## e-Infrastructures for Science in France and Europe

[Volker.Beckmann@IN2P3.FR](mailto:Volker.Beckmann@IN2P3.FR)

2017年9月8日

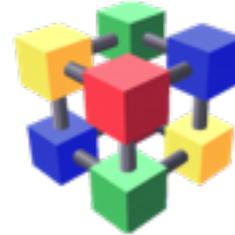

會見中國國家科學院

- [IN2P3](#) computing intensive projects
- IN2P3 infrastructure
- French e-infrastructures
- European view

- [CNRS](#) / [IN2P3](#): 3300 colleagues, [22 labs](#), 400 M€/year

- Particle physics

10% WLCG, future: [Belle-II](#)

- Astroparticle physics

[AMS-2](#), [Planck](#), [Fermi](#), [HESS](#), [Antares](#)

Future: [Euclid](#) (30%), [LSST](#) (50%), [CTA](#), [SVOM](#), [KM3NeT](#)

- Nuclear physics

Future: [Spiral-2](#) / [S<sup>3</sup>](#) @ [GANIL](#)

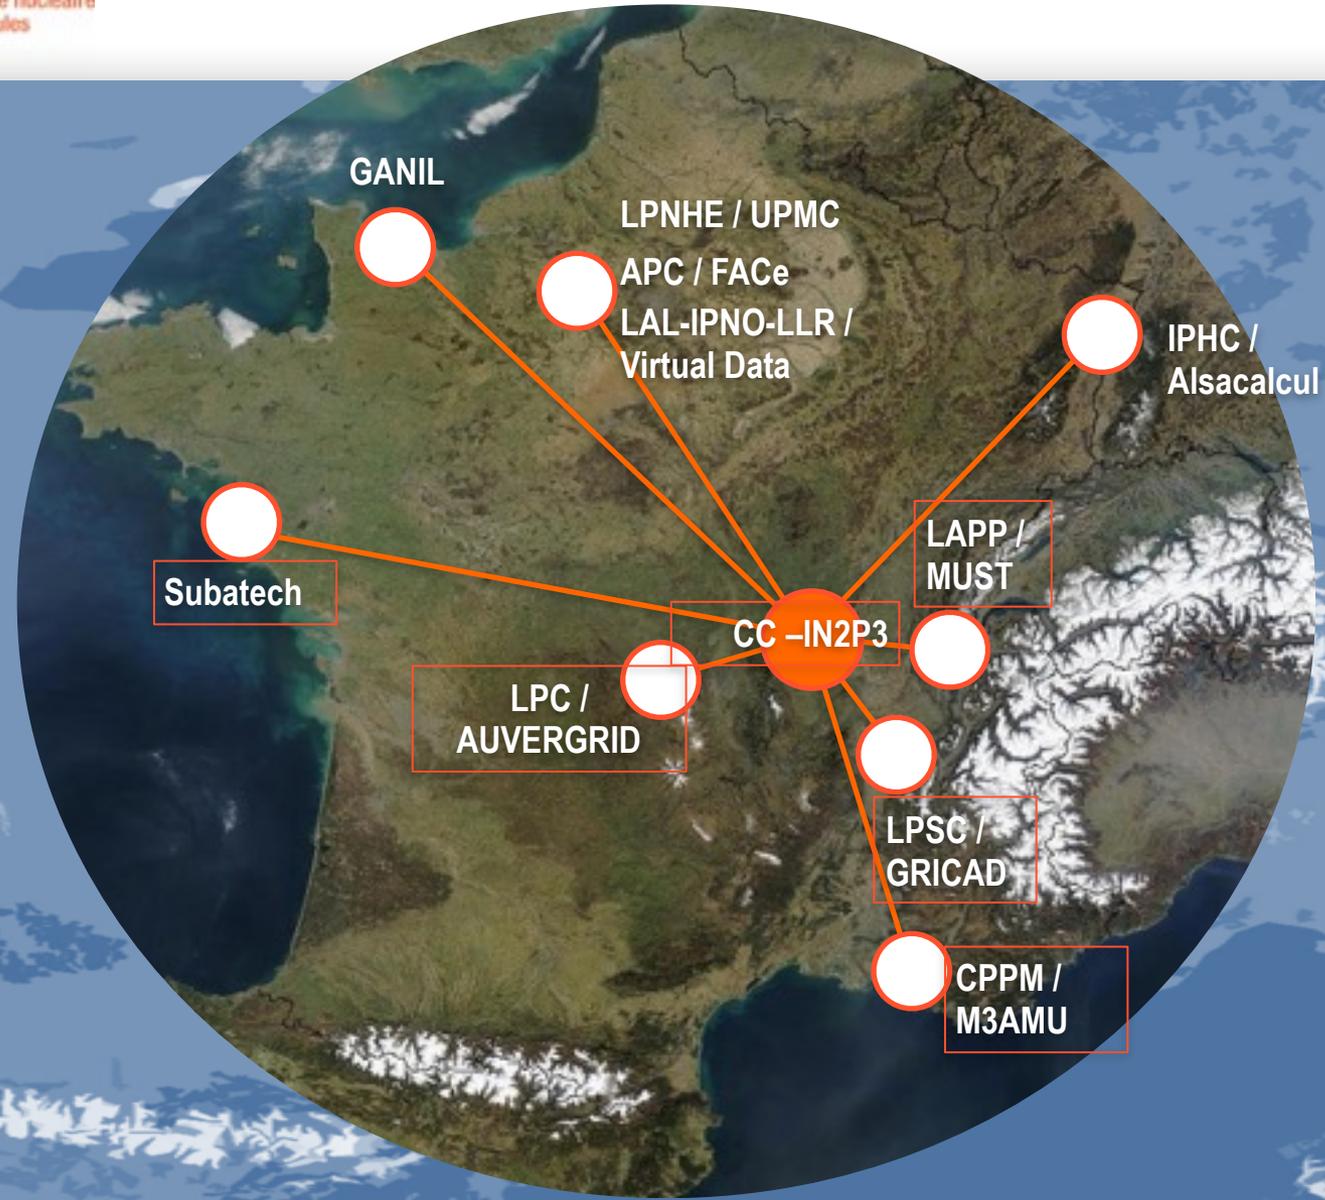

**IN2P3**

institut national de physique nucléaire  
et de physique des particules

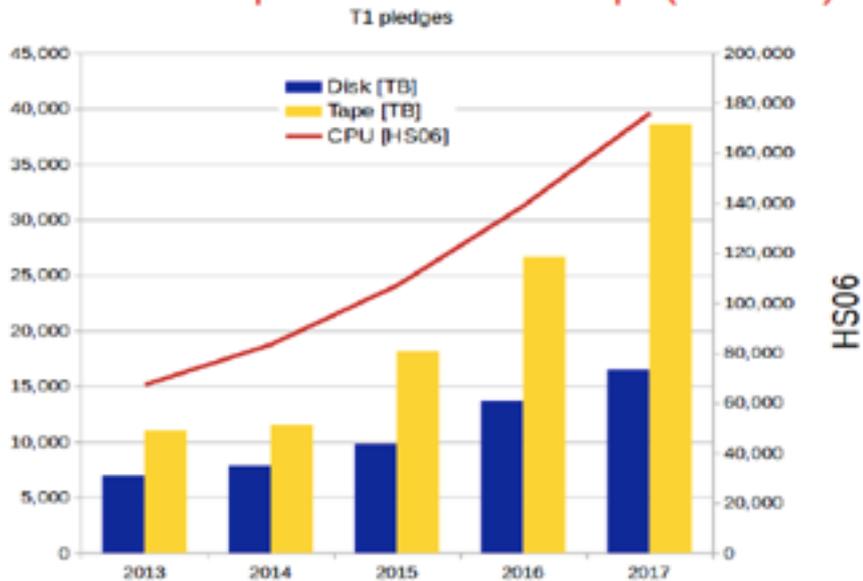

# IN2P3 computing infrastructure

Tier-1 centre (CC-IN2P3 Lyon), 7 Tier-2, 1 site Tier 3, 10% of all WLCG computing

- ~ 35,000 cores, 23 FTE, LCG-France budget (w/o FTE): 2 M€/year
- ~ 1GB/s, 100 TB/day exchange with outside
- connection via [LHCOne](#) and [LHCOPN](#) provided by [RENATER](#)

Participation IN2P3: 100% Tier-1, 70% Tier-2 (rest: regional resources, university, Europe, ...)

