

# EOSC Profiles

<b>Release</b>	v3.00
<b>Date</b>	31/5/2020
<b>Status</b>	FINAL Pending EOSC Enhance PMB Approval
<b>Abstract</b>	EOSC Profiles are specifications that define common data models for EOSC entities (Providers, Resources, etc) and related taxonomies. They contribute to the unified framework for describing and offering EOSC Resources to end-users in a harmonised way, guaranteeing the interoperability of resources metadata with open APIs. They allow automated management of the EOSC resource information and their accompanying data without human intervention (e.g., harvesting, etc).
<b>Contributors</b>	JNP: Jorge Sanchez (editor), Nikos Vogiatzis, Afrodite Sevasti, Yannis Mitsos, Antonis Zervas, Panos Spyrou, Theodore Ntzezes, EGI: Owen Appleton, Sergio Andreozzi, Malgorzata Krakowian, EUDAT: Mark van der Sanden, EPCC: Rob Baxter, GÉANT Assoc: Michelle Williams, Kostas Koumantaros, Annabel Grant, Shaun Cairns, Karl Meyer, UOA: George Papastefanatos, Giorgos Giannopoulos, Michael Zouros, Natalia Manola, OpenAIRE: Paolo Manghi, Donatella Castelli, Franco Zoppi, Andrea Mannocci, EFIS: Carmela Asero, Alasdair Reid, Jelena Angelis, Vladimir Cvijanovic, ESF: Ana Helman, Xavier Meyer, Antti Tahvanainen, EKT-NHRF: Haris Georgiadis, Vasilis Bonis, EUROCEAN: Margherita Zorgno, CTLS: Patrick England, Anna Kamenskaya, CESSDA: Carsten Thiel, e-IRG: Jan Wiebelitz, Gabriele von Voigt, PRACE AISBL: Florian Berberich, Pedro Alberto, Oriol Pineda, ARC: Penny Labropoulou, Androniki Pavlidou.
<b>Credits</b>	The EOSC Profiles are developed with the contribution of: JNP, UOA, EGI, EUDAT, OPENAIRE, EPCC, GEANT, EFIS, ESF, EKT, e-IRG, PRACE, ARC, EUROCEAN, CTLS in the framework of: the eInfraCentral project that has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 731049, the EOSC-hub project that has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 777536, the CatRIS project that has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 824173 and the EOSC Enhance project that has received funding from European Union's Horizon 2020 research and innovation programme under grant agreement No 871160.

# Introduction

One of the major challenges that the European Open Science Cloud (EOSC) aims to address is the historical lack of **Interoperable Online Catalogues of Research Resources** that European Researchers could explore across Europe.

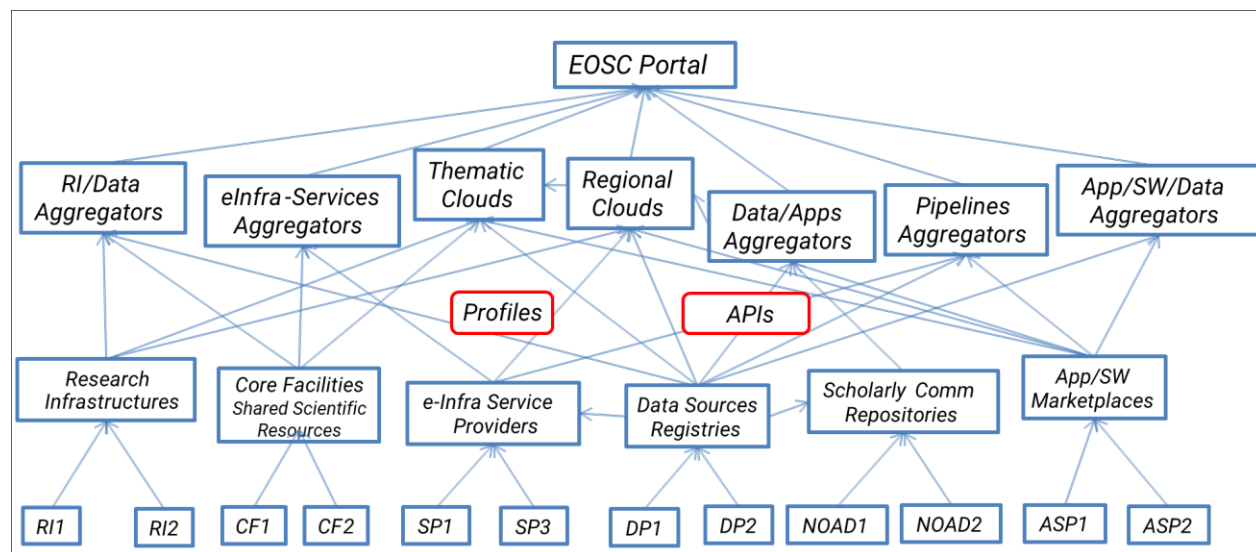

European Researchers increasingly live, work, and conduct research across borders. Their increased mobility must be supported by cross-border services and seamless exchange of data. Unfortunately, the environment in which data exchange takes place amongst EU Member States is complex, creating many semantic interoperability conflicts caused among others by the lack of commonly agreed data models, the absence of universal reference data, etc.

On the other hand many European Research Infrastructures and Resource Providers have their own public catalogues; many others are at very early stages of developing their catalogue; they are following diverse standards, frameworks and approaches; some describe their resources with varying level of detail and complexity, while others had no discoverable or accessible paths to their Resource offerings.

A Catalogue aims to present in a well-organised manner the available Resources that are on offer to a User/Customer by a Provider. It is the customer-facing list of all Resources offered. Similarly, to labels on goods or products, containing information on the good as well as pricing, Resources and their attributes should be explained in a clear and structured manner to guide the user to find the right Resource.

The development and implementation of a Catalogue is an essential step towards the transformation from technology-oriented organisations into customer-oriented organisations. It is a means to communicate and provide clarity to Users/Customers about the Resources available to them, to help improve customer relations by sharing information and managing customer expectations.

