frontier

GDR-InF

WORKING GROUPS CONVENERS MEETING

30 Aout 2018

<http://gdrintensityfrontier.in2p3.fr/>

A 2018 full of events for the GDR-InF!

GDR-InF workshop: The future of the intensity frontier?

Geneve, CERN, February 1-2

GDR-Intensity lectures: "LF(U)V in B decays II"

Paris, IHP, 13th-14th February

The strong CP puzzle and axions (+lectures)

Grenoble, LPSC, 14th-16th May

Workshop on multibody charmless B-hadron decays

Paris, LPNHE, 6th-7th June

Workshop on singly and doubly charmed baryons

• Paris, LPNHE, 26th-27th June

GDR-Intensity Lectures: « Vcb »

Paris, IHP, 2nd-3rd July

GDR-InF annual workshop

Arles, 5th-7th November

***AND The European Strategy For Particle Physics
(document to be submitted tomorrow)***

What's next?

- **TODAY:** we focus on the organization of the general meeting in Arles.
- The organization of the general meeting will certainly require one (or more) meetings in September.
- We will also call for at least one conveners meeting in November to organise next year agenda and make it available by December.

*TIME TO BE CREATIVE
AND
IMPROVE OUR GDR-InF*

Conveners mandate

- At the beginning of the GDR-InF we decided to have conveners appointed for 2.5 years and renewable.
- **Your first mandate end in May 2019.**
- Please let us know by the time of the workshop in Arles:
 - 1) if you want to stay in the role;
 - 2) if you prefer to step down, but are available to stay if we find no replacement;
 - 3) if you want or need to step down.

We will also discuss in the general meeting if we need to re-organise the working groups according to the current needs.

The GDR-InF annual meeting in Arles

If not yet done, **please subscribe ☺ and invite others to come.**

We do not want and need a usual conference-like workshop. We should rather try to answer to some questions: on which subjects people are currently working? Can we setup new collaborations within the GDR-InF? How should we adapt the GDR-InF structures to our needs?

A preliminary idea is on indico description:

The GDR-InF annual workshop will take place in Arles.

In this workshop we will gather together to discuss our current research activities and plan the future ones within the GDR-InF.

Topics will be:

- 1) highlights of the most recent results from the intensity frontier
- 2) presentations of the ongoing work of students and postdocs
- 3) proposal of projects and new collaborations within the GDR-InF
- 4) preparation for the IN2P3 prospectives

The GDR-InF annual meeting in Arles: a proposal for discussion.

1) Highlight of the most recent results from the intensity frontier.

Maybe one theory and one experimental talks from seniors in the GDR-InF?

2) Presentations of the ongoing work of students and postdocs

We could ask to all groups to suggest talks on topics on which students and postdocs are working and build an agenda based on this. It does not need to cover all the field, only things on which people work on.

3) Proposal of projects and new collaborations within the GDR-InF

This is the most tricky and crucial session. The idea is that everyone who want to work on something, even better if new or original, and seeking for collaborators, could briefly present its proposal. This might activate interest in others. The project could start and be supported by the GDR-InF as much as possible in the next years, including technical tools (workspace), one or two meeting depending on money availability, etc... It should be prepared well in advance: we need to send a call to proposal basically now.

4) Preparation for the IN2P3 prospectives

It does not need to be a full session: it can be a round table to comment the document we have sent, and start preparing the IN2P3 prospectives that will arrive sometime in the next year(s). It could also show the results of the survey.

Other ideas...

- We have no money to invite people, external speakers, etc... 😞 Should we still ask Patrice Verdier and/or Reynald to attend?
- Formal invitation of QCD, terascale and neutrino GDRs for exploring connection are also probably difficult to do this time...(although we have members of those GDRs in our GDR)
- Maybe we need an open discussion on the GDR-inF structure (again one our max): we need to split, merge, modify WGs or we can keep them like they are?
- Should we have reports on the workshops held?
- Otherwise...what would you propose?