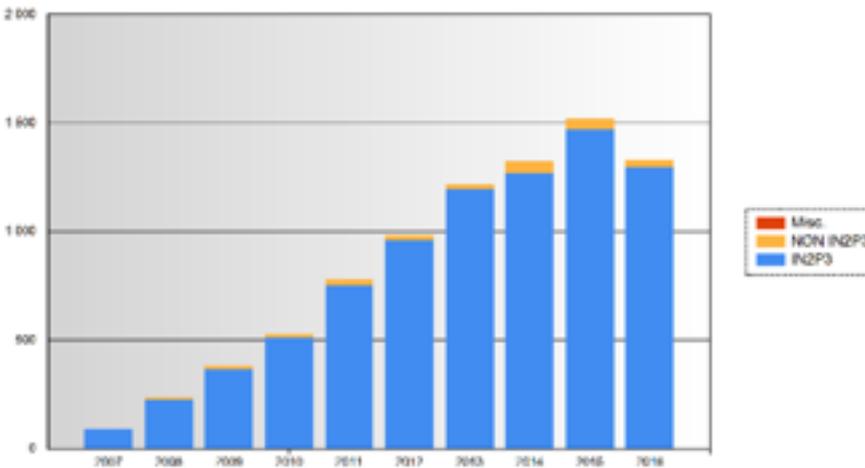

IN2P3

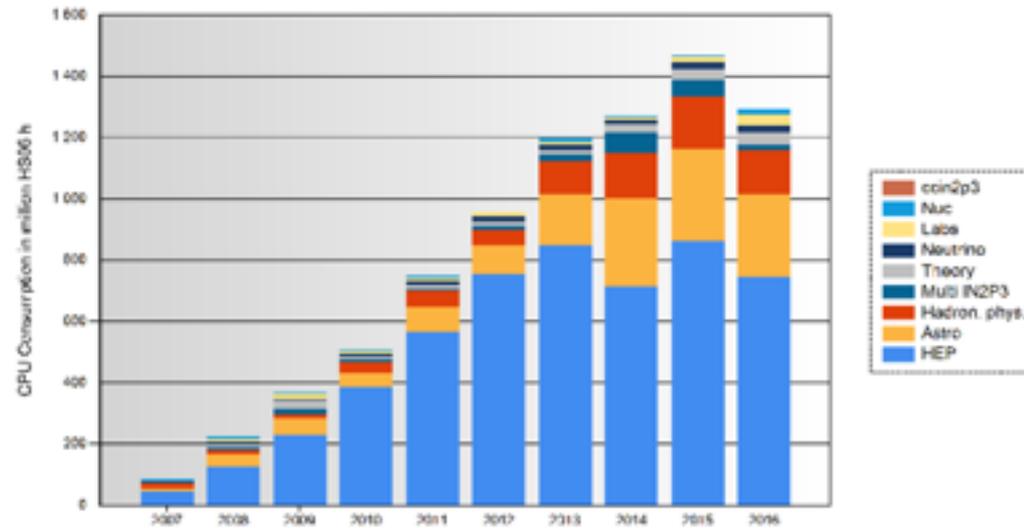

institut national de physique nucléaire  
et de physique des particules

# CC-IN2P3 usage

### CPU Consumption by scientific domain

### IN2P3 CPU Consumption by activity

Atlas

CMS

Alice

LHCb

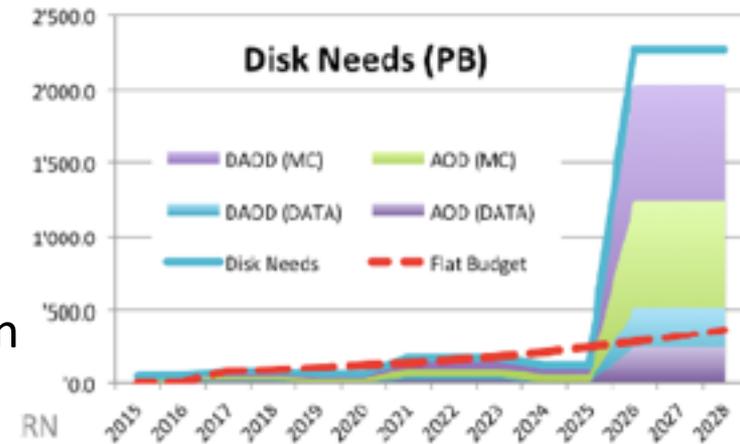

Antares

8/9/2017

Visit of Chinese Academy of Sciences

- LHC Run-3 (and Run-4) !
- Providing resources for other projects:
- Astroparticle physics: CTA, LSST, Euclid, KM3NeT
- Nuclear Physics: Spiral-2, S<sup>3</sup>
- Other domains → CC-IN2P3 as national computing centre
- HTC/HPC, Machine & Deep Learning, ...

