

18th AGATA week and 2nd Position Sensitive Germanium Detectors and Application Workshop

jeudi 14 septembre 2017

Data Flow and front-End electronics - combined parallel session - Saletta n. 2 (14:31 - 16:30)

-Présidents de session: (Coord. A.Korichi, A.Gadea)

time	[id] title	presenter
14:31	[55] Discussion on the Maintenance and production of the present electronics:	
14:46	[57] Report on the status and issues found on the electronics during the last experimental campaign (GANIL)	
15:11	[58] Discussion on the future activities of electronics characterization and performance measurements	
15:36	[59] Communications and discussion on the maintenance of the Phase 0 and early Phase 1 electronics: Issues with the test bench at CSNSM	
16:02	[60] Communications and discussion on the maintenance of the Advanced phase 1 electronics: DIGIOPT12 cards, Control Card, GGP's etc...	

Data Flow and front-End electronics - combined parallel session - Saletta n.1 (17:01 - 18:31)

-Présidents de session: (Coord. A.Korichi, A.Gadea)

time	[id] title	presenter
17:01	[97] participation to the plenary session on NEDA integration	
17:31	[61] Communications and discussion on the production of the new batch of Advanced phase 1 electronics	
17:51	[62] Communications and discussion on the NUMEXO2 and software trigger processors	
18:11	[56] Discussion on the R&D on electronics: Communication and Discussion on the R&D on electronics for 2020 Digitizers –DIGIOPT12, Concentrator, Pre-processing –PACE card, Readout –STARE card-, GTS interface, Firmware. Working Document
