## WELCOME IN THE SVOM BURST ADVOCATE TOOL PAGE

**The NAOC / LAL link** is made through a comet broker using pygcn (alert reception, decoding, storage and production of scientific products)

**The Chinese Multi-Messenger Database** is installed on a linux centos server at NAOC. Accessible only with granted access (X.H Han, D. Turpin, C. Wu). O3 data storage.

**The Chinese Multi-Messenger FTP repository** is installed on the same linux centos server at NAOC. Accessible to all the BA community. Storage of all the non text data (plots, files, images, etc.) related to the triggers, OT candidates, galaxy targeted, SVOM GCN and the main softwares used to make those products.

<http://cmm.svom.cn/ftpma/O3/> login: svomgw pass: mmdata

**The BA web interface** is installed on the same linux centos server at NAOC. Accessible to all the SVOM BA registered on the platform. Connected to the CMM DB and FTP to display smoothly the data and allow to make actions (see this afternoon session)