The eInfraCentral project recognised early enough that a common approach to describing (Goal-1) and exchanging (Goal-2) Resource-related information is the way forward to enhance discoverability, interoperability and thus potential uptake of Resources in a European single digital market for Research.

eInfraCentral worked on this harmonisation in partnership with five key e-infrastructures: GÉANT, OpenAIRE, PRACE, EGI and EUDAT. The approach was to extend best practices followed independently and to enable the harmonisation of Resource descriptions to allow interoperability and the possibility for a common catalogue or a catalogue of catalogues.

**Goal-1** was addressed by the EOSC Profiles (previously known as Service Description Templates (SDT)) that are widely adopted as the de facto standard scheme for the representation of Service-related information in the EOSC Catalogue. Profiles are simplified, reusable and extensible data models that capture the fundamental characteristics of a data entity in a context-neutral and syntax-neutral fashion.

**Goal-2** was addressed by a rich set of Open REST API methods for the exchange of information among Providers' systems and the EOSC Portal.

This approach bore fruit with the launch of the eInfraCentral Portal in 2017 and later on the EOSC-hub Portal and finally the EOSC Portal on November 2018 (with SDTv1.13). This work was extended within the EOSC Portal Collaboration Agreement of eInfraCentral, EOSC-hub and OpenAIRE-Advance and within CatRIS that is extending this work to offerings by Research Infrastructures (RIs), Core Facilities (CFs) and Shared Scientific Resources (SSRs) and is now transferred and developed further under EOSC Enhance in collaboration with EOSC-hub and in partnership with the ESFRI Cluster projects: ENVRI-FAIR, PaNOSC, ESCAPE, SSHOC and EOSC-Life.

The EOSC Profiles are evolving specifications, which will incorporate new features from the European research communities in the EOSC ecosystem.

The EOSC Profiles are part of the **EOSC Interoperability Framework** that comprises among others of:

- the EOSC Profiles;
- the EOSC Portal Application Programming Interfaces (API);
- the EOSC Portal Onboarding Process (OP);
- the EOSC Rules of Participation (RoP).

The EOSC Interoperability Framework as a whole constitutes an important pillar to realise the EOSC vision and framework. It is an evolving specification, which will incorporate new features from the EOSC ecosystem as they emerge.

Version 3.00 of the EOSC Profiles include two profiles each addressing a different entity and a different phase of the onboarding, update, maintenance and monitoring processes of a Resource by a Provider: the **Provider Profile** and the **Resource Profile**.

The EOSC Profiles provide definition of their attributes, their format/type (if any) and multiplicity, as well as whether the attribute is mandatory or optional for the implementation of a number of features in Catalogues. They also provide validation rules for validation of input data.

The EOSC Profiles include also Provider and Resource Code lists, Taxonomies, Classifications that have been developed to provide a structured classification of Resources and a harmonized way for the description of various attributes. They also constitute the basis for the structure and the filtering functions of an EOSC Catalogue.

The EOSC Profiles Roadmap include the following

- UML, RDF, XML (June 2020)
- Extension of EOSC Resource Profile for Research Products (July 2020)
- Extension of EOSC Resource Profile for Data Sources (September 2020)
- Specification of EOSC Portal APIs v3.00 (October 2020)
- Update to v4.00 (December 2020)

# EOSC Provider Profile

An EOSC Provider is an *EOSC System User* responsible for the provisioning of one or more *Resources to the EOSC*. *EOSC Providers* are organisations, a part of an organisation or a federation that manages and delivers Resources to End-Users. *EOSC Providers* can be: *Resource Providers, Service Providers, Data (Source) Providers, Service Developers, Research Infrastructures, Distributes Research Infrastructures, Resource Aggregators, Thematic Clouds, Regional Clouds*, etc. More definitions [here](#).

## EOSC Provider Data Model

Basic Information						
Code	Attribute Name	Definition	Type	Multiplicity	Required	Public
<b>EPP.BAI.0</b>	<b>ID</b>	A persistent identifier, a unique reference to the Provider in the context of the EOSC Portal.	String (max 30)	1	<b>Mandatory</b>	Yes
<b>EPP.BAI.1</b>	<b>Name</b>	Full Name of the Provider offering the resource and acting as main contact point.	String (max 100)	1	<b>Mandatory</b>	Yes
<b>EPP.BAI.2</b>	<b>Abbreviation</b>	Abbreviation or short name of the Provider.	String (max 30)	1	<b>Mandatory</b>	Yes
<b>EPP.BAI.3</b>	<b>Website</b>	Webpage with information about the Provider.	URL	1	<b>Mandatory</b>	Yes
<b>EPP.BAI.4</b>	<b>Legal Entity</b>	A Y/N question to define whether the Provider is a Legal Entity or not.	Boolean	1	<b>Mandatory</b>	Yes
<b>EPP.BAI.5</b>	<b>Legal Status</b>	Legal status of the Provider. The legal status is usually noted in the registration act/statutes. For independent legal entities (1) - legal status of the Provider. For embedded providers (2) - legal status of the hosting legal entity. It is also possible to select Not a legal entity.	List of controlled values	1	Optional	Yes
Marketing Information						
Code	Attribute Name	Definition	Type	Multiplicity	Required	Public

