

Welcome, Goals of this workshop

N. Regnault

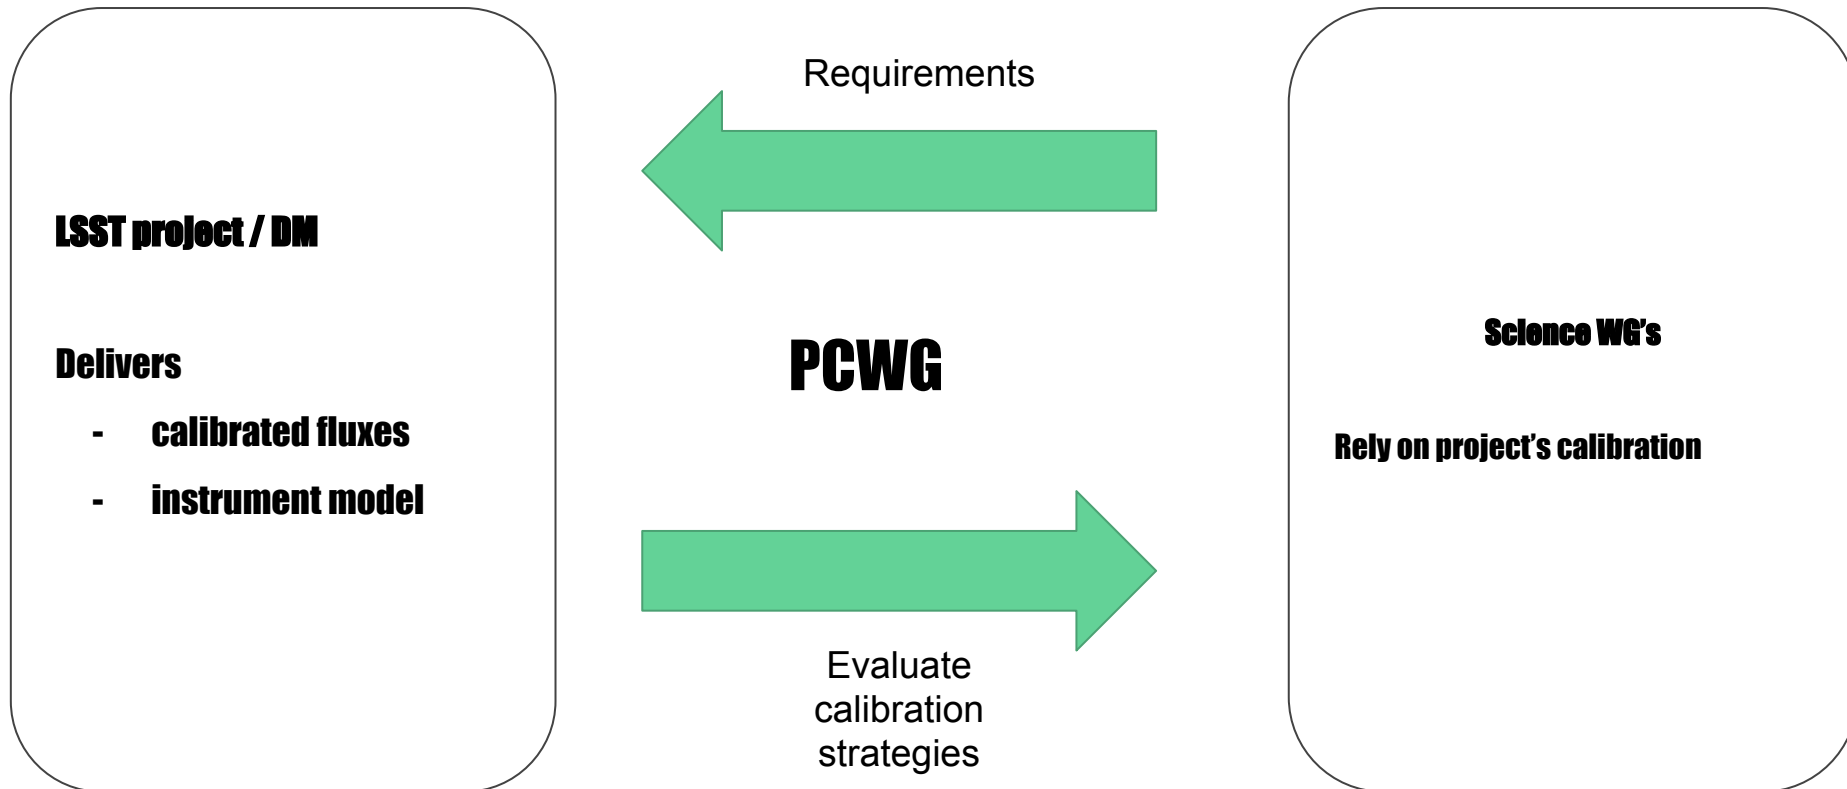

Welcome to Paris !

