Website: <http://gdrintensityfrontier.in2p3.fr/>

Mailing list: GDR-INTENSITYFRONTIER-L@IN2P3.FR

USE THEM AS MUCH AS YOU CAN! 😊

2017

GDR events:

- Kick-off workshop 29-31 March (IHP Paris)
- Intensity Lectures 26-27 October (IHP Paris)

Events supported by the GDR:

- SHIP workshop
- Semileptonic workshops in Orsay

What else is still possible?

***THIS WAS OUR FIRST YEAR. WE HAD TO SETUP THINGS.
WE CLEARLY NEED TO PLAN IN ADVANCE FOR NEXT YEAR.***

Intensity lectures

Let's see how it works, but *if it works nicely, we could make this regular*, having one or two lectures per year.

Please, consider this format when planning/proposing events.

Video of the lectures will be put on our website: will stay as a *GDR-InF scientific production*. It would be great if we could promote them among students/postdocs....

We should in general see ways to get scientific production labeled as GDR-InF.

Proposal for 2018

(From emails, minutes of our last meeting, conversations)

- **Mini-workshop on charmless B decays:** this could have been 2017...still a chance maybe
- **Future experiments:** this, we said we needed to setup today (see Stephane's talk)
- **LHCb upgrade workshop:** with the one before or not?
- **Event in common with GDR neutrino:** we have set it as a priority for 2018 in our last meeting
- **Short review/prospectives on LFUV in B, D, K**
- **Baryonic decays workshop**
- **Strong CP violation workshop:** 2,3 jours, printemps 2018, Grenoble? Avec petit cours d'introduction?
- **What else?**
