Composition de l'Equipe

- **1 post-doctorants present: [Prénom, Nom, indiquer projet, origine financement, date de début, date de fin]**

Hamada Yuta ERC Advanced Grant, 9/2019-9/2020

- **Autre post-doctorants 2017-2019: [Prénom, Nom, indiquer projet, origine financement, date de début, date de fin]**

Abbar Sajad	Neutrino Flavor Conversion in SN	IN2P3	Oct 2017	Oct 2019
Witkowski Lukas	SM-GRAV	ERC Advanced	Sept 2016	Sept 2019
Davide Forcella, SM-GRAV, ERC Advanced Grant, 10/2017-1/2019				
Andrei Belokogne ,QFT espace temps courbes, Université de Corse, sept. 2017- sept. 2018				
Marcela Cardenas, black hole thermodynamics, bourse chilienne, Avril 2017-Avril 2019				
Nelson Merino, Conserved charges in gravity theories, bourse chilienne, Mai 2016-Mai 2018				
Nicola Tamanini, Gravitational wave standard sirens, Labex P2IO and Euroltalent fellowship, 15/09/2015 - 14/09/2017				

- **4 post-doctorants expected fall 2020: [Prénom, Nom, indiquer projet, origine financement, date de début, date de fin]**

Panagiotis Betzios	ERC Advanced Grant,	09/2020-09/2021
Alberto Mangiagli	IN2P3	10/2020-10/2022
Alberto Roper Pol	ANR	10/2020-10/2022
Marius Ramsoy	ANR	10/2020-10/2022
•		

Composition de l'Equipe

- **8 Doctorants: [Prénom, Nom, indiquer sujet, origine financement, directeur, codirection, cotutelle, date de début, date de fin]**

Auclair Pierre	Cosmology with Gravitational Waves	EPolytechnique	Daniele Steer/ Chiara Caprini	Oct 2018 Oct 2021
Bouyahiaoui Makarim	Models of multi-messenger sources of cosmic-rays, gamma-rays and neutrinos	Paris7	Dmitri Semikoz	Oct 2018 Oct 2021
Gatelet Yoann	Multimessenger astrophysics with Neutrinos	Paris 7	A.Neronov	Oct 2019 Oct 2022
Jani Kastikainen	Holography	cotutelle Helsinki	F.Nitti	Apr 2020 up to 2022
Korochkin Alexander	Gamma-ray astronomy	Vernadskii cotutelle Russie	Dmitri Semikoz G.Rubtsov	Oct 2018 Oct 2021
Moreau Gabriel	Champs quantiques en espace-temps courbe	Paris 7	Julien Serreau	Oct 2017 Oct 2020
Papanikolaou Theodoros	Constraining the early Universe with Primordial BH	Paris7	Vincent Vennin /D.Langlois	Oct 2018 Oct 2021
ROUSSILLE, Hugo	Modified gravity models	ENS Ulm	D.Langlois	Oct 2019 Oct 2022`

- **Expected/possible Doctorants Sept-Oct 2020: [Prénom, Nom, indiquer sujet, origine financement, directeur, codirection, cotutelle, date de début, date de fin]**

Edwan Préau (PhD Student, Kiritsis)	Sept 2020
Valentin Nourry (Phd Student, Nitti)	Sept 2020
??? (PhD student, Vennin), co-tutelle with Orsay.	Sept 2020

Activités de l'Equipe

• Enseignement

- E.Huguet Enseignement U. Paris Diderot: 192 heure/an ;
- J.Mourad Enseignement U. Paris Diderot: 192 heure/an ;
- A.Neronov Enseignement U. Paris Diderot: 192 heure/an ;
- F.Nitti Enseignement U. Paris Diderot: 192 heure/an ;
- J.Serreau Enseignement U. Paris Diderot: 192 heure/an ;
- D.Steer Enseignement U. Paris Diderot: 192 heure/an ; /invited lectures at a Portuguese university [``National Encounter of Physics Students" of Portugal, Lisbon, february 2019], cours pour l'école doctorale STEP UP (2018)"
- G-P. Gazeau Cours de 3 semaines à Tehran (Institute for Research in Fundamental Sciences) Septembre 2017, Tools for Signal Analysis and Quantum Physics // Cours de 3 semaines à ICTP Kigali, Master 1, Mars 2019, Special relativity for advanced electromagnetism // Cours de 2 semaines à université de Rabat, Juillet 2019, Coherent states in quantum optics
- Ch.Caprini "Gravitational waves", lectures for the Annual Retreat of the University of Mainz, Mainz (Germany), Sep 2017
- E.Kirisis / 150 hours of university level courses
- M. Lachièze-Rey/ Enseignement au master LOPHIS (Univ Paris Diderot)
- D.Langlois Enseignement dans le M2 physique des hautes énergies à l'Ecole polytechnique
- D.Semikoz Cosmavia Inst. lectures Astroparticle Physics M2 /2016-2019 // Baikal summer school 2018
- V.Vennin 2018 and 2019: Lecturer in the Euclid collaboration summer school
2020: Cosmology course of the Theoretical Physics master 2 at ENS Paris
- C.Volpe Cours à Ecole Polytechnique (depuis 2019-) et à IAP (2019), cours pour l'école doctorale STEP UP (2018).

