

Atelier Amas France

Online Conference
10-11 December 2020

Topics:

- Matter Distribution in Clusters
- Physics of Galaxy Clusters
- Numerical Simulations
- X-ray, SZ and Optical/IR Observations
- Cluster Survey Programs
- Cosmology with Galaxy Clusters

Galaxy clusters carry a wealth of information on the global properties of the universe and the complex processes that shape their formation and evolution. The meeting intends to gather the various galaxy cluster research groups across France to discuss the latest results and exchange ideas and foster new collaborations.
