

First step in data modelling

- How to find a good data model for description of KM3Net data the project want to expose ?
 - ML/FB exposed ObsCore
 - KM3Net have « events » they want to expose but dependant from scientific goals
 - To be related to probability maps
 - ObsCore not really adapted.
 - TAP service + DataLink could help
- How to use provenance DM in relationship with CWL managed workflow
 - To be followed up with CTA people