<b>EPP.MRI.1</b>	<b>Description</b>	The description of the Provider.	String (max 1000)	1	<b>Mandatory</b>	Yes
<b>EPP.MRI.2</b>	<b>Logo</b>	Link to the logo/visual identity of the Provider.	URL	1	<b>Mandatory</b>	Yes
<b>EPP.MRI.3</b>	<b>Multimedia</b>	Link to video, slideshow, photos, screenshots with details of the Provider.	URL	Multiple	Optional	Yes
<b>Classification Information</b>						
Code	Attribute Name	Definition	Type	Multiplicity	Required	Public
<b>EPP.CLI.1</b>	<b>Scientific Domain</b>	A named group of providers that offer access to the same type of resource or capabilities.	List of controlled values	Multiple	Optional	Yes
<b>EPP.CLI.2</b>	<b>Scientific Subdomain</b>	A named group of providers that offer access to the same type of resource or capabilities, within the defined domain.	List of controlled values	Multiple	Optional	Yes
<b>EPP.CLI.3</b>	<b>Tags</b>	Keywords associated to the Provider to simplify search by relevant keywords.	String (max 20)	Multiple	Optional	Yes
<b>Location Information</b>						
Code	Attribute Name	Definition	Type	Multiplicity	Required	Public
<b>EPP.L0I.1</b>	<b>Street Name and Number</b>	Street and Number of incorporation or Physical location of the Provider or its coordinating centre in the case of distributed, virtual, and mobile providers.	String (max 50)	1	<b>Mandatory</b>	Yes
<b>EPP.L0I.2</b>	<b>Postal Code</b>	Postal code of incorporation or Physical location of the Provider or its coordinating centre in the case of distributed, virtual, and mobile providers.	String (max 20)	1	<b>Mandatory</b>	Yes
<b>EPP.L0I.3</b>	<b>City</b>	City of incorporation or Physical location of the Provider or its coordinating centre in the case of distributed, virtual, and mobile providers.	String (max 20)	1	<b>Mandatory</b>	Yes

<b>EPP.L0I.4</b>	<b>Region</b>	Region of incorporation or Physical location of the Provider or its coordinating centre in the case of distributed, virtual, and mobile providers.	String (max 50)	1	Optional	Yes
<b>EPP.L0I.5</b>	<b>Country</b>	Country of incorporation or Physical location of the Provider or its coordinating centre in the case of distributed, virtual, and mobile providers.	List of controlled values	1	<b>Mandatory</b>	Yes
<b>Contact Information</b>						
<b>Main Contact/Provider Manager</b>						
Code	Attribute Name	Definition	Type	Multiplicity	Required	Public
<b>EPP.COL1</b>	<b>First Name</b>	First Name of the Provider's main contact person/Provider manager.	String (max 50)	1	<b>Mandatory</b>	No
<b>EPP.COL2</b>	<b>Last Name</b>	Last Name of the Provider's main contact person/Provider manager.	String (max 50)	1	<b>Mandatory</b>	No
<b>EPP.COL3</b>	<b>Email</b>	Email of the Provider's main contact person/Provider manager.	Email	1	<b>Mandatory</b>	No
<b>EPP.COL4</b>	<b>Phone</b>	Phone of the Provider's main contact person/Provider manager.	String (max 20)	1	Optional	No
<b>EPP.COL5</b>	<b>Position</b>	Position of the Provider's main contact person/Provider manager.	String (max 50)	1	Optional	No
<b>Public Contact</b>						
Code	Attribute Name	Definition	Type	Multiplicity	Required	Public
<b>EPP.COL6</b>	<b>First Name</b>	First Name of the Provider's contact person to be displayed at the portal.	String (max 20)	1	Optional	Yes
<b>EPP.COL7</b>	<b>Last Name</b>	Last Name of the Provider's contact person to be displayed at the portal.	String (max 20)	1	Optional	Yes
<b>EPP.COL8</b>	<b>Email</b>	Email of the Provider's contact person to be displayed at the portal or general email to contact Provider.	Email	1	<b>Mandatory</b>	Yes

<b>EPP.COL.9</b>	<b>Phone</b>	Phone of the provider's contact person to be displayed at the portal or general phone to contact Provider.	String (max 20)	1	Optional	Yes
<b>EPP.COL.10</b>	<b>Position</b>	Position of the Provider's contact person to be displayed at the portal.	String (max 50)	1	Optional	Yes
<b>Maturity Information</b>						
Code	Attribute Name	Definition	Type	Multiplicity	Required	Public
<b>EPP.MTL.1</b>	<b>Life Cycle Status</b>	Current status of the Provider/Research infrastructure life-cycle.	List of controlled values	1	Optional	Yes
<b>EPP.MTL.2</b>	<b>Certifications</b>	List of certifications obtained for the Provider (including the certification body and any certificate number).	String (max 250)	Multiple	Optional	Yes
<b>Other Information</b>						
Code	Attribute Name	Definition	Type	Multiplicity	Required	Public
<b>EPP.OTH.1</b>	<b>Hosting Legal Entity</b>	Name of the organisation/institution legally hosting (housing) the provider/research infrastructure or its coordinating centre. A distinction is made between: (1) research infrastructures that are self-standing and have a defined and distinct legal entity, (2) research infrastructures that are embedded into another institution which is a legal entity (such as a university, a research organisation, etc.). If (1) - name of the research infrastructure, If (2) - name of the hosting organisation.	String (max 80)	1	Optional	Yes
<b>EPP.OTH.2</b>	<b>Participating Countries</b>	Providers/Research Infrastructures that are funded by several countries should list here all supporting countries (including the Coordinating country).	List of controlled values	Multiple	Optional	Yes
<b>EPP.OTH.3</b>	<b>Affiliations</b>	Providers that are members or affiliated or associated with other organisations should list those organisations here	String (max 30)	Multiple	Optional	Yes

<b>EPP.OTH.4</b>	<b>Networks</b>	Select the networks the Provider is participating in.	List of controlled values	Multiple	Optional	Yes
<b>EPP.OTH.5</b>	<b>Structure Type</b>	Defines the Provider structure type (single-sited, distributed, mobile, virtual, etc.)	List of controlled values	Multiple	Optional	Yes
<b>EPP.OTH.6</b>	<b>ESFRI Domain</b>	ESFRI domain classification.	List of controlled values	Multiple	Optional	Yes
<b>EPP.OTH.7</b>	<b>ESFRI Type</b>	If the research infrastructure is (part of) an ESFRI project indicate how the RI participates: a) is a node of an ESFRI project, b) is an ESFRI project, c) is an ESFRI landmark, d) is not an ESFRI project or landmark.	List of controlled values	1	Optional	Yes
<b>EPP.OTH.8</b>	<b>MERIL Scientific Domain</b>	MERIL scientific domain classification	List of controlled values:	Multiple	Optional	Yes
<b>EPP.OTH.9</b>	<b>MERIL Scientific Subdomain</b>	MERIL scientific subdomain classification	List of controlled values	Multiple	Optional	Yes
<b>EPP.OTH.10</b>	<b>Areas of Activity</b>	Basic research, Applied research or Technological development	List of controlled values	Multiple	Optional	Yes
<b>EPP.OTH.11</b>	<b>Societal Grand Challenges</b>	Provider's participation in the grand societal challenges as defined by the European Commission	List of controlled values	Multiple	Optional	Yes
<b>EPP.OTH.12</b>	<b>National Roadmaps</b>	Provider being part of a national roadmap for research infrastructures	String (max 80)	Multiple	Optional	Yes

