Hanoi ACGRID-II school on Advanced Computing and GRID Technologies for Research

lundi 21 septembre 2009 - vendredi 2 octobre 2009

Institut de la Francophonie pour l'Informatique

Programme Scientifique

The ACGRID school will run for two weeks.

The first week targets grid users while the second week will target administrators of grid nodes. During the first week, trainees will learn how to use services and functionalities made available on a grid infrastructure, how to deploy scientifi applications and how to use workflow engines and portals for a transparent access to the grid resources.

During the second week, trainees will learn how to install a User Interface, Computing and Storages Elements, Worker Nodes and a site BDII and how to maintain grid services and have them certified
