

Sweden's contribution to LISA DPC

vendredi 21 avril 2017 09:25 (25 minutes)

I will present the Swedish interests in the LISA DPC. Our interests split into two parts:

- Calculations of the properties of likely sources and gravitational-wave templates (Rosswog, Church)
- Algorithms for reconstructing spacecraft orbits and attitude and dealing with e.g. micrometeorite hits using experience from GAIA (Hobbs)

Auteur principal: Dr CHURCH, Ross (Lund Observatory)

Orateur: Dr CHURCH, Ross (Lund Observatory)

Classification de Session: Call for contribution