# EOSC Provider Onboarding Guide

<b>Basic Information</b>					
Code	Attribute Name	Example Value	Guidelines for the Providers	Machine-based validation	Human-based validation
<b>EPP.BAI.0</b>	<b>ID</b>	openaire	The Provider ID is currently maintained by the EOSC Portal. It is assigned during onboarding of the Provider. It is suggested to use the Provider's abbreviation (see EPP.BAI.2). Two providers cannot have the same id; therefore the EOSC Portal will resolve this when it happens during the registration of a provider. In next releases of the model, the id will correspond to a PID issued and resolved by PID providers (like ORCID, doi-like, etc).		
<b>EPP.BAI.1</b>	<b>Name</b>	Open Access Infrastructure for Research in Europe			Verify via internet search if the Provider name is a valid organisation name and has a Website with the same FQDN.
<b>EPP.BAI.2</b>	<b>Abbreviation</b>	OpenAIRE			Verify via internet search that this is the relevant abbreviation (no typos or misspellings)

<b>EPP.BAI.3</b>	<b>Website</b>	<a href="https://www.openaire.eu">https://www.openaire.eu</a>	Provide the landing page (i.e. domain name or FQDN) of the service provider	Validate nominal FQDN, reject IP or other formats	
<b>EPP.BAI.4</b>	<b>Legal Entity</b>	Y			
<b>EPP.BAI.5</b>	<b>Legal Status</b>	Non-Profit Partnership (NPP)			
<b>Marketing Information</b>					
<b>Code</b>	<b>Attribute Name</b>	<b>Example Value</b>	<b>Guidelines for the Providers</b>	<b>Machine-based validation</b>	<b>Human-based validation</b>
<b>EPP.MRI.1</b>	<b>Description</b>	OpenAIRE represents a pivotal phase in the long-term effort to implement and strengthen the impact of the Open Access policies of the European Commission, building on the achievements of the OpenAIRE projects. OpenAIRE support and accelerate Open Science and Scholarship, of which Open Access is of fundamental importance.	Describe shortly the objective and background of your organisation.		Compare briefly to provider website to ensure content consistency, but generally take as is.

<b>EPP.MRI.2</b>	<b>Logo</b>	<a href="https://www.openaire.eu/images/OpenAIRE_branding/Logo_Horizontal.png">https://www.openaire.eu/images/OpenAIRE_branding/Logo_Horizontal.png</a>	Provide a URL pointing to the organisation's logo at high quality, in the form of the shortest possible alias	Validate nominal URL, reject IP or other formats For the resource located at the URL validate as follows: -Formats: png, gif, jpg, jpeg, pjpeg, tiff, vnd.adobe, vnd.microsoft -Minimum dimensions 180x120px	
<b>EPP.MRI.3</b>	<b>Multimedia</b>	<a href="https://vimeo.com/108790101">https://vimeo.com/108790101</a>	Provide a URL pointing at a high quality video or slideshow, in the form of the shortest possible alias	Validate nominal URL, reject IP or other formats	
<b>Classification Information</b>					
Code	Attribute Name	Example Value	Guidelines for the Providers	Machine-based validation	Human-based validation
<b>EPP.CLI.1</b>	<b>Scientific Domain</b>	Information Science and Technology			
<b>EPP.CLI.2</b>	<b>Scientific Subdomain</b>	Complex Data Facilities			
<b>EPP.CLI.3</b>	<b>Tags</b>	Open data, open science, publications, research papers	Add keywords about the provider. For multi-word keywords, please use '-' to concatenate words	Validate keywords, by inserting '-' to concatenate words not separated by commas and identify as separate keywords words that are separated by commas	

<b>Location Information</b>					
Code	Attribute Name	Example Value	Guidelines for the Providers	Machine-based validation	Human-based validation
<b>EPP.L0I.1</b>	<b>Street Name and Number</b>	Christou Lada			
<b>EPP.L0I.2</b>	<b>Postal Code</b>	10561			
<b>EPP.L0I.3</b>	<b>City</b>	Athens			
<b>EPP.L0I.4</b>	<b>Region</b>	Attica			
<b>EPP.L0I.5</b>	<b>Country</b>	Greece			
<b>Contact Information</b>					
<b>Main Contact/Provider Manager</b>					
Code	Attribute Name	Example Value	Guidelines for the Providers	Machine-based validation	Human-based validation
<b>EPP.COL.1</b>	<b>First Name</b>	Minos			
<b>EPP.COL.2</b>	<b>Last Name</b>	Hantzopoulos			Check for obvious typos in the name. Confirm with an internet search of the name and provider
<b>EPP.COL.3</b>	<b>Email</b>	<a href="mailto:minos@uniath.gr">minos@uniath.gr</a>		Validate e-mail address	
<b>EPP.COL.4</b>	<b>Phone</b>	3021077755500		Validate for number (use separate input field for country prefixes)	
<b>EPP.COL.5</b>	<b>Position</b>	Coordinator			
<b>Public Contact</b>					