Activités de l'Equipe

-
- **Participations à la communication 2017-2019**
 - 24 talks/ Ch.Caprini
 - 12 talks / N.Deruelle
 - 17 talks/ G-P Gazeau
 - 43 talks / E.Kirisis
 - 50 talks/ M. Lachièze-Rey
 - 25 talks/ D.Langlois
 - 12 talks /A.Neronov
 - 18 talks/ D.Semikoz
 - 15 talks /J.Serreau
 - 13 talks /D.Steer
 - 29 talks/ V.Vennin
 - 14 talks/M.C. Volpe

Activités de l'Equipe

• Participations à la vulgarisation

- Ch.Caprini "Ondes gravitationnelles", seminar for high-school students, Lycee Albert Schweitzer, Le Raincy (France), 2017 // "Gravitation, Virgo et trous noirs", Bar de Sciences, Paris 2017
- N.Deruelle 2 books+second edition "Les ondes gravitationnelles", ND et Jean-Pierre Lasota, Odile Jacob, Février 2018 // "Relativity in Modern Physics", ND et JP Uzan, traduction anglaise de "Théories de la Relativité", Oxford University Press, août 2018 "Théories de la Relativité", ND et Jean-Philippe Uzan, Seconde Edition revue et augmentée, Belin 2019
- E.Huguet Conference grand public « Qu'est ce que l'espace temps », mars 2019, Paris
- E.Kirisis 2 popular physics presentations
- F.Nitti: Responsable Physique de la Fête de la Science et Journées Portes Ouvertes (2016-2018)/ Organisation d'ateliers interdisciplinaires pour les lycéens (depuis 2015)/ Comité de redaction site web UFR physique U. Paris Diderot
- D.Semikoz popular lecture at Moscow High-Economics School on 'Modern Astrophysics'
- J.Serreau exposé grand public à la journée "Physique quantique, physique magique", association Fêtes le Savoir
- D.Steer presentation to school children at CERN (2018)
- V.Vennin 2018 and 2019: School workshop (age 13-14) at "collège Evariste Galois", France
2018: Radio show "La méthode scientifique", France Culture
2020: enseignement dans l'Université Ouverte de Paris Université
2019: Radio show "La méthode scientifique", France Culture
2019: High school conference (age 16-18), "Demain la Terre", organised by Paris Diderot University
2019: Interview for the "Causa Mundi" think tank
- C.Volpe Interventions dans une classe de CM2 (2h) pour presenter "Comment "meurent" les supernovae ?

Activités de l'Equipe

Responsabilités hors projets (laboratoire, université, sites, comités, ..)

Ch.Caprini, Coordinator of the Science Investigation Work Package of the LISA Science Group
Member of the Groupe thématique “Astroparticle physics” for the prospective 2020-2030 of the in2p3
Member of the Astronomy Working Group of the European Space Agency,
Member of the Groupe de Travail Physique Fondamentale of the French Space Agency CNES
Member of the Advisory Board of the Mainz Institute for Theoretical Physics

Director of the Groupement de Recherche Ondes Gravitationnelles of CNRS IN2P3, since 2017 (200 members)

N.Deruelle membre du Conseil Scientifique du CNRS 2017-2018

J-P.Gazeau Honorary member of the Standing Committee of the International Colloquium on Group Theoretical Methods in Physics (ICGTMP) (2015-) Member of the European Science Foundation College of Expert Reviewers // Member of the Selection Committee for the Wigner Medal (2018-2020), and Chairman for 2018

E.Huguet Responsable adjoint du groupe Theorie

E.Kirisis Membre Conseil du laboratoire APC, Before 2019 deputy chair of the European Physical Society, High Energy Physics Board.

D.Langlois Member of the ERC Panel 9 for Consolidator Grants (2012-2018)

/ Président de comité HCERES (CPHT Polytechnique)

/Membre commission de recrutement du département de physique de l'Ecole polytechnique

F.Nitti Directeur adjoint UFR Physique U. Paris Diderot/ Responsable Locaux et logistique Batiment Condorcet

D.Semikoz Responsable du groupe Theorie

J.Serreau membre du CNU depuis 2015, comité de sélection de l'ED STEP-UP (pour les bourses doctorales)

D.Steer member of CNU. Member of different university councils, including the teaching comité (CENS)
/ convener Cosmology group *GdR “Ondes Gravitationnelles”*

