

# Discussion today

---

- Test beam(s) 2020
- Have to make a beam time request to DESY until 23/9/19, i.e. next Monday
  - => Have to take decision on request today
  - Request for period 17/2/20 – 6/7/20
  - FYI: Second period is 27/7/20 – 20/12/20
  - What is our preferred date? (Opinion R.P.: Not too late in 2020 [March – April?])
  - All DESY Beam lines have telescope (should include in request but signal also if not needed)
- Opportunities for Ecal!?
  - Common data with > 9 layers
    - requires synchronisation/coordination at electronics but also at mechanics level
  - Integration with telescopes
