Discussion One SAP for all ESFRIs vs. other options

lundi 1 juillet 2019 13:15 (30 minutes)

Each ESFRI may have many use cases. Do we want to have one Science Analysis Platform for all ESFRIs, or do we prefer a SAP framework (SAP-Hub), where each ESFRI has their own SAP instance. Or do we want to have something in between.

Discussion: Plan for contribution and implementation

mercredi 3 juillet 2019 09:00 (1h 45m)

We would like to ask each partner to think about which of the listed services below you would like to contribute to. We would also like to discuss the implementation timeline. This will be used as input for the second deliverable of WP5 D5.2 Detailed Project Plan.

List of identified services:

- Data finding
- Data staging and access
- AAI
- Ingestion of advanced data products
- Batch processing
- List of suggested software/workflows
- List of suggested compute resources
- Interactive processing
- Visualisation tools
- Machine Learning tools
- Research Object Catalogue

Interface with other WPs - plans and coordinations

lundi 1 juillet 2019 14:15 (30 minutes)

- Identify inter-WP coordination group
- Discuss coordination strategy and plan Implementation plans and timeline within each work package is different. We need to discuss and agree on the interface between the different work packages, in order to make the final integration smooth.

Interface from external data portals to ESAP

lundi 1 juillet 2019 13:45 (30 minutes)

Is it planned/desirable to also support the use-case where users search on a web interface of a facility (e.g. <http://archive.eso.org/scienceportal/home>) and then can say 'make data available for analysis in ESAP'?