V.Vennin Membre du conseil de laboratoire de l'APC / Comité de suivi de these de Pierre Augier (APC)

/ convener Cosmology group *GdR “Ondes Gravitationnelles”*

C.Volpe Responsable du groupe Théorie de APC up to 2017, Membre du comité Editorial pour Journal Of Physics G, Membre du Conseil Scientifique APC, Membre du conseil de la FRIF (depuis 2015), convener du GDR Neutrino

Activités de l'Equipe

• Organisations d'écoles, de workshops, conférences, .. (2017-2019)

• APC

COSMO17 200 participants

“infrared QCD”, nov 8-10 2017, 20 participants

The Universe as a Quantum Lab (September 2018, 75 participants)

Assemblée Générale of the GdR in APC October 2018 200 participants

Galactic Cosmic Rays (December 2018) 70 participants

S.low.SUGRA meeting (March 2019)

Paris Primordial Cosmology Meetings (3 meetings per year)

colloque Jean Marie Souriau, Univ. Paris Diderot, mai 2019

APC -Perimeter-Brussels conference "Cosmological Frontiers in Fundamental Physics", APC, May 2020, \\\

• Autre

-2017 European Physical Society Conference on High Energy Physics ``EPSHEP 2017 », 5-12 juillet, 2017 at Venice, Italy

- ``9th Crete Regional Meeting on String Theory", 10-15 July 2017, Kolymbari, Crete.
- ``GRAVITY, COSMOLOGY \& PHYSICS BEYOND THE STANDARD MODEL", 11-15 June 2018, Paris, France.
- Perimeter-Brussels-APC conference "Cosmological Frontiers in Fundamental Physics", Brussels, 14-16 May 2018, \\

Activités de l'Equipe

• Organisations d'écoles, de workshops, conférences, .. (2017-2019)

- V.Vennin
 - from 2017? PPCM (Paris Primordial Cosmology meetings) 3 meetings per year:
2018: Organiser of the international conference "The Universe as a Quantum Lab":
2018 - now: Organiser of APC colloquia
2016 - 2017: ICG theoretical cosmology seminar organiser
- C.Volpe 2019 Membre du International Advisory Committee de 45th Erice workshop et du "Symposium Large TPCs for low energy rare event detection" (2018).
- J-P Gazeau Co-organizer (with R. Beneduci) of a special session on ``The role of Symmetry in the foundations of quantum physics" (SYMQP) at the 32th ICGTMP Conference in Prague, July 2018.
- Ch.Caprini Gravitational waves: a new messenger to explore the Universe", long-term workshop at the Institut Henri Poincaré (Paris), March-April 2021
 - "LISA Cosmology Working Group Workshop", regular meetings taking place twice a year: MITP Mainz (October 2017), University of Helsinki (June 2018), Universidad Autonoma de Madrid (January 2019), Università di Padova (September 2019), APC Paris (July 2020)
 - "Assemblée Générale du GdR Ondes Gravitationnelles", regular annual meeting of the Groupement de Recherche Ondes Gravitationnelles: APC Paris (October 2018), IPNL Lyon (October 2019)
 - "PONT d'Avignon – Progress on Old and New Themes in cosmology", regular conferences taking place every three years in Avignon (France): April 2011, April 2014, April 2017, April 2020
 - "School on Gravitational Waves for Cosmology and Astrophysics", Benasque (Spain), May 2017

Projet #1 String theory and Holography

Responsable scientifique de labo du Projet : E.Kirisis

Liste des chercheurs de l'équipe impliqués dans le projet:

- **2 permanents [Prénom, Nom, %ETPT dans le projet, (responsabilité)]**
 - Elias Kirisis 100% (responsable)
 - Francesco Nitti 50% (co-responsable)
- **2 post-doctorants [Prénom, Nom, %ETPT dans le projet, (responsabilité)]**
 - Witkowski Lukas 100% research
 - Davide Forcella 100% research
- **2 Doctorants: [Prénom, Nom, sujet, %ETPT dans le projet, (responsabilité)]**
 - Leandro Pimenta 100% research
 - Jewel Ghosh 100% research
- **Résultats scientifiques marquants de l'équipe (2016-2019)**
 - The comprehensive study of holographic RG flows and associated C-theorems
 - Developement of a framework for the self-tuning of the cosmological constant, based on the holographic duality
- **Publications emblématiques de l'équipe dans revues à comité de lecture (2017-2019)(3 max) :**
 - Holographic self-tuning of the cosmological constant Christos Charmousis (Orsay, LPT), Elias Kiritsis (APC, Paris & Crete U.), Francesco Nitti (APC, Paris). Apr 17, 2017. 99 pp. Published in **JHEP 1709 (2017) 031**
 - Brane cosmology and the self-tuning of the cosmological constant A. Amariti (INFN, Milan), C. Charmousis (Orsay, LPT), D. Forcella (APC, Paris), E. Kiritsis (APC, Paris & Crete U.), F. Nitti (APC, Paris) . 67 pp. e-Print: [arXiv:1904.02727](https://arxiv.org/abs/1904.02727)
 - Holographic RG flows on curved manifolds and the F -theorem Jewel Kumar Ghosh (APC, Paris), Elias Kiritsis (Crete U. & APC, Paris), Francesco Nitti, Lukas T. Witkowski (APC, Paris). Oct 29, 2018. 83 pp. Published in **JHEP 1902 (2019) 055** e-Print: [arXiv:1810.12318 \[hep-th\]](https://arxiv.org/abs/1810.12318)