Code	Attribute Name	Example Value	Guidelines for the Providers	Machine-based validation	Human-based validation
<b>EPP.COL.6</b>	<b>First Name</b>	Natalia			
<b>EPP.COL.7</b>	<b>Last Name</b>	Pappa			Check for obvious typos in the name. Confirm with a google search of the name and provider
<b>EPP.COL.8</b>	<b>Email</b>	<a href="mailto:pappa@uniath.gr">pappa@uniath.gr</a>		Validate e-mail address	
<b>EPP.COL.9</b>	<b>Phone</b>	<a href="tel:293084436">293084436</a>		Validate for number (use separate input field for country prefixes)	
<b>EPP.COL.10</b>	<b>Position</b>	Manager			
<b>Maturity Information</b>					
Code	Attribute Name	Example Value	Guidelines for the Providers	Machine-based validation	Human-based validation
<b>EPP.MTI.1</b>	<b>Life Cycle Status</b>	Operational			

<b>EPP.MTL.2</b>	<b>Certifications</b>	ISO-27001			<p>The certifications provided can be generic or community specific. We do not qualify the quality of a certification, the only qualification is that the certification is described on a public webpage. Verify via easy internet searches if the provided names give a valid result describing the certification. If not, request clarification and an URL reference describing the certification. Check whether the certification body is real and appears to offer certification.</p>
<b>Other Information</b>

#### **Provider Life Cycle Status**

<b>No.</b>	<b>Provider Life Cycle Status</b>	<b>Description</b>
<b>1</b>	Under Construction	The Provider Infrastructure is under construction.
<b>2</b>	Operational	The Provider Infrastructure is constructed and all operations are being offered.
<b>3</b>	Being Upgraded	The Provider Infrastructure is currently being upgraded. It is probable that many services are in containment or unavailable.
<b>4</b>	Other	

#### **Provider Network**

This list is based on a MERIL result.

<b>No.</b>	<b>Provider Networks</b>	<b>Changes v1.13 to v3.00</b>	<b>Changes v1.30 to v3.00</b>	<b>Changes v2.00 to v3.00</b>
1	4M Association (4M)	<b>New</b>	<b>New</b>	Updated
2	African Archeologists Association (AAA)			Updated
3	Academic Careers Understood through MEasurement and Norms (ACUMEN)			
4	Accessibility Assessment Simulation Environment for New Applications Design and Development (ACCESSIBLE)			
5	European Research Infrastructure for the observation of Aerosol, Clouds and Trace Gases (ACTRIS)			Updated
6	Advancing 3Rs and International Standards in Biological and Biomedical Research (EUPRIM-Net)			
7	AErosol Robotic NETwork (AERONET)			
8	African Studies in Europe (AEGIS)			
9	Alianza por la Investigación y la Innovación Energéticas (ALINNE)			
10	ALISTORE European Research Institute (ALISTORE ERI)			Updated
11	Advanced MEMS For RF and Millimeter Wave Communications (AMICOM)			Updated
12				Deleted
13	Analysis and Experimentation on Ecosystems (ANAEE)			Updated

### Provider Structure Type

No.	Provider Type	Description	Changes v1.13 to v3.00	Changes v1.30 to v3.00	Changes v2.00 to v3.00
<b>1</b>	Single-sited	The Provider has one main physical location for users.	<b>New</b>	<b>New</b>	
<b>2</b>	Distributed	The Provider has multiple physical locations but a unified management structure and a single coordination centre.			
<b>3</b>	Mobile	The Provider is changing its physical location on a regular basis (e.g., satellites, research vessels).			
<b>4</b>	Virtual	The Provider is exclusively an electronic resource/service.			
<b>5</b>	Other				

### Provider ESFRI Domain

No.	ESFRI Domain	Description	Changes v1.13 to v3.00	Changes v1.30 to v3.00	Changes v2.00 to v3.00

1	Energy	<p>The energy sector is key to social and economic development. Especially in some non-OECD countries the energy sector sees very high growth rates due to rising GDP. However, it contributes significantly to global CO2 emissions. For the EU, the reduction of CO2 emissions in a sustainable framework is a major driver of its energy policy. This provides opportunities for new technologies both for application within and outside of the EU.</p>	New	New			
2	Environment	<p>Environmental sciences are traditionally divided into four research and study domains: ATMOSPHERE, HYDROSPHERE, BIOSPHERE and GEOSPHERE. These different spheres are closely interlinked, and therefore environmental sciences can also be presented according to Grand Challenges, such as loss of biodiversity, pollution, depletion of natural resources, risks, hazards and climate change.</p>					
3	Health & Food	<p>There is a broad consensus that future competitiveness in a globalised knowledge economy depends on research capability. Research Infrastructures (RIs) in the Biological, Agri-Food and Medical Sciences – i.e. Health &amp; Food – continue to establish themselves as research, innovation and skills hubs and as a motor for economic impact. This is reflected in increasing levels of industrial access to RIs, and in their European and global positioning.</p>					
4	Physical Sciences & Engineering	<p>Research Infrastructures are integral part of the day-to-day activity of Physical Sciences &amp; Engineering. Historically and today the PSE RIs are integrated in the way research is done in these disciplines, and major advances in knowledge are achieved by the research performed at RIs. However, the RIs are much more than research tools; they are truly Hubs of Knowledge &amp; Innovation with a complete multidisciplinary approach and a systematic impact on many areas beyond Physical Sciences and Engineering.</p>					
5	Social & Cultural Innovation	<p>Research Infrastructures that support research across and within the Social &amp; Cultural Innovation domain are among the first known infrastructures: libraries, museums and archives are the most obvious examples of this legacy. In today's digital age, Research Infrastructures in the Social Sciences and Humanities (SSH) enhance research into the historical, social, economic, political and cultural contexts of the European Union, providing data and knowledge to support its strategies.</p>					

1	Biological & Medical Sciences	1	Agronomy, Forestry, Plant Breeding Centres	Facilities that enable open field and forest experiments to test the impact of management practices and of environmental conditions on soil, crop, and primary production. These include plants and trees ex-situ collections, experimental facilities for controlled crosses and propagation, and population genetics field testing. The facilities are relevant for Biological- and Environmental Sciences.	New	New	
		2	Animal Facilities	Facilities that provide husbandry of animals and services to the biomedical research community, usually equipped with highly automated systems that provide the best possible conditions for animal reproduction and maintenance. The main activity is the reproduction and maintenance of animal stocks either of inbred strains or genetically engineered animals, such as transgenic and knockout mouse lines, or even chemically-induced mutants.			

