It's 10pm, do you know where your data is?

vendredi 9 juin 2017 14:00 (1h 15m)

In this light-hearted talk we will briefly (!) cover how data management has evolved in astronomy from the first photographic images to the present. I will also give a personal speculation of what the future holds for how we will interact with astronomical data and how researchers, observatories and astronomical data centers can prepare.

Finally I will talk about some of the plans for the Large Synoptic Survey Telescope (LSST) Science platform.

Orateur: Dr ECONOMOU, Frossie

Classification de Session: Keynote
