Results of Cuoricino and review of neutrinoless double beta searches

jeudi 12 mars 2009 18:05 (25 minutes)

Status of DBD searches will be reviewed with particular emphasis on the experiments being prepared now with the goal of taking data in the next couple of year. Cuoricino, the succesfull demonstrator of the bolometric technique, has been stopped for making place to preparatiom of CUORE. The (almost) final results will be presented.