10 papers in journals published + 2 preprints

Projet #1 String theory and Holography

E.Kiritsis, F.Nitti, D.Forcella, L.Witkowski, J.K. Ghosh,L.Pimenta

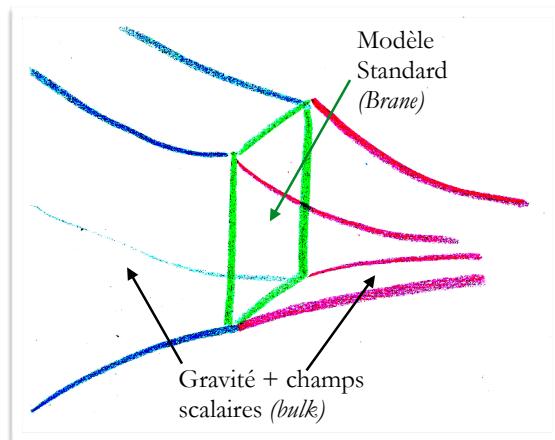

Holographie, constante cosmologique et gravité modifiée

Problème de la constante cosmologique:

pourquoi l'énergie de vide quantique du Modèle Standard TQC ne semble pas contribuer à la courbure de l'espace-temps ?

Univers Branaire holographique à 5d

C. Charmousis, E. Kiritsis, F. Nitti, JHEP 1709 (2017) 031

- Le modèle standard (localisé en 4d) interagit avec un *bulk* courbé à 5d;
- Mécanisme d'annulation automatique de la constante cosmologique à 4d (*self-tuning*);
- Modifications de la gravité à grande et/ou courte distance (duale: *gravité émergente*)

Projet #2 Quantum field theory

Liste des chercheurs de l'équipe impliqués dans le projet:

- **4 permanents [Prénom, Nom, %ETPT dans le projet, (responsabilité)]**
 - J-P. Gazeau 100%
 - E.Huguet 50%
 - M.Lachieze-Rey 100%
 - J.Mourad 50%
- **1 post-doctorants [Prénom, Nom, %ETPT dans le projet, (responsabilité)]**
 - Andrei Belokogne 100% QFT espace temps courbes

Résultats scientifiques marquants de l'équipe (2016-2019)

- Covariant integral quantization of various classical systems.
- Quantum field theory in de Sitter space-time, and cosmological implications
- Study of breaking of Supersymmetry
- Teleparallel Equivalent of General Relativity (TEGR) as a gauge theory of the translation group

Publications emblématiques de l'équipe dans revues à comité de lecture (2017-2019)(3 max) :

From Classical to Quantum Models: The Regularising Rôle of Integrals, Symmetry and Probabilities

Jean-Pierre Gazeau (APC, Paris & Rio de Janeiro, CBPF). Jan 8, 2018. 20 pp.

Published in Found.Phys. 48 (2018) no.11, 1648-1667

Teleparallel gravity equivalent of general relativity as a gauge theory: Translation or Cartan connection?

M. Fontanini, E. Huguet (APC, Paris), M. Le Delliou (Lanzhou U.). Nov 9, 2018. 11 pp.

Published in Phys.Rev. D99 (2019) no.6, 064006

On Classical Stability with Broken Supersymmetry

I. Basile (INFN, Pisa & Pisa, Scuola Normale Superiore), J. Mourad (APC, Paris), A. Sagnotti (INFN, Pisa & Pisa, Scuola Normale Superiore).

Nov 28, 2018. 59 pp. Published in JHEP 1901 (2019) 174

Projet #3 QFT and QCD

Responsable scientifique de labo du Projet : J.Serreau

Liste des chercheurs de l'équipe impliqués dans le projet:

• 1 permanents [Prénom, Nom, %ETPT dans le projet, (responsabilité)]

- Julien Serreau 50% (responsable)

• 2 Doctorants: [Prénom, Nom, sujet, %ETPT dans le projet, (responsabilité)]

Maelger Jan Transitions de Phases en QCD %100

Moreau Gabriel Champs quantiques en espace-temps courbe %100

Résultats scientifiques marquants de l'équipe (2016-2019)

-development of nonperturbative renormalization group methods to compute the effect of gravitationally enhanced quantum fluctuations during inflation study of backreaction of quantum fluctuations on spacetime expansion and of quantum stability of de Sitter spacetime

