

# atelier Théories de l'action Dark Energy - session 1

lundi 20 mai 2019 - lundi 20 mai 2019

IAP

## Recueil des résumés

# Contents

The dark side of the gravity and the acceleration of the universe . . . . .	1
Optimizing growth of structure constraints of modified gravity . . . . .	1
Rotating black holes in higher order gravity theories . . . . .	1
Cosmological cancellation of the vacuum energy density . . . . .	1
Constraints on DHOST: GWs, Vainshtein and cosmology . . . . .	1
The two-body potential in modified gravity . . . . .	1

1

## **The dark side of the gravity and the acceleration of the universe**

**Auteur correspondant** henry@cppm.in2p3.fr

2

## **Optimizing growth of structure constraints of modified gravity**

3

## **Rotating black holes in higher order gravity theories**

**Auteur correspondant** christos.charmousis@th.u-psud.fr

4

## **Cosmological cancellation of the vacuum energy density**

**Auteur correspondant** patrick.valageas@ipht.fr

5

## **Constraints on DHOST: GWs, Vainshtein and cosmology**

6

## **The two-body potential in modified gravity**

**Auteur correspondant** kuntz@cpt.univ-mrs.fr
