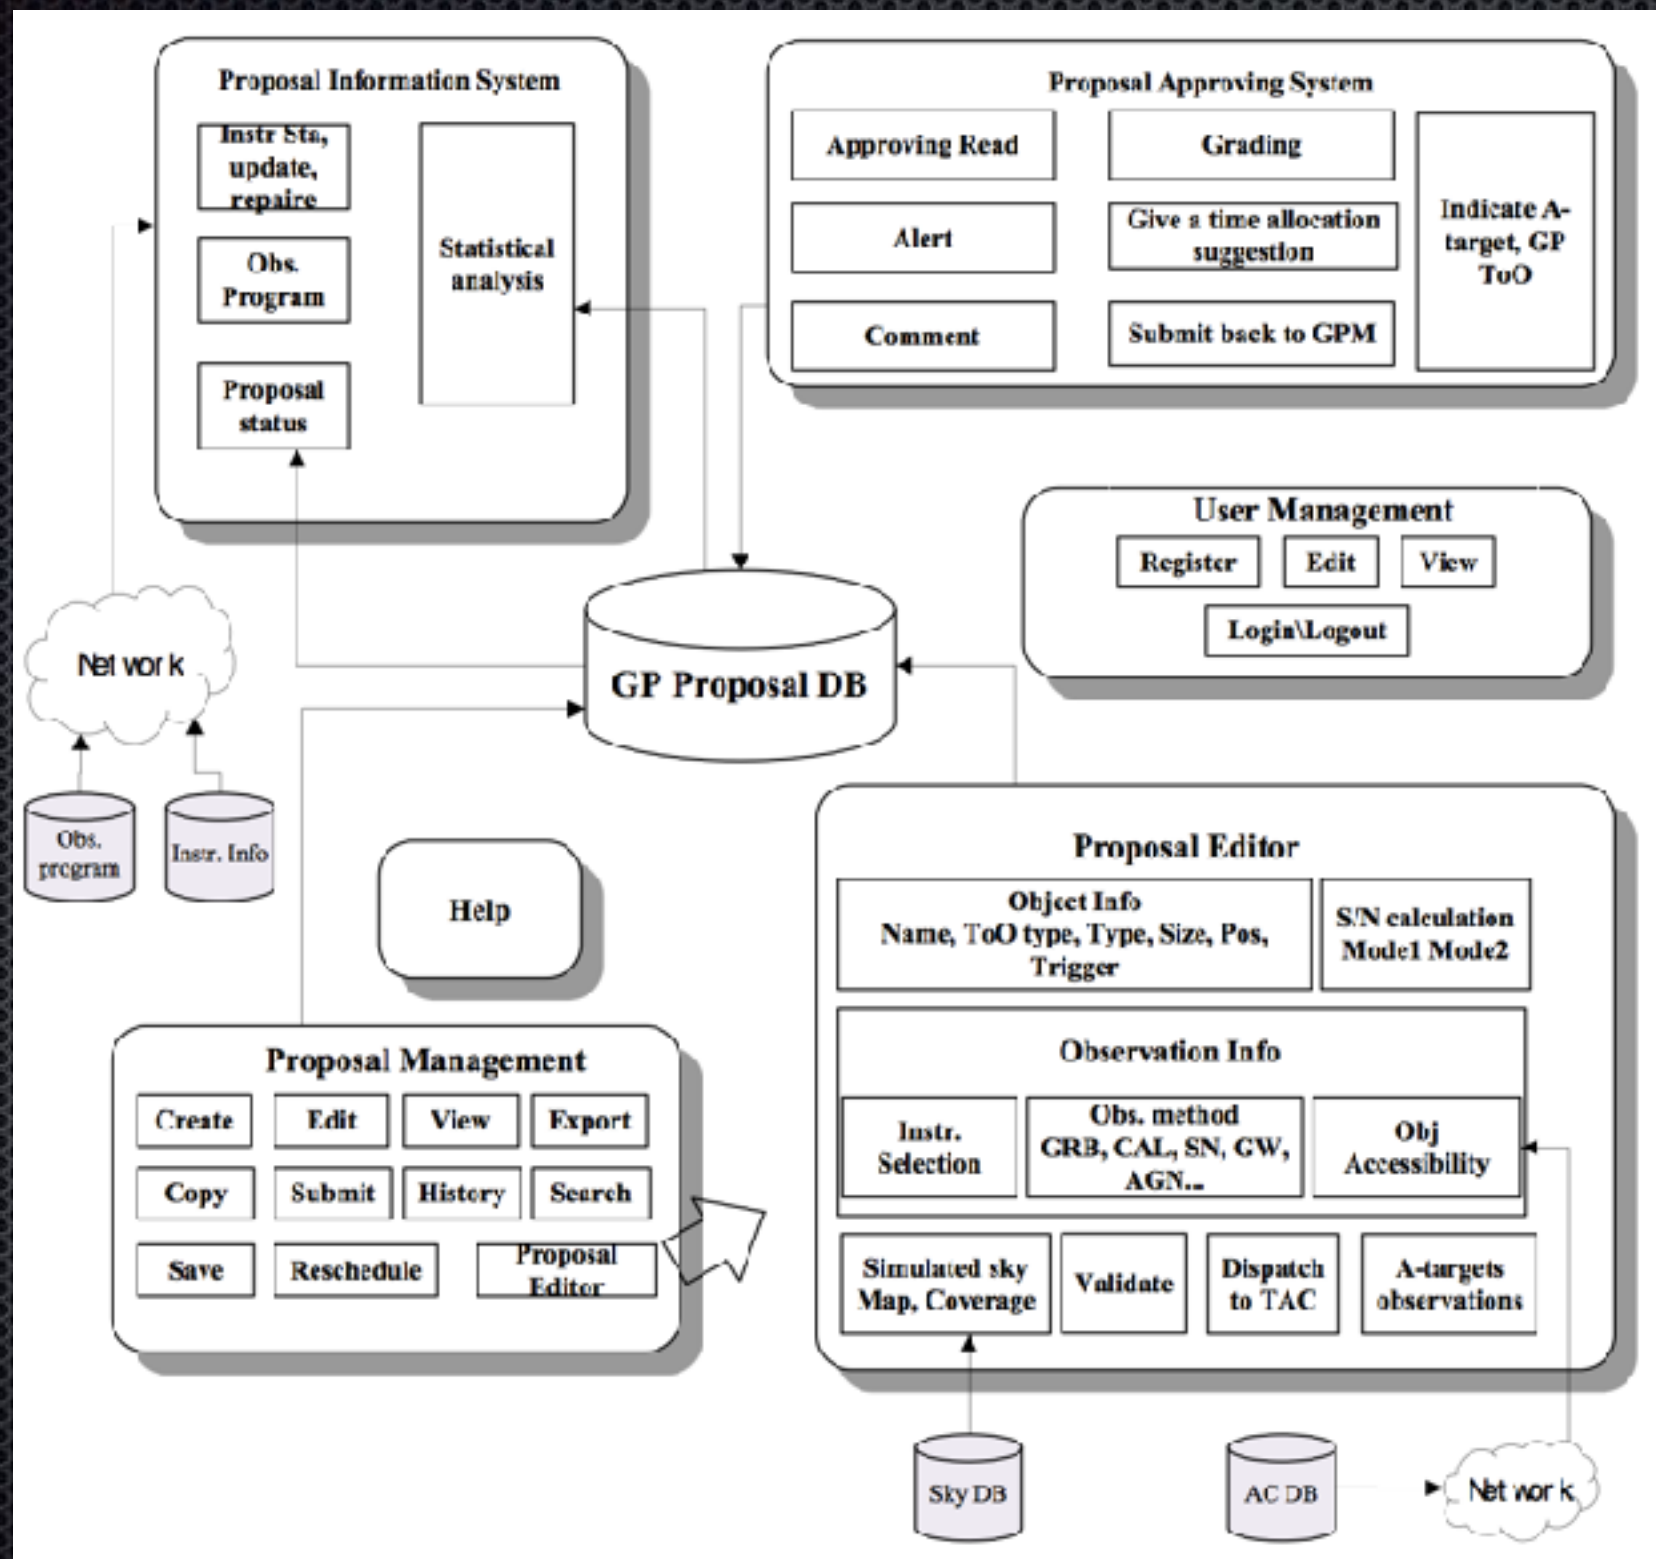

GP & ToO Data Products

Getting Support from Science Centers

General Program Support System

General Program Support System

Aim

- ✦ The General Program Support System is for SVOM scientists to submit, to process GP proposals, and to access GP observation status.

User

- ✦ GP proposal writer
- ✦ GP Manager
- ✦ TAC

Main Functions of Support System

- ✦ User management
- ✦ Proposal management
- ✦ **Proposal editor**
- ✦ Proposal/observation information
- ✦ Proposal approval
- ✦ Database support

Proposal editor

- ✦ Basic editing functions

✦ Required information

- ✦ Supporting functions

Notices:

1. time constrains
2. synchronous observations
3. revisit strategy
4. resuming strategy

- ✦ Interface for filling in the following information:

- ✦ Information of proposal writer and Co-I
- ✦ Proposal body to show the scientific merit
- ✦ Object or object list, name, type, size, position or position list
- ✦ Expected exposure time, observation duration, time window
- ✦ Applied instruments (GFTs included)
- ✦ Observation mode

Proposal editor

- ✧ Basic editing functions

- ✧ Required information

- ✧ **Supporting functions**

- ✧ Simulating observable time slots

- ✧ Estimating signal to noise ratio from expected brightness and exposure time

- ✧ Simulating sky images (VT)

- ✧ Searching SVOM observation history

Conclusion

- **SVOM Co-I & Guest observer with Co-I**
- **60% of observing time in Nominal Mission**
- **GP “A-target”**
- **GP-ToO**
- **First Call of proposals in 2020**
- **Synchronous observation with GFTs (5%)**
- **Support from Science Centers**

Thank you for your attention!
