

XV Hadron Physics 2020

jeudi 16 septembre 2021

Flash Talks (14:00 - 15:00)

time	[id] title	presenter
14:00	Exclusive photoproduction of quarkonia in ultraperipheral collisions (Haimon Otto Melchior Trebien)	
14:15	Cosmological implications of the QCD phase transition in the Early Universe (Vinícius Simões Aderaldo)	
14:30	Momentum transfer squared dependence of exclusive quarkonia photoproduction in UPCs (Cheryl Henkels de Souza)	
14:45	Electrically charged strange stars with an interacting quark matter equation of state (Lucas Lazzari)	

vendredi 17 septembre 2021

Flash Talks (10:30 - 11:00)

time	[id] title	presenter
10:30	Impact of initial condition characteristics on hybrid simulation models of relativistic heavy-ion collisions (João Picchetti)	
10:45	Fluctuations in the nuclear pasta phase (Mateus Pelicer)
