Sonder les infinis : des particules au cosmos

A large, horizontal image occupies the center of the slide. It features a dark, star-filled space background. On the left side, several curved, glowing lines in shades of yellow, orange, and red represent particle trajectories. These lines originate from small, bright blue dots and curve upwards and outwards. On the right side, there is a large, colorful nebula with swirling patterns of orange, yellow, green, and purple.

Country Sheet

[Please insert country's name, e.g. Austria]

France

Current policy¹ on open and FAIR science

1. Is there a current policy on open and FAIR science in place? [Please answer by adding a (x) in the appropriate cell.]

Yes	No	In planning
X		

Responsibility regarding policy making (strategic level): [Please detail the current policy in the country concerned. Please add the responsibility at national level. Please also add the ongoing preparation (plan) if no current policy is in place or if updates are expected. Max. ≈ 150 words]

Policy based on the [loi numerique](#) (2016), which lays the foundation for Open Science in France. The MESRI ministry presented in July 2018 the national strategy for open science ([Plan national pour la science ouverte](#)). This strategy includes a list of specific actions and recommendations in order to boost the development towards an Open Science landscape in France. This includes, but is not limited to, the requirement that data resulting from publicly funded projects have to be open, to work towards Open Access publications, to increase the knowledge about Open Science especially among PhD students, to contribute to the EOSC and to join GO-FAIR. To help with the implementation of this strategy, France joined GO FAIR and created the Open Science Committee ([Comité pour la science ouverte](#)), which includes representatives from the ministry and from all relevant national research organisations and universities.

Responsibility regarding funding (supporting open and FAIR science in practice): [Please detail the current funding mechanisms in the country concerned. Please add the responsibility at national level. Please also add the ongoing preparation (plan) if no current funding policy is in

Opening: 19.11.2019, Deadline: 22.4.2020

INFRAEOSC-03-2020 (RIA*): Integration and consolidation of the existing pan-European access mechanism to public research infrastructures and commercial services through the EOSC Portal

1 proposal, *EUR 40.9 million [[Technopolis](#) + [ESFRI clusters](#) + ...]*

INFRAEOSC-07-2020 (RIA): Increasing the service offer of the EOSC Portal, 6 service areas, at least one funded project per area

(a1) Distributed and cloud computing resources, EUR 8 million [[EGI](#)] →
discussion of proposal core team 6.11.

(a2) Data services, EUR 7 million [[EUDAT](#)]

(a3) Services supporting scholarly communication and open access, EUR 4 million [[OpenAire](#)]

(a4) Above the net services, EUR 2 million

(a5) Services and resources from non-research public sector data providers, EUR 1 million

(a6) Additional research enabling services, EUR 2 million

*RIA: [Research and Innovation Action](#)

INFRAEOSC-07 A1

INFRAEOSC-07: “Increasing the service offer of the EOSC portal”
“provide a catalogue that increasingly meets the researchers’ needs covering the full research life cycle”

1. long term provisioning of infrastructure capacity available in an on-demand
2. EGI IaaS, PaaS and SaaS services
3. Integration of EGI external portfolio with EOSC national projects-support capabilities
4. Integration with other e-Infrastructure services

(a1) Distributed and cloud computing resources enabling researchers and other users to process and analyse data in a distributed computing environment. The services should include, but not be limited to, running virtual machines on demand with complete control over computing services, executing compute and data-intensive workloads, analysing large datasets and executing parallel computing tasks, utilizing large amount of processing capacity over long periods of time, sharing resources and enabling collaborative research.

Journée EOSC au CNRS

- 22 janvier 2020
- Avec Alain Schuhl, Laurent Crouzet, Jean-François Abramatic (EOSC Executive Board)
- Auditorium Marie Curie
- site Internet: <https://indico.in2p3.fr/e/CNRS-EOSC>
- agenda préliminaire

Important:

- annoncez la date / lieu
- invitations

implication et vision pour EOSC dans les instituts du CNRS

- Discussion avec 5 instituts, 2 prévus cette semaine, 1 input e-mail
- INEE (Sylvain Lamare) ?
- peu de connaissances sur l'EOSC (et FAIR !) au niveau du laboratoire

Besoin:

- FAIR data
- Repositories
- solutions durables (services!)
- Infrastructures (INSU, IN2P3)

Résultats:

Grille participation EOSC

Prochaines étapes:

- Finaliser discussions
- Document résumant les résultats (fin 2019)

Dates importants:

- 20.12.2019: Deadline for submission of Expressions of Interest INFRAEOSC-07 A1
- 3./4.2.2020: Presentation / Discussion of selected applications (finalised by end of February)
- 22.1.2020: journée EOSC au CNRS

Nouvelles de EOSC
