

Saturday 29th of July

9h-9h30	R. TATEO	TTbar perturbation of 2D QFT
9h30-9h40	K. HOBUSS	Spectral flow for an integrable superspin chain
9h40-9h50	A. SQUARCINI	Phase separation and interface structure in two dimensions - Exact results from field theory
9h50-10h	M. MEDENJAK	On diffusion in integrable models
10h-10h10	H. YAN	Spin liquid and emergent gauge theory
10h10-10h20	S. SOTIRIADIS	Equilibration, memory loss and memory preservation in one-dimensional quantum gases
10h20-10h30	I. KUKULJAN	Out-of-time-ordered correlators (OTOC) in locally interacting theories
10h30-10h40	J. LAMERS	Numerical study of the F-model with domain walls
10h40-11h	COFFEE BREAK	
11h-11h10	K. BIDZHIEV	IRLM. Particle transport and entanglement entropy
11h10-11h20	S. DATTA	Entangling the Monster
11h20-11h30	V. BULCHANDINI	Integrable Kinetic Theories from Integrable Models
11h30-11h40	S. CHARBONNIER	$O(n)$ model on random triangulations
11h40-11h50	A. HACKENBROICH	Projected Entangled Pair State for a spin liquid chiral $su(2)$, entanglement spectrum
11h50-12h	P. FROMHOLZ	Obtention of Symmetry Protected Topological (SPT) phases in 1D ladder model using CFT
12h-12h10	M. LAPA	Anomalies in bosonic symmetry-protected topological phases
12h10-12h40	J. DE NARDIS	Spin transport in integrable spin chains