-analytical computation of the phase diagram of QCD with modified perturbation theory (massive extension of Landau gauge = Curci-Ferrari model) semi-analytical computation of dynamical breaking of chiral symmetry with the CF model

• Publications emblématiques de l'équipe dans revues à comité de lecture (2017-2019)(3 max) :

Perturbative study of the QCD phase diagram for heavy quarks at nonzero chemical potential: Two-loop corrections

J. Maelger (Ecole Polytechnique, CPHT & APC, Paris), U. Reinosa (Ecole Polytechnique, CPHT), J. Serreau (APC, Paris). Oct 5, 2017. 26 pp. Published in Phys.Rev. D97 (2018) no.7, 074027

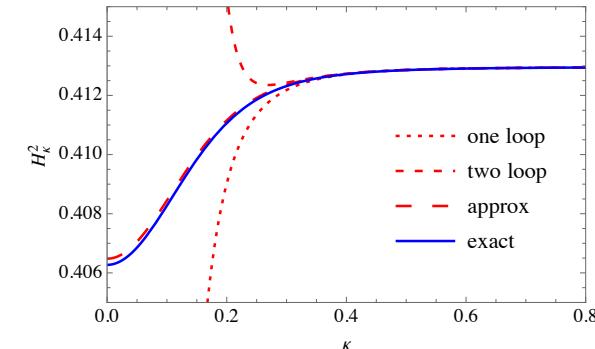

Stability of de Sitter spacetime against infrared quantum scalar field fluctuations G. Moreau, J. Serreau (APC, Paris). Aug 1, 2018. 5 pp. Published in Phys.Rev.Lett. 122 (2019) no.1, 011302

Rainbows in the QCD phase diagram J. Maelger (Ecole Polytechnique, CPHT & APC, Paris), U. Reinosa (Ecole Polytechnique, CPHT), J. Serreau (APC, Paris). Mar 11, 2019. 5 pp. e-Print: [arXiv:1903.04184](https://arxiv.org/abs/1903.04184)

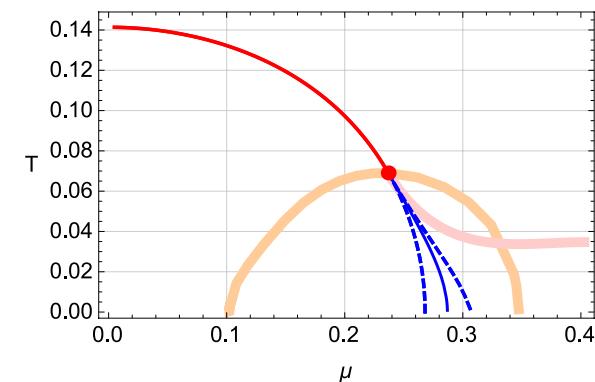

9 papers in journals published

J.Serreau, J.Maelger , G.Moerau

Quantum field theory in curved spacetime :
 development of nonperturbative renormalization group methods to compute the effect of gravitationally enhanced quantum fluctuations during inflation
 study of backreaction of quantum fluctuations on spacetime expansion and of quantum stability of de Sitter spacetime

- Infrared regime of Quantum Chromodynamics
 analytical computation of the phase diagram of QCD with modified perturbation theory (massive extension of Landau gauge = Curci-Ferrari model)
 semi-analytical computation of dynamical breaking of chiral symmetry with the CF model

the red line is a line of second order (corresponding to chiral symmetry restoration), the dot is a tricritical point and the blue line is a line of first order transition

Projet #4 Modified Gravity and Dark Energy

Responsable scientifique de labo du projet : D.Langlois

Liste des chercheurs de l'équipe impliqués dans le projet:

• 2 permanents+1 accosie [Prénom, Nom, %ETPT dans le projet, (responsabilité)]

- David Langlois 100% (responsable)
- Karim Noui 50%
- Daniel Steer 10%

Résultats scientifiques marquants de l'équipe (2016-2019)

study of the most general class of scalar-tensor theories: DHOST (Degenerate Higher-Order Scalar-Tensor)

theories obtained in 2015 (Langlois & Noui).

- > cosmological evolution for DHOST models of dark energy : background + perturbations
- > analysis of the perturbations of black holes in some DHOST theories

Publications emblématiques de l'équipe dans revues à comité de lecture (2017-2019)(3 max) :

Scalar-tensor theories and modified gravity in the wake of GW170817

David Langlois (APC, Paris), Ryo Saito (Yamaguchi U., Grad. School of Sci. Eng.), Daisuke Yamauchi (Kanagawa U.), Karim Noui (APC, Paris & Tours U., CNRS). Nov 20, 2017. 6 pp. Published in **Phys.Rev. D97 (2018) no.6, 061501**

Cosmological evolution in DHOST theories M. Crisostomi (IPhT, Saclay & AIM, Saclay & Orsay, LPT), Kazuya Koyama (Portsmouth U., ICG), D. Langlois (APC, Paris), K. Noui (APC, Paris & Tours U., CNRS), D.A. Steer (APC, Paris). Oct 29, 2018. 17 pp.