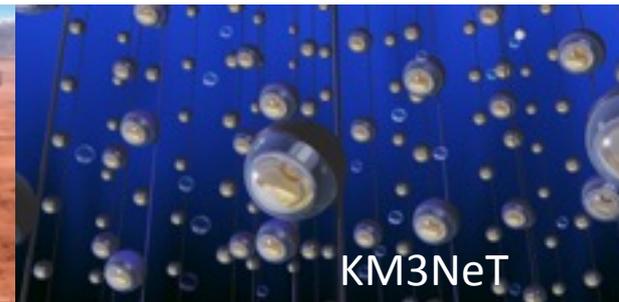

LSST

Spiral-2

CTA

KM3NeT

4 national computing centers:

- [TGCC](#) ([CEA](#)): scalar parallel (Bull B510) → Curie (50% for [PRACE](#))
- [CINES](#): universities: scalar parallel (BullX DLC)
- [IDRIS](#) ([INS2I](#)): massive parallel (IBM Blue Gene/Q) and scalar parallel (IBM x3750-M4)
- [CC-IN2P3](#): *see next presentation*

Accessible to French researchers through open calls

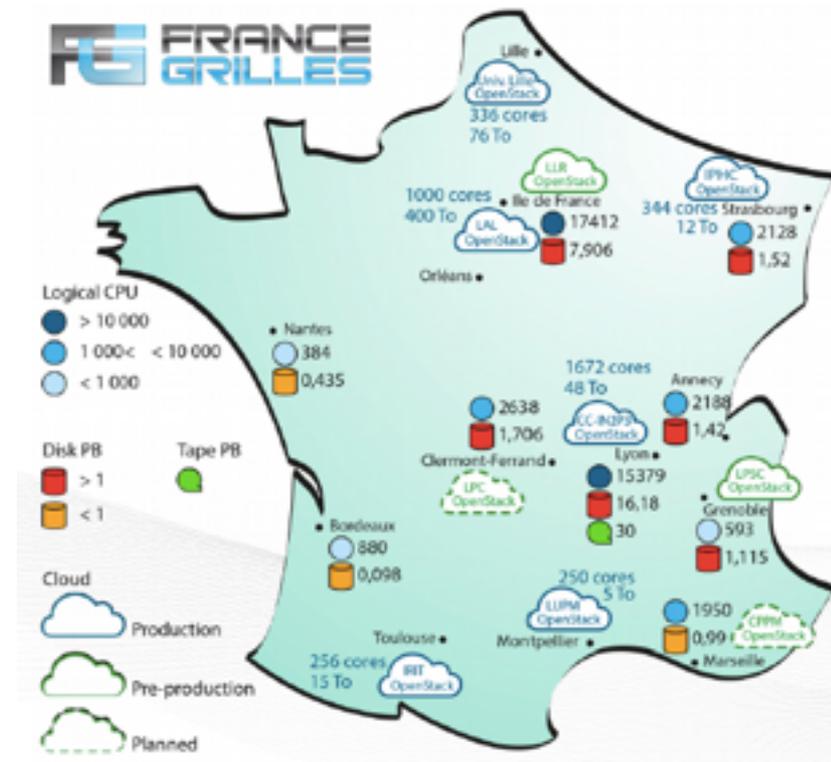

Coordinated by [GENCI](#)

Coordinated by [France Grilles](#):

- Coordinated by IN2P3, with CNRS institutes, other national institutes, [CEA](#), universities, ...
- Cloud: 9 sites, 4,000 cores, 0.6 PByte storage, contributes to European Grid Infrastructure ([EGI](#))
- Grid: 12 sites, 44,000 cores, 32 PByte storage, EGI (3.7 billion hours kHS06)

Mainly a service from the particle physics community for the particle physics community → but evolving