			<p><b>3</b></p> <p>Collections of Biological Resources (e.g. Microorganisms, Biobanks and Seed Banks)</p>	<p>Facilities for storage of collections of microorganisms, biological material and the associated data and information facilities for a population or a large subset of a population, maintained under controlled conditions (temperature, humidity, atmosphere, etc.). The biological resources, including microorganisms, human/animal cells, tissue, blood and DNA, seeds of crops, trees and wild plant species, are conserved for their genetic endowment. Databases established on these provide holistic information on each accession with scientific descriptors, ethno-botanical/zoological/microbiological/medical knowledge, including for the purpose of establishing intellectual property rights and ownership over the biomaterial stored</p>			
			<p><b>4</b></p> <p>Bio-Informatics Facilities</p>	<p>Bioinformatics facilities generate knowledge through computer analysis of biological data. These can consist of the information stored in the genetic code, but also experimental results from various sources, patient statistics, and scientific literature. Research in bioinformatics includes method development for storage, retrieval, and analysis of the data. Bioinformatics is a rapidly developing branch of biology and is highly interdisciplinary, using techniques and concepts from informatics, statistics, mathematics, chemistry, biochemistry, physics, and linguistics. It has many practical applications in different areas of biology and medicine.</p>			

		<b>5</b>	Biological/Biomedical Engineering and Biotechnology/Nanotechnology Research Facilities	Facilities that are dedicated to application of concepts and methods of bioscience and/or nanoscience, and/or use of living systems and organisms to develop solutions to problems in life- and preclinical sciences using engineering methodologies.			
		<b>6</b>	Biomedical Imaging Facilities	Facilities which are equipped for visualisation, characterisation, and measurement of biological processes at the cellular and tissue levels in humans and other living systems.			
		<b>7</b>	Cell Culture Facilities	Facilities that are equipped to provide robust support for isolation and culture of a variety of cell lines (like mammalian and insect cell lines, mouse and human embryonic stem cells), including serum preparation, feeders, growth factors and mycoplasma testing, this may be on serum-based or serum-free media.			
		<b>8</b>	Clinical Research Centres	Facilities that support patient-oriented research, involving a particular person or group of people or using materials from humans. This research can include: studies of mechanisms of human disease; studies of therapies or interventions for disease; clinical trials; studies to develop new technology related to disease.			

				<p>Environmental health research addresses all potential hazards caused to a human being or an animal by external physical, chemical, and biological factors, and all the related factors impacting behaviours. It encompasses the assessment and control of those environmental factors that can potentially affect health. It is targeted towards preventing disease and creating health-supportive environments. This definition excludes behaviour not related to environment, as well as behaviour related to the social and cultural environment, and genetics. This category includes toxicology and infectious diseases facilities as well as epidemiological study centres.</p>			
		11	Genomic, Transcriptomic, Proteomics and Metabolomics Facilities	<p>Multiple sites ranging from single laboratory DNA sequencing and RNA transcript analysis facilities run by biologists for their own department's research to high-throughput facilities aimed at providing a sophisticated service for a broad community of biologists run by informaticians, biologists and engineers. Proteomics: physical chemistry developments for clinical and biological applications getting access to proteins network linked to the physiological and pathological stated of the cells. This includes nutrigenomics research.</p>			
		12	Structural Biology Facilities	<p>Facilities which are equipped for visualisation, characterisation, and measurement of biological processes at the molecular level in humans and other living systems. Main technologies include protein crystallisation, X-ray diffraction, mass spectrometry, DSC.</p>			

			<b>13</b>	Systems Biology/Computational Biology Facilities	Laboratories that combine all relevant scientific disciplines and the know-how to integrate experimental data with computational and theoretical approaches with the aim of targeting, understanding and engineering pathways, cells, organs and complete organisms.			
			<b>14</b>	Telemedicine Laboratories and E-Health Technologies	E-Health is an emerging concept relating to the use of networked digital ICTs (primarily the Internet) to facilitate the organisation & delivery of health care and services. It encompasses applications for providers and organisations (e.g. for storing, exchanging and using clinical or administrative data, or aiding evidence-based practice) and for citizens and patients (e.g. web-based health information, education, virtual consulting), as well as research applications of e-Health technologies.			
			<b>15</b>	Translational Research Centres	Translational Research Centres support the integration of evidence based medicine, social sciences and political sciences with the aim of optimising patient care and preventive measures which may extend beyond healthcare services. This is the process of turning appropriate biological discoveries into drugs and medical devices that can be used in the treatment of patients.			
			<b>16</b>	Other				

2	Chemistry and Material Sciences	1	Analytical Facilities	All facilities where analytical tools are used that are based on one of the following probes or methods: electrons, photons, neutrons, radio frequency, NMR, or analytical chemistry. It does include Surface Science Laboratories dedicated to analysis and characterization of surface and interface phenomena. Different users would come from the scientific domains Chemistry, Earth science, Bio-Medical (including forensic) science and different sensitivities (Analytical Chemistry, electron microscopy laboratories); NMR facilities; surface science laboratories; x- ray diffraction; Electron Microscopy Laboratories, aspects in life sciences, earth, forensics; Surface Science Laboratories.			
		2	Chemical Libraries and Screening Facilities	Digital libraries related to chemistry as well as screening facilities.			
		3	Intense Light Sources	All facilities that provide access to intense light radiation sources as used for lasers, synchrotrons, Free Electron Lasers. The facilities are relevant to the scientific domains of Physics, Chemistry, Bio-Medical Sciences, Earth and Environmental Sciences, Humanities & Arts, Information Science & Technology; Laser Sources for materials synthesis laboratories; Laser Sources for spectroscopy laboratories; Synchrotron Light Sources and X-Ray Diffraction Facilities.			
		4	Intense Neutron Sources	Accelerator-based neutron source facility that provides the intense pulsed neutron beam.			