Published in **JCAP 1901 (2019) no.01, 030**

Dark energy and modified gravity in degenerate higher-order scalar–tensor (DHOST) theories: A review

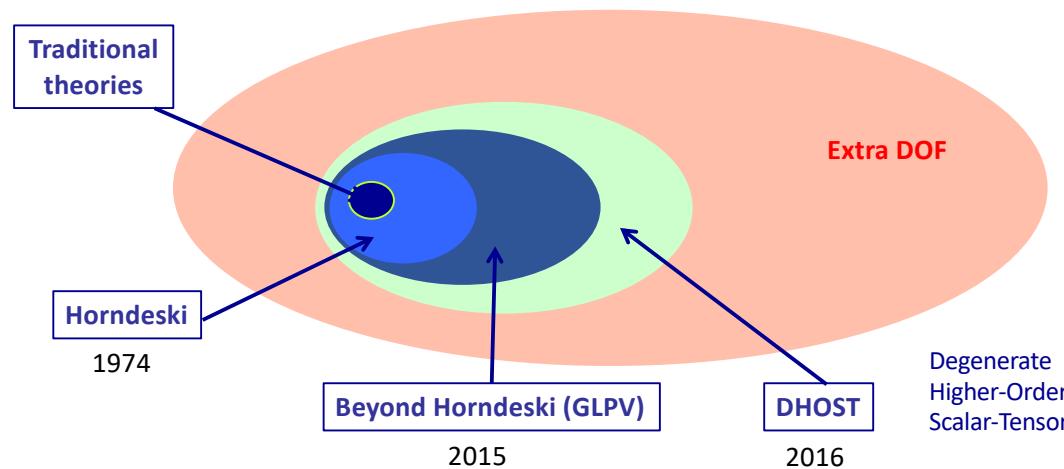

David Langlois (APC, Paris). Nov 15, 2018. 38 pp.

Published in **Int.J.Mod.Phys. D28 (2019) no.05, 1942006**

Projet #4 Modified gravity and Dark Energy

D.Langlois, K.Noui, D.Steer

- Traditional scalar-tensor theories: $\mathcal{L}(\nabla_\lambda \phi, \phi)$
- Generalized theories: $\mathcal{L}(\nabla_\mu \nabla_\nu \phi, \nabla_\lambda \phi, \phi)$

study of a new class of theories: DHOST (Degenerate Higher-Order Scalar-Tensor) theories obtained in 2015 (Langlois & Noui). Cf review DL, 1811.06271

Projet #5 Gravity theory and GW

Responsable scientifique de labo du Projet : N.Deruelle

Liste des chercheurs de l'équipe impliqués dans le projet:

- **1 permanents [Prénom, Nom, %ETPT dans le projet, (responsabilité)]**

• Nathalie Deruelle 100% (responsible)

- **2 post-doctorants [Prénom, Nom, %ETPT dans le projet, (responsabilité)]**

Marcela Cardenas, 100% black hole thermodynamics

Nelson Merino, 100% conserved charges in gravity theories

- **1 Doctorants: [Prénom, Nom, sujet, %ETPT dans le projet, (responsabilité)]**

- Pierre Auclair, 100%

Résultats scientifiques marquants de l'équipe (2016-2019)

- Extension de l' "approche effective à un corps" (EOB) au problème du mouvement aux théories modifiées de la gravitation (avec Félix-Louis Julié et, en partie, avec Marcela Cardenas).

- **Publications emblématiques de l'équipe dans revues à comité de lecture (2017-2019)(3 max) :**

[Two-body problem in Scalar-Tensor theories as a deformation of General Relativity : an Effective-One-Body approach](#)

Félix-Louis Julié, Nathalie Deruelle (APC, Paris). Mar 15, 2017. 19 pp.

