Sonder les infinis : des particules au cosmos

A large, colorful nebula dominates the right side of the slide. Overlaid on the left side are several sets of thin, glowing lines of various colors (yellow, orange, red) that converge towards a central point, resembling particle tracks or light rays emanating from a source.

1 proposal, *EUR 40.9 million*

INFRAEOSC-07-2020 (RIA): Increasing the service offer of the EOSC Portal, 6 service areas, at least one funded project per area

- (a1) Distributed and cloud computing resources, EUR 8 million [[EGI](#)]**
- (a2) Data services, EUR 7 million [[EUDAT](#)]**
- (a3) Services supporting scholarly communication and open access, EUR 4 million [[OpenAIRE](#)]**
- (a4) Above the net services, EUR 2 million**
- (a5) Services and resources from non-research public sector data providers, EUR 1 million**
- (a6) Additional research enabling services, EUR 2 million**

Nouveau: les coûts opérationnels sont éligibles au financement

# INFRAEOSC-03

Consolidate and scale up the [EOSC Portal](#) and its underlying service platform in order to:

1. Strengthen the [EOSC Portal](#) so that it continues to provide an increasing portfolio of high quality standard compliant and interoperable services of proven user interest and scientific relevance from a wide range of national, regional and institutional public research infrastructures in Europe as well as from commercial service providers in its catalogue
2. Reinforce the role of the marketplace as the access channel to integrated, composable and reliable services
3. Attract more users, within the research community and beyond, by enhancing the user experience and seamlessly accommodating their needs
4. Ensure its long-term sustainability taking into account all the relevant governance and business frameworks

Leveraging developments of [EOSC-hub](#) and other EU funded projects:  
INFRAEOSC-06-2019 (a), INFRAEOSC-05-2018 (a), INFRAEOSC-04-2018 and other relevant EU funded projects and initiatives

# INFRAEOSC-03 Scope

- (A) Operation, maintenance and enhancement of the [EOSC Portal](#) (the website, the catalogue of services and the marketplace)
- (B) Fostering and enabling secure service composability
- (C) User enhanced experience using Artificial Intelligence (AI) techniques
- (D) Widening the EOSC user base
- (E) Widening the service offer with commercial services
- (F) Support Activities

# INFRAEOSC-07 A1

INFRAEOSC-07: “Increasing the service offer of the EOSC portal”  
“provide a catalogue that increasingly meets the researchers’ needs covering the full research life cycle”

1. long term provisioning of infrastructure capacity available in an on-demand
2. EGI IaaS, PaaS and SaaS services
3. Integration of EGI external portfolio with EOSC national projects-support capabilities
4. Integration with other e-Infrastructure services

**(a1) Distributed and cloud computing resources** enabling researchers and other users to process and analyse data in a distributed computing environment. The services should include, but not be limited to, running virtual machines on demand with complete control over computing services, executing compute and data-intensive workloads, analysing large datasets and executing parallel computing tasks, utilizing large amount of processing capacity over long periods of time, sharing resources and enabling collaborative research.

# EOSC, financement

Jean-Claude Burgelman (DG-RTD):

Phase 1, until end of 2020:

- Commision will invest **EUR 300 million to support the core functions** of the EOSC as per milestones
- Member States would flag the **national initiatives that they want to federate into the EOSC** (e.g. the work of the [Helmholtz Data Alliance](#)); and the **resources they are willing to provide in kind**
- Research funders would start making **costs eligible for FAIR\*** data only

Phase 2, after 2020:

- To explore a mix of funding including possibly deposit fees from national funders
- Based on a full cost estimate for the running of the EOSC, conducted by the EOSC governance framework in Phase 1
