

Next CAF-user meeting

Frédéric Derue, LPNHE Paris

Calcul ATLAS France (CAF) meeting
CC-IN2P3 Lyon, 1st April 2019

Aim of the workshop

- Annual meeting between CAF and FR ATLAS users, following the november 2018 meeting [[indico](#)]
- Need a report of CAF and S&C activities of the current year (<1 hour)
- Two subjects were already mentionned during the previous meeting
 - Machine Learning : many different related activities in all labs (performance, analysis). Can review activities in order to see possible work in common.
As CAF we are (mostly) interested to ensure they have the right place to do these studies (enough space, cpu and/or gpu), and where to do this (lab, CC, HPC machines)
 - Tracking : Ideas to start performance studies for Run-3 (or HL-LHC), need to reach a critical mass from different labs.
Here also this sounds more as a need of work for Physique ATLAS France, but we can offer part of our CAF-user meeting for this, keeping in mind again that as CAF we have to ensure that physicist have computing/storage to perform these studies

Possible dates (next fall)

- ATLAS meetings
 - ATLAS week, 6-11th Oct
 - ATLAS upgrade week, 11-15th Nov
 - ATLAS S&C, 2-6 deC
 - ATLAS P&P, 9-13 Dec
 - Holidays
 - Toussaint : 19th Oct – 4th Nov (Toussaint)
 - 11th November
- ⇒ let's try to target the last two weeks of November
- 18-22 Nov and 25-29th Nov
 - check if there are some impossibilities to do it in a room at CC
 - make a doodle for these two weeks
 - contact group leaders for them to add each lab possibilities (group leader should check internally that interested people can come – there will be also visioconference)
 - converge for the end of April if possible