Published in **Phys.Rev. D95 (2017) no.12, 124054**

Relativity in Modern Physics

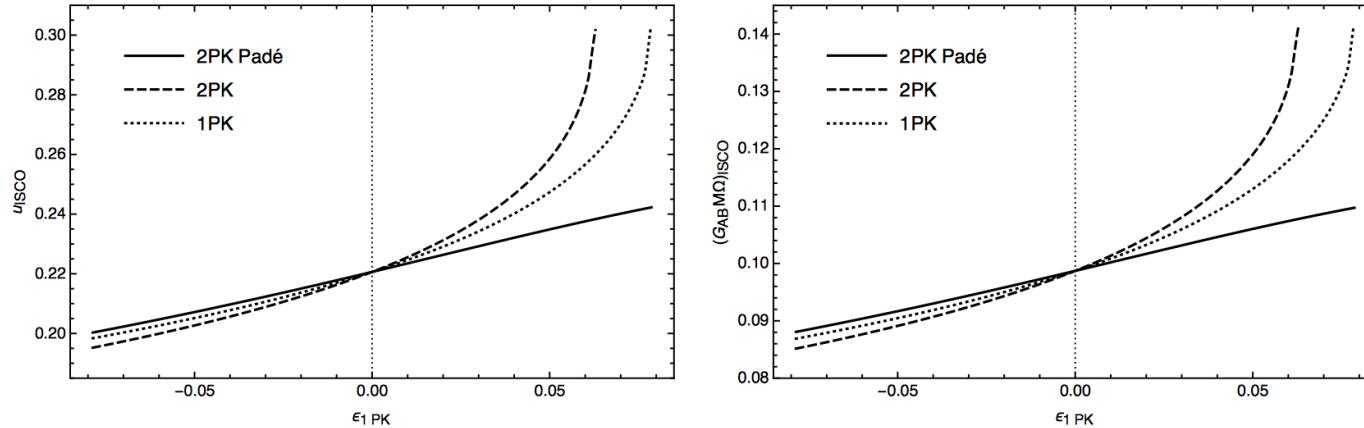

Nathalie Deruelle, Jean-Philippe Uzan. 2018. 704 pp.

5 papers in journals published

Projet #5 Gravity theory and GW

N.Deruelle, N.Merino, M.Cardenas, F.Julie

Figure 1: Scalar-Tensor corrections to the ISCO location in Droste coordinates (left panel) and associated frequency (right panel) versus ϵ_{1PK} for $\nu = 0.25$ and for $\epsilon_{2PK}^0 + \nu \epsilon_{2PK}^\nu = \epsilon_{1PK}$. General Relativity is recovered when $\epsilon_{1PK} = 0$. The first (dotted lines) and second (dashed lines) PK corrections quickly lead to divergences. The overall Padé resummation (solid line) cures them efficiently. The table gathers a few numerical values in the 2PK Padé resummed case ; $x \equiv G_{AB}M\Omega_{ISCO}/(G_{AB}M\Omega_{ISCO})_{GR}$.

From [F.Julie et N.Deruelle, Phys.Rev. D95 \(2017\) no.12, 124054](#)

Projet #6 Cosmology and GW

Responsable scientifique de labo du Projet : Ch.Caprini/D.Steer

Liste des chercheurs de l'équipe impliqués dans le projet:

- **2 permanents [Prénom, Nom, %ETPT dans le projet, (responsabilité)]**
 - Chiara Caprini 80% (co-responsible)
 - Daniel Steer 40% (co-responsible)

- **1 Doctorants: [Prénom, Nom, sujet, %ETPT dans le projet, (responsabilité)]**

- Pierre Auclair, 100% GWs from phase transitions and cosmic strings.

Résultats scientifiques marquants de l'équipe (2016-2019)

- Stochastic GW background from cosmic strings
- SGWB in first order PT, compared with the estimated sensitivity curve of the interferometer LISA

Publications emblématiques de l'équipe dans revues à comité de lecture (2017-2019)(3 max) :

First Measurement of the Hubble Constant from a Dark Standard Siren using the Dark Energy Survey Galaxies and the LIGO/Virgo Binary–Black-hole Merger GW170814 DES and LIGO Scientific and Virgo Collaborations (M. Soares-Santos (Brandeis U.) *et al.*). Jan 6, 2019. 15 pp. Published in *Astrophys.J.* 876 (2019) no.1, L7

Cosmic string loop production functions

Pierre Auclair (APC, Paris), Christophe Ringeval (Louvain U.), Mairi Sakellariadou (King's Coll. London), Daniele Steer (APC, Paris). Mar 15, 2019. 30 pp. e-Print: [arXiv:1903.06685](https://arxiv.org/abs/1903.06685) [astro-ph.CO] | [PDF](#)

Cosmological Backgrounds of Gravitational Waves

Chiara Caprini (APC, Paris), Daniel G. Figueroa (EPFL, Lausanne, LPPC). Jan 12, 2018. 149 pp. Published in *Class.Quant.Grav.* 35 (2018) no.16, 163001

neutron star merger remnants

- Neutrinos modify their flavor while travelling. In dense environments new flavor mechanisms are being uncovered.

