2024 CEPC EU Edition Workshop

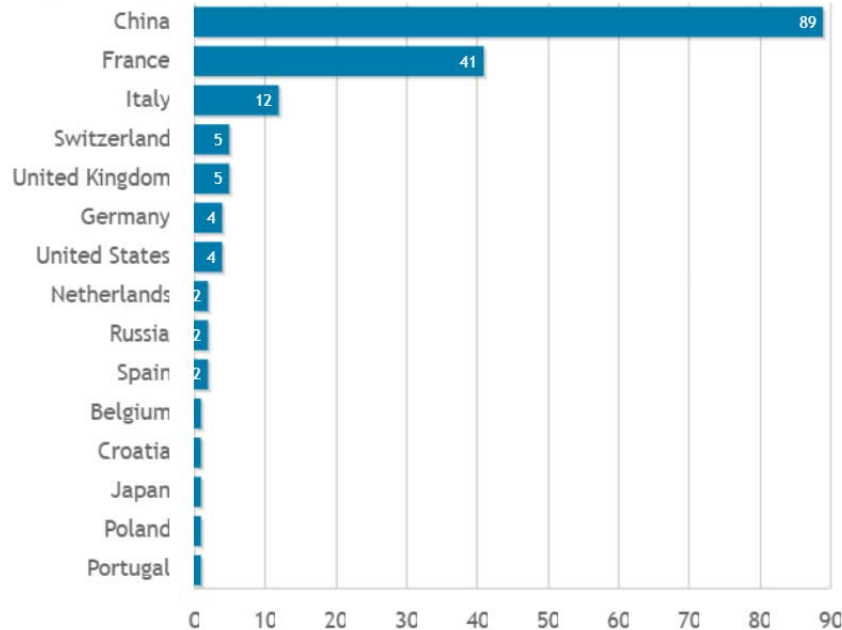

What we've managed to accomplish together isn't bad at all! 😊

99 high-quality TALKS were delivered!

- 10 Plenary
- 89 Parallel
 - 30 ACC
 - 31 DET
 - 17 TH
 - 6 PERF
 - 5 MDI

2024 CEPC EU Edition Workshop

What we've managed to accomplish together isn't bad at all! 😊

Two cents of an ageing (& gentle dreamer?) physicist not afraid of being ridiculed...

We could do more in the years to come for the benefit of our international community (*note the singular form*) and at our humble level for humanity in general:

- Science is universal and does not know boundaries
- Wisdom supposedly distinguishes us from the rest of the animal kingdom. Shouldn't be nice to use this wisdom spending our time and efforts working together in a collaborative way, and not wasting them trying to individually mark our territory? We would be be able to achieve so much more!
- For the future of our field, how about considering a consensual worldwide long-term strategy discussed in a competitive but cooperative and collaborative way (*coopetition, in the words of M. Spiro speaking about how particle physics works*) taking into account scientific goals, but also diversity, specificities and aspirations of all players in the international community.

Let's make the future together!

2024 CEPC EU Edition Workshop

To capitalize and bring to fruition all the work done for and during the workshop, the ideas exchanged, etc..

- What messages should we take home?
- What follow-up actions should we take until the next Workshop?
For instance:
 - Take the opportunity of the ECFA DRD to strengthen our collaborations: eventually could become the seed of experiments at future colliders
 - Invite companies to the next workshops for networking and interest them to our needs in terms of R&D and later production.
 - Take the opportunity of the ECFA Physics focus study to work together; improve communication; collaborate on new reconstruction ideas and algorithms...

2024 CEPC EU Edition Workshop

- **Great thanks to the SPC**, for putting together a really interesting scientific program for this Workshop!
- **Great thanks to the conveners**, for managing the contents and the running of their sessions!
- **Great thanks to the speakers**, for their awesome quality talks!
- **Great thanks to the participants**, for attending the workshop so numerous, for all their questions, for the discussions they triggered during the sessions and at coffee and lunch breaks, *making exchanges very lively, interesting and friendly!*
- **Great thanks to the local organizing committee** (Angélique, Brigitte and Paola; Christian, Grigorii and Leonardo) for preparing and running the logistics!
Great thanks to IHEP (Fen, Gang and Yaru) for their help!

2024 CEPC EU Edition Workshop

- **It was a real pleasure to have you all here**
Hope you enjoyed the Workshop and Marseille!
- **Looking forward to attending the next one! 😊**
- **Do not forget to take your lunch box 😊**
and have a nice and safe trip back home!
