## PROOF-based analysis farms for LHC data

*mardi 19 mai 2009 14:30 (25 minutes)*

This talk will give an overview of what is being done around the world regarding PROOF-based infrastructures. Several sites (BNL, Winsconsin, DESY, GSI, ...) have put efforts to find suitable set-ups for the end-user analysis following the experiment requirements and the available hardware. Gerardo Ganis will try to summarize the current status and the lessons learned so far.

**Orateur:** GANIS, Gerardo (CERN)

**Classification de Session:** Computing LHC