		<b>5</b>	Materials Synthesis or Testing Facilities	All single or multi sited facilities run by engineers and materials scientists to process or test materials with regard to predefined specifications. It includes testing and processing equipment, structural and properties characterization instruments. The facilities are relevant to the scientific domains of Engineering, Materials Sciences, Physics, and Chemistry.			
		<b>6</b>	Pilot Plants for Process Testing	Plants where processes in biological or chemical systems, including bioenergy/biorefinery research and food processing research, are tested on a pilot level scale. Biology, Chemistry.			
		<b>7</b>	Reference Material Repositories	Facilities providing materials with at least one standardised and fully described property that can be used in measurements e.g. as a standard for calibration of instruments or as reference for measuring other materials.			
		<b>8</b>	Other				
<b>3</b>	Earth and Environmental Sciences	<b>1</b>	Acoustic Monitoring Stations	Non audible very low frequency waves infrasound stations, (volcano meteors monitoring, avalanches, landslides) ; audible frequency stations and hydro acoustic stations (marine mammals, multi-beam, acoustic tomography, echosounders, sodar); high frequency stations ( T-phase stations).			

		<b>2</b>	Atmospheric Measurement Facilities	Meteorological stations (all physical parameters that can be observed) ; Global Atmospheric Watch (GAW); Airglow; Ionospheric stations (all sky cameras, ionospheric radar); brewers; lidars; chemical compositions, pollution and radionuclides facilities; This includes atmospheric test chambers, used to conduct controlled experiments for climate change research and atmosphere related problems.			
		<b>3</b>	Earth Observation Satellites	Including Optical-IR Earth Observation satellites and Radar Earth Observation satellites.			
		<b>4</b>	Earth, Ocean, Marine, Freshwater, and Atmosphere Data Centres	Platforms for the exchange of earth, oceanographic, marine, freshwater and atmospheric data and information, and for advisory services in the field of earth, ocean, marine, freshwater and atmospheric data management. National Data Centres, Designated National Agencies for international data exchange and Satellite Data Centres represent the backbone of the data and information infrastructure. National networks are usually put in place to interconnect the data centres of major national institutes. The overall objective is to significantly improve the overview and access to data and data analysis from government and research institutes.			
		<b>5</b>	Earthquake Simulation Laboratories	Facilities that are equipped to do computer-assisted earthquake simulation.			

			<b>6</b>	Environmental Management Infrastructures	Pilot facilities and experimental infrastructures for management, ecological restoration and environmental mitigation of terrestrial and aquatic ecosystems in natural or degraded conditions (including hydrological and soil management field facilities; decontamination and bioremediation facilities and pilot plants).			
			<b>7</b>	Geothermal Research Facilities	Facilities that enable research, development, and demonstration of technologies to advance the use of geothermal energy as a clean, renewable, domestic power source.			
			<b>8</b>	In Situ Earth Observatories	Platforms and sensor technologies deployed in situ to collect environmental data (including physical, chemical and biological observations) in support of terrestrial environmental research and management activities. These facilities, including ecological habitat field stations, provide a base for trans-disciplinary research and training, with access to terrestrial field sites for survey and experimental opportunities and often supporting environmental observations and the collection of long-term time series data sets (a.o. on biodiversity).			

			<p><b>9</b> In Situ Marine/Freshwater Observatories</p>	<p>Platforms and sensor technologies deployed in situ to collect environmental data (including physical, chemical and biological observations) in support of aquatic environmental research and management activities. These facilities, including marine/freshwater research centres, provide a base for trans-disciplinary research and training, with access to marine and freshwater field sites, and equipment (including research vessels that may carry large exchangeable underwater equipment/instruments ) for survey and experimental opportunities and often supporting environmental observations and the collection of long-term time series data sets (a.o. on biodiversity). Typical equipment includes: Buoys; Argo; gliders; autonomous underwater vehicles; remotely operated vehicle (Victor); Tide gauges; deep sea laboratories. Ship-time for stock assessments, polar supply, naval research, and educational courses and non- academic research are not considered in this context. For this inventory the atmospheric measurement facilities are kept as a separate category. This implies that some marine research centres will also fall under this category if they host an atmospheric measurement site.</p>			
			<p><b>10</b> Natural History Collections</p>	<p>Facilities that serve as a library of organisms have lived and/or are living on Earth and curation sites for materials relevant for planetary exploration. They contribute to specific research and public education in an easily accessible venue.</p>			

		<b>11</b>	Polar and Cryospheric Research Infrastructures	Arctic and Antarctic stations; high altitude and mountain stations; heavy icebreakers; International Partnerships in Ice Core Sciences (IPICS); ANDRILL; Polar Ionospheric stations.			
		<b>12</b>	Research Aircraft	-			
		<b>13</b>	Solid Earth Observatories, including Seismological Monitoring Stations	Drilling platforms and sensor technologies deployed to collect solid earth data and material in support of solid earth research and management activities. This includes facilities that collect seismological data to be added to the European Integrated Data Archive (EIDA) and made available to the scientific community. Integrated Ocean Drilling Programme (IODP) and Integrated Continental Drilling Programme (ICDP); Sediment Coring Archives; VLBI stations.			
		<b>14</b>	Other				
<b>4</b>	Engineering & Energy	<b>1</b>	Aerospace and Aerodynamics Research Facilities	Single-sited facilities providing a controlled wind stream in which objects (aircrafts, vehicles, buildings) are placed in order to measure their aerodynamic properties, using for instance lasers and/or simulate an operation and control during flight/ drive; includes wind tunnels.			
		<b>2</b>	Civil Engineering Research Infrastructures	Single-sited, distributed or virtual facilities for the design, construction, testing (including the use of shaking tables) and maintenance of non-military, non-aerospace or non-mechanical large structures, typically including large buildings, transport infrastructures, bridges, dams, tunnels, sewers, plus river, coastal and public health engineering.			

