

# atelier Théories de l'action Dark Energy - session 2

mardi 19 novembre 2019 - mardi 19 novembre 2019

Institut Henri Poincaré

## Recueil des résumés

# Contents

|   |   |
|---|---|
| Modified gravity and dark energy in higher-order scalar-tensor theories . . . . .     | 1 |
| The H0 tension . . . . .  | 1 |
| Welcome . . . . .   | 1 |
| Lunch . . . . .   | 1 |
| TBA- Common session to the three groups . . . . .                                     | 1 |
| TBA . . . . .   | 1 |
| Status of the Galileon model from cosmological observations . . . . .                 | 1 |
| The quest for dark energy with LSST . . . . .   | 1 |
| Coffee Break . . . . .  | 2 |
| Frequency variation for in vacuo photon propagation in the Standard-Model Extension . | 2 |
| Testing the equivalence principle on cosmic scales . . . . .                          | 2 |
| General Discussion . . . . .  | 2 |
| Cosmological structure formation with negative mass . . . . .                         | 2 |
| Unveiling the conspiracy of nonstandard cosmology . . . . .                           | 2 |

1

## **Modified gravity and dark energy in higher-order scalar-tensor theories**

2

### **The H0 tension**

3

### **Welcome**

4

### **Lunch**

5

### **TBA- Common session to the three groups**

6

### **TBA**

7

### **Status of the Galileon model from cosmological observations**

8

## **The quest for dark energy with LSST**

**9**

### **Coffee Break**

**10**

## **Frequency variation for in vacuo photon propagation in the Standard-Model Extension**

**11**

## **Testing the equivalence principle on cosmic scales**

**12**

## **General Discussion**

Objectives and future of this group within the Dark Energy action

**13**

## **Cosmological structure formation with negative mass**

**14**

## **Unveiling the conspiracy of nonstandard cosmology**
