

Facets of Integrability

samedi 7 novembre 2009

ENS: Edouard Brézin: Gaussian Matrix Model - Salle Dussanne (10:00 - 10:40)

ENS: Paul Wiegmann: Two-Dimensional Gravity and Brownian motion: Schramm-Loewner Evolution (SLE) approach to fluctuating flat surfaces - Salle Dussanne (11:15 - 11:50)

ENS: Philippe Di Francesco: Discrete non-commutative integrability - Salle Dussanne (11:50 - 12:25)

ENS: Giuseppe Mussardo: Topological Quantum Computation. The Art of Computing with the Icosahedral Group - Salle Dussanne (14:30 - 15:05)

ENS: Paul Zinn-Justin: Limiting shapes in the six-vertex model - Salle Dussanne (15:05 - 15:40)

ENS: Yaroslav Pugai: Correlation functions of parafermionic currents and disorder fields in Z_n symmetric Ising models - Salle Dussanne (16:15 - 16:50)

ENS: Vladimir Rittenberg: Shared Information in Stationary States of Stochastic Processes - Salle Dussanne (16:50 - 17:25)