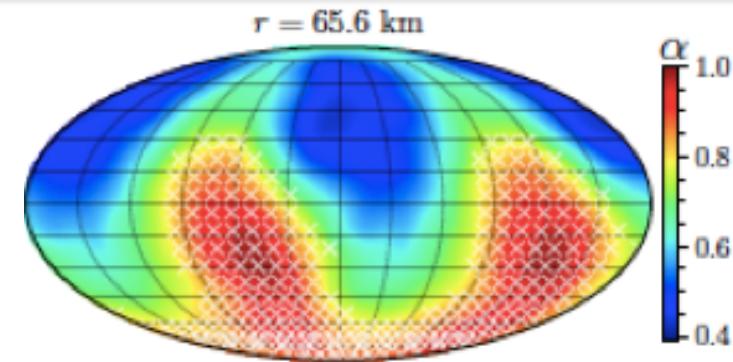

Supernovae

- Flavor evolution can impact the neutron richness and nucleosynthesis of heavy elements - **r-process** - in core-collapse supernovae and binary neutron star merger remnants.

Non-standard interactions can produce the I-resonance and total neutrino flavor conversion in kilonovae.

Chatelain and Volpe, PRD97(2018)

First evidence for the occurrence of « fast » flavor conversion, in 2- and 3-dimensional supernova simulations. Potential impact on the explosion mechanism, not yet understood.

Abbar, Duan, Sumiyoshi, Takiwaki, Volpe, arXiv :1812.06883

Projet #9 Cosmic rays

Responsable scientifique de labo du Projet : D.Semikoz

Liste des chercheurs de l'équipe impliqués dans le projet:

- **2 permanents [Prénom, Nom, %ETPT dans le projet, (responsabilité)]**
 - Dmitri Semikoz 40% (responsible)
 - Andrei Neronov 15% (co-responsible)
- **1 Doctorants: [Prénom, Nom, sujet, %ETPT dans le projet, (responsabilité)]**
 - M.Bouyahiaoui, 100% Cosmic ray models
- **Résultats scientifiques marquants de l'équipe (2016-2019)**
 - New anisotropic cosmic ray diffusion models was developed
 - Knee in cosmic rays was explained by anisotropic diffusion model
- **Publications emblématiques de l'équipe dans revues à comité de lecture (2017-2019)(3 max) :**

Reconciling cosmic ray diffusion with Galactic magnetic field models

9 papers in journals + review on cosmic ray models

Projet #9 Cosmic rays

D.Semikoz, A.Neronov, M.Bouvahiaoui

Old simplified isotropic diffusion model contradict to many recent observations, including B/C ratio for microGauss magnetic field, change of particle spectra at 200 GeV change of p/He ratio, positron excess, antiproton-positron ratio, dipole anisotropy of cosmic rays (amplitude and phase).
New anisotropic theory of cosmic ray diffusion, which explain all observations was developed in our group.

Projet #10 Multimessenger physics with high energy gamma-rays and neutrinos

Responsable scientifique de labo du Projet : A.Neronov

Liste des chercheurs de l'équipe impliqués dans le projet:

- **2 permanents [Prénom, Nom, %ETPT dans le projet, (responsabilité)]**
 - Andrei Neronov 35% (responsible)
 - Dmitri Semikoz 30% (co-responsible)
- **1 Doctorants: [Prénom, Nom, sujet, %ETPT dans le projet, (responsabilité)]**
 - A.Korochkin, 100% gamma-ray astronomy
- **Résultats scientifiques marquants de l'équipe (2016-2019)**
 - New galactic component in diffuse gamma-rays at TeV energies was discovered in Fermi LAT data. This component is consistent with IceCube excess at multi-TeV energies
 - Global analysis of IceCube data was performed with both Galactic and extragalactic source contributions
 - New EBL model was constructed, consistency between optical observations and gamma-ray constraints was tested
- **Publications emblématiques de l'équipe dans revues à comité de lecture (2017-2019)(3 max) :**

APC and IAP from France, INR, Moscow and Novosibirsk U. from Russia
APC is leading team in France

The goal of the project is to explore the possibility of opening new observational windows on the Early Universe (epochs before Big Bang Nucleosynthesis) using cosmological magnetic fields, gravitational waves and primordial black holes, all produced by primordial processes and surviving till the present epoch. We will assess the observational signatures of cosmological magnetic fields in the voids of the large scale structure and determine which information on their origin can be extracted from multi-messenger observational data (radio, gamma-ray, ultra-high-energy cosmic ray). The same type of processes leading to primordial magnetic seeds generates gravitational waves: we will assess their detectability by space-based detectors. We will test different scenarios of primordial black holes production and their observational signatures in multi-messenger astronomy data. Finally we will investigate the information on Early Universe physics that can be extracted from the joint detection of these observables.

New Projet #2 New IN2P3 project Cosmology with LISA

Oct 2020- Oct 2022

- **Chiara Caprini** with Stas Babak and Antoine Petiteau (Gravity),

Title:

Cosmology with LISA

Description:

To work on the potential of LISA to probe cosmology, both on the characterisation and detection of the stochastic gravitational wave background from the early universe, and on forecasting the constraints on the cosmological parameters using LISA standard sirens

POSTDOC: Alberto Mangiagli
