

Global Scientific coordinator: ???, Global Technical Coordinator ???

Structuration in three tasks (following a proposal by Remii)

1) Tests electronique/electrique

Signal propagation, clock propagation, power consumption etc.

Coordination scientifique ???, Coordination technique: ???

2) Fabrication of long H (or U)

Coordination scientifique ???, Coordination technique: ???

3) Slab long assembly

Tools for assembly, proper assembly including alignment interconnection, gluing onto HV Kapton

Coordination scientifique ???, Coordination technique: ???

- Today:
 - Agreement on these three tasks
 - Are there others, maybe “Quality control and documentation” as e.g. AIDA-2020 deliverable includes Quality Assurance
 - No names
 - Question: Do we need this fine structure of coordinators?
- Next meeting: Set of milestones
