

Installation du software par LHCb

- La shared area de LHCb (VO_LHCB_SW_DIR) contient que des librairies et il n'y a pas de compilation.
- Environ 55 versions actives pour les différents packages -> espace requis ~ 50GB (actuellement ~ 25GB)
- Le software de LHCb est installé par l'intermédiaire d'un job SAM avec le role=lcgadmin.
- Job lancé à la main une fois par jour.
- Dans le Configuration Service (CS) de Dirac il y a la liste des applications LHCb avec leur version et la plateforme sur laquelle elles tournent (voir snapshot)
- Le sam job download un script (install_project) et à partir de cette liste :
 - il installe des éventuelles nouvelles versions
 - il interroge le CS pour savoir s'il y a des versions obsolètes à enlever et libérer ainsi de l'espace dans la shared area
 - il vérifie que les permissions dans la shared area sont correctes

LHCb n'a pas observé jusqu'à présent des problèmes d'accès à la shared area
