The Assembly of the Milky Way halo

lundi 26 juillet 2010 17:25 (1 minute)

We present a set of numerical Nbody simulations to investigate the formation of the outer Milky Way's halo through accretion events. The aim is to explore the orbital conditions where a retrograde signal in the outer part of the halo can be obtained in order to give a possible explanation of the observed rotational properties of the Milky Way stellar halo.

Auteur principal: Dr CURIR, Anna (Astronomical Observatory of Turin - Italy)

Co-auteurs: Dr VILLALOBOS, Alvaro (Astronomical Observatory of Trieste - Italy); Mlle POGGIO, Eva (University of Turin -Italy); Dr MURANTE, Giuseppe (Astronomical Observatory of Turin -Italy)

Orateur: Dr CURIR, Anna (Astronomical Observatory of Turin - Italy)

Classification de Session: Poster session

Classification de thématique: Structure Formation & N-body simulations