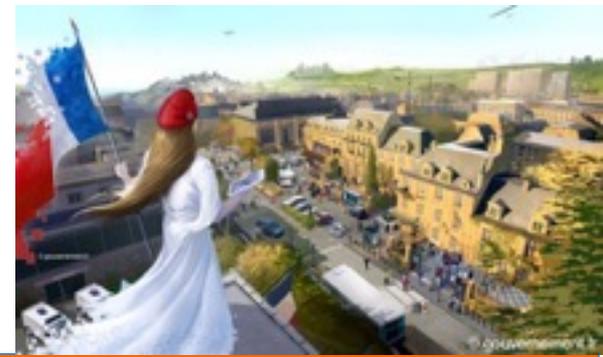

IN2P3

institut national de physique nucléaire  
et de physique des particules

## France

- Several reflection and perspective groups
- French ministry: harmonize infrastructure, HPC + HTC
- TGCC (CEA), CINES (Universities), IDRIS (INS2I), CC-IN2P3
- HPC driven (like EOSC)
- Identify national data center(s)
- Future of French Grid infrastructure (France Grilles)
- French Cloud infrastructure, include regional computing centers (mainly HPC)

Outlook:

- 2017 LCG budget: 2 M€ (15.6 M¥) might *slightly* increase in future)
- Interest to keep Tier-2 in the loop (pledged) on the long term
- Computing infrastructure belongs to IN2P3 (not LCG-France): we need to share
- CTA, LSST, Euclid, (KM3NeT, Spiral-2, S<sup>3</sup>, ...)
- Political landscape: open for new collaborations, explore collaborations with HPC centres
- Re-organize France Grilles infrastructure → Grid & Cloud

- European Union: 28 member states, very diverse landscape
- Computing dominated by Germany, UK, France, Italy, Scandinavia, Spain
- European Commission → [Horizon 2020](#)
- biggest EU Research and Innovation programme ever with nearly €80 billion (¥620 billion CNY) of funding available over 7 years (2014 to 2020)

IN2P3

institut national de physique nucléaire  
et de physique des particules

- Work programs for research infrastructures (incl. e-infrastructures)
- European Open Science Cloud ([EOSC](#))
- Access for all European scientists to e-infrastructures and services
- Connecting existing infrastructures / services

### Challenges:

- Business and governance model
- Different communities, cultures, infrastructures → interoperability

IN2P3

institut national de physique nucléaire  
et de physique des particules

In place

- European Grid Infrastructure ([EGI](#)): portal to grid / cloud resources and related services
- [EUDAT](#): e-infrastructure of integrated data services and resources
- [GÉANT](#): European network service
- ...

- Develop solutions necessary to implement the EOSC idea
- Governance, business model, interoperability (data / infrastructures), ...
- 2017 / 2018, 10 M€ (78 M¥), 33 partners (CNRS, CEA, MPG, STFC, EMBL, EGI, CNR, INFN, ...)
- Gap analysis e-infrastructures
- EOSC e-infrastructure architecture
- 15 use cases ([science demonstrators](#))
- Important input to shape the EOSC

- Integrate services and make them available to all European scientists
- 2018-2020, 30 M€ (230 M¥), 74 partners (CNRS, CEA, MPG, STFC, EMBL, EGI, CNR, INFN, SurfSara, ...)
- Major step in implementing EOSC services

### IN2P3

- Mainly particle physics (WLCG), but astroparticle and nuclear physics catching up
- Infrastructure: CC-IN2P3 + 7 Tier-2 centers, focus on HTC

### France:

- GENCI coordinates access to national computing centers (IDRIS, CINES, TGCC, CC-IN2P3)
- France Grilles: Grid and Cloud infrastructure → evolving
- Include regional centers, link HTC / HPC centers, define national data centers

## EOSC

- Access for researchers to infrastructures and services
- EOSC pilot, EOSC hub, [EC Work Program 2018-2020](#)

## Similar goals on national and European level:

- Facilitate access
- AAls
- Common services
- HTC / HPC, cloud

## WHO IS IT FOR?

**1.7 million**  
researchers

**70 million**  
professionals in science  
and technology

Opening up in the future  
to public services,  
industry and SMEs

Bringing benefits to citizens

€2 BN IN OVERALL HORIZON 2020 FUNDING TO THE EUROPEAN CLOUD INITIATIVE, WITH ESTIMATED ADDITIONAL PUBLIC AND PRIVATE INVESTMENT OF €4.7 BN REQUIRED TO FURTHER DEVELOP THE EUROPEAN DATA INFRASTRUCTURE.