- 3rd LSST / DESC calibration meeting, after
 - March 2016
 - Feb. 2017meetings at Harvard (thanks Chris !)
- 3 days
 - Day 1 : overview of calibration plans, flux metrology
 - Day 2 : survey uniformity
 - Day 3 : modeling of atmospheric transmission
- Organization
 - Morning : overview talks
 - Afternoon : shorter talks / discussions
 - Note taker / chair : Sebastien (help him !)

PCWG

- Started its activities in 2016
- At the interface between science WG's and Project

Ongoing Projects

- Calibration requirements (from a DESC perspective)

- SN cosmology
- ...

F. Hazenberg et al

- Studies of the flux metrology chain

- Characterization of primary flux references
- Survey uniformization

Stubbs, Lupton et al, Betoule,
Feinstein, Nuss, et al

Feinstein, Cohen-Tanugii, et al
Regnault, Gris et al

- Real time atmospheric transmission

- Comparison atmosphere models
- R&D holographic grisms for the AuxTel
- Work on precursor data

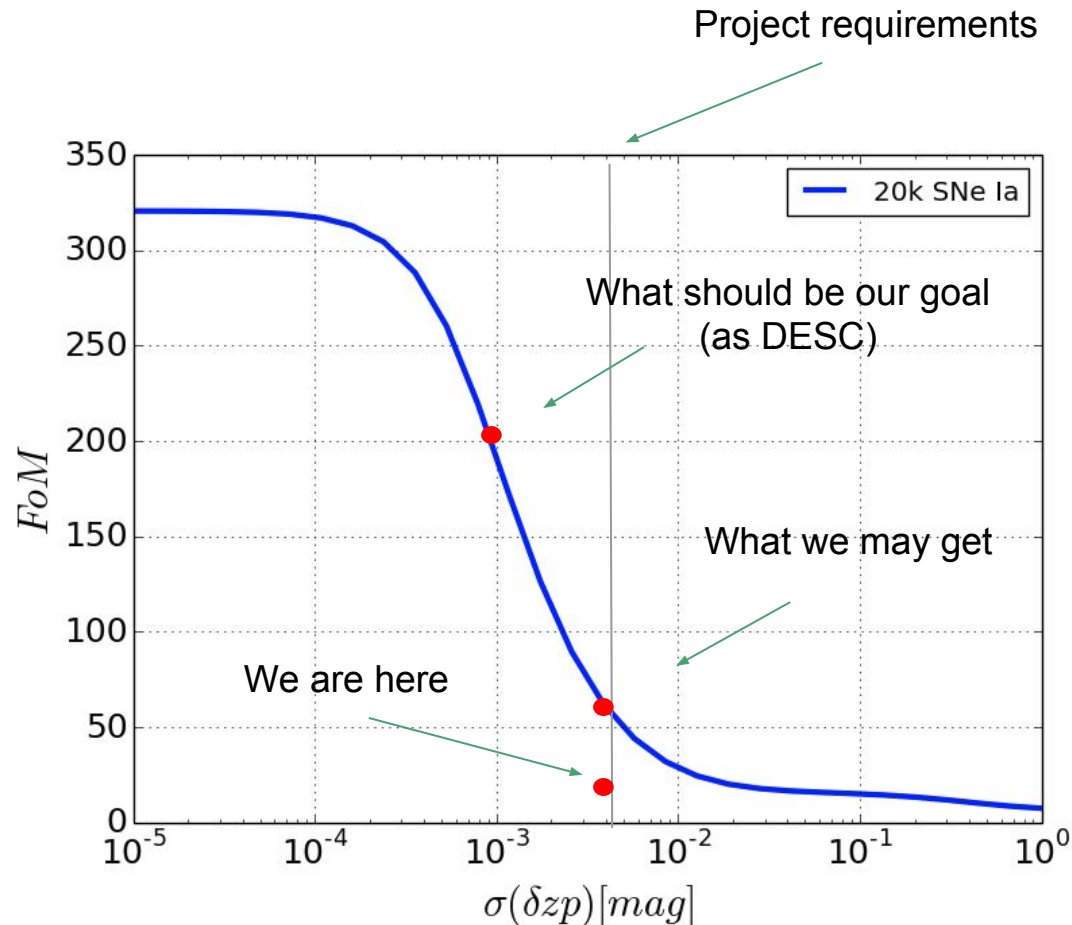

Rykoff et al
Dagoret-Campagne, Moniez,
Gilmore et al
Stubbs, Lupton, Fisher-Levine
et al

- Galactic extinction

E. Rykoff et al

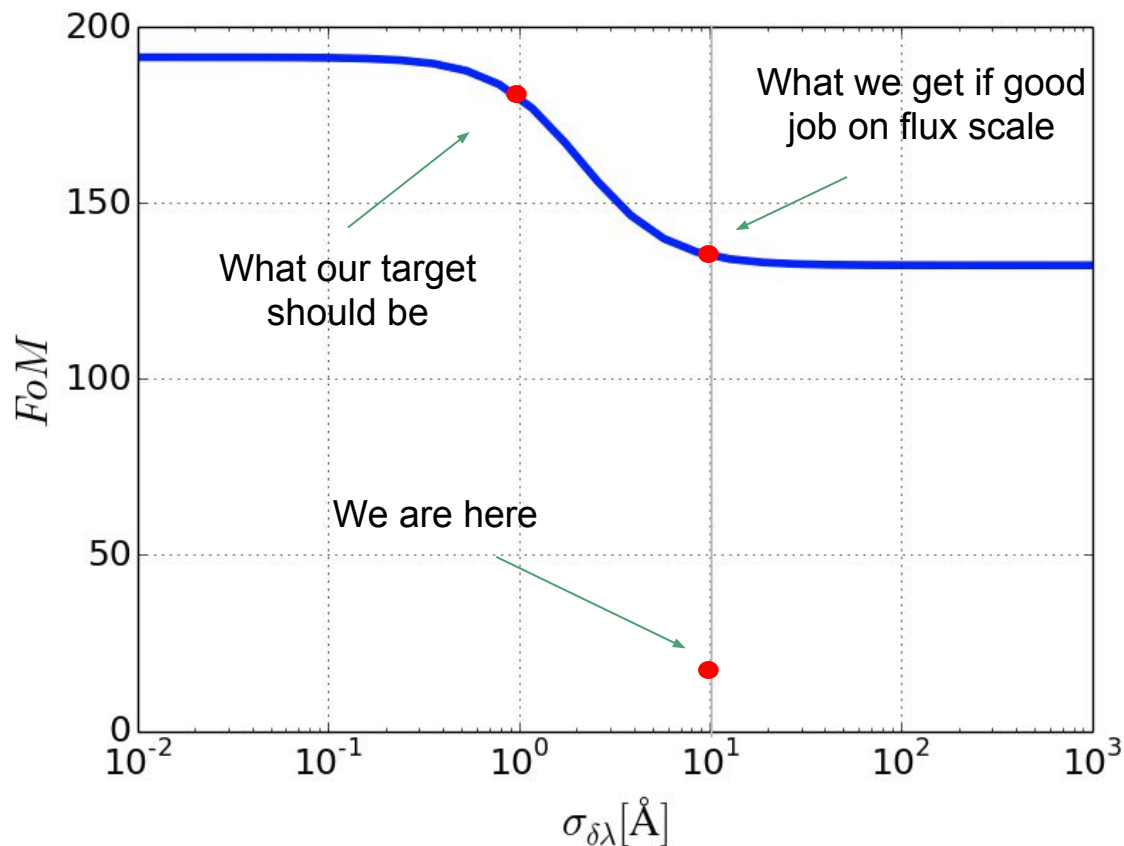

(Relative) flux scale accuracy

(From a SN cosmologist's point of view)

Accuracy of filter cutoff positions

From a SN cosmologist's point of view

Goals of this workshop

- Discuss a strategy for DESC requirements that are beyond Project's requirements,
- Make sure that Project and DESC
 - speak the same language
 - share common goals,
 - work in good coordination (liaisons with Project & DM ?)
- Make sure that DESC / PCWG work
 - helps & complements Project work