			3	Electrical and Optical Engineering Facilities	Single- or multi-sited facilities that offer scientists and engineers access to devices for handling light, utilizing properties of light, and detecting light or access to infrastructure for research and development in the fields of electricity, electronics, and electromagnetism. These infrastructures may either broadly deal with electrical or electronic engineering, or be focused specifically on some of the numerous subtopics, like electronics, electric power, telecommunications, control systems, or other.			
			4	Energy Engineering Facilities (non-nuclear)	Combustion, solar, wind, production & distribution, includes, combustion test facilities and associated technologies.			
			5	Marine & Maritime Engineering Facilities	Experimental facilities in the fields of hydraulics, geophysical fluid dynamics, ship dynamics and ice engineering research. These include: Basins (both for marine research with waves and/or (tidal) currents and research on inland water issues); multi-directional wave basins; flumes (both for marine research and for research on inland water issues); towing tanks for ship dynamics research; cavitation tunnels; rotation basins for research on Coriolis-dominated issues; facilities for ice research; other hydraulic facilities. The facilities are relevant for the scientific domains Engineering, Earth and Environmental Sciences, Marine and Polar Sciences			

		<b>6</b>	Mechanical Engineering Facilities	Facilities dedicated to manufacturing, assembly and testing of components and systems offering services related to control, integration and realization of products and processes including modelling and simulation tools. Processing technology, road-transport vehicle development and testing are included.			
		<b>7</b>	Other				
<b>5</b>	Humanities & Arts	<b>1</b>	Collections	<p>Sets of often unique objects and items of different types collected usually to be exhibited. Collections normally include a collecting policy for new acquisitions, so only objects and items in certain categories and of a certain quality are accepted into the collection. Objects in a collection are normally catalogued, traditionally in a card index, but nowadays this is being replaced by computerized database also for physical collections. These type of RIs are particularly relevant for the humanities, which often deal with the study of unique artefacts, but they can be relevant for other domains, such as social sciences, life and environmental sciences.</p> <p><b>PHYSICAL:</b> Museums, Galleries, Analogue audio/visual/multimedia collections, Archaeology, Anthropology and Ethnology Collections, Arts &amp; Art History Collections, Music and Instrument Collections, Datasets (e.g. analogue audio/visual/multimedia datasets).</p> <p><b>DIGITAL:</b> Archaeology, Anthropology and Ethnology Collections, Arts &amp; Art History Collections, Digitised Manuscript Collections, Music and Instrument Collections, Virtual museums, Virtual galleries, Datasets.</p>			

		2	Repositories	<p>Locations for storage of often unique objects and items of different nature, in general for preservation purposes. Repositories not only have the function to store objects and items but they also guarantee access for future retrieval and study. This type of RI in its general definition is relevant to all scientific domains (for instance as far as physical or virtual facility for the deposit of academic publications such as academic journal articles are concerned); however, some humanities disciplines strongly rely on specific repositories for its analysis.</p> <p>PHYSICAL: Analogue audio/visual/multimedia repositories, Archaeology, Anthropology and Ethnology Repositories, Arts &amp; Art History Repositories.</p> <p>DIGITAL: Data repositories (e.g. digital library), Archaeology, Anthropology and Ethnology Repositories, Arts &amp; Art History Repositories, Digitised Manuscript Repositories.</p>			
		3	Databases	<p>Structured sets of data for one or more purposes, usually in digital form. The term database applies to the data and their supporting data structures. The utilisation of databases is spread across all scientific disciplines. Databases are therefore RIs relevant to all scientific domains. Databases in the form of structured meta-data as well as analytical data organised usually within a relational model have been extensively developed as RIs in the Humanities with increasing uptake in all its disciplines: Archaeology, Anthropology and Ethnology Databases, Arts &amp; Art History Databases, History Databases, Digitised Manuscript Databases.</p>			

			<b>4</b> Conceptual Models	<p>Explicit formalisations that map a concept to its intended semantics. Conceptual models are adopted in every research domain (e.g. economic models, mathematical models). In the humanities, however, some conceptual models have developed into RIs indispensable to structure a certain knowledge domain, such as is the case for thesauri and taxonomies (also very much used in life sciences) which have a long tradition in supporting analytical efforts especially in linguistics. Increasingly, digital models built around conceptual ontologies and networks are being developed for modelling specific research domain or for cross-referencing purposes in the Humanities.</p>			
--	--	--	----------------------------	--	--	--	--

			<p><b>5</b> Research Archives</p>	<p>Accounting normally for organised sets of unpublished and almost always unique historical records, or the physical place they are located, archives contain primary source documents (texts, maps, pictures etc.) in physical but also increasingly digital form (e.g. text archives structured in databases) that have accumulated over the course of an individual or organisation's lifetime. In general, archives consist of records that have been selected for permanent or long-term preservation on grounds of their enduring cultural, historical, or evidentiary value. Archives are thus particularly relevant to the Humanities, chiefly to historians but also to many other Humanities researchers dealing with primary sources of various kinds. A scientific discipline called archival science, dedicated to the study and practice of organising, preserving, and providing access to information and materials in archives, has established itself within the Humanities: History Archives, Literature and Text Archives.</p>			
--	--	--	-----------------------------------	---	--	--	--

			<p><b>6</b> Research Libraries</p>	<p>Traditionally, large collections of books, or the place in which the collection is housed. However, the term library has extended its meaning to refer to any collection, including digital sources, resources, and services. The collections can be of print, audio, and visual materials in numerous formats, including maps, prints, documents, microform (microfilm/microfiche), CDs, cassettes, videotapes, DVDs, video games, e-books, audiobooks and many other electronic resources. A research library is a collection of useful material for research use. A library is organised for use and maintained by a public body, an institution, a corporation, or a private individual. In addition to providing materials, libraries also provide the services of librarians who are experts at finding and organising information and at interpreting information needs.</p> <p>Modern libraries are increasingly being redefined as places to get unrestricted access to information in many formats and from many sources. They are extending services beyond the physical walls of a building, by providing material accessible by electronic means, and by providing the assistance of librarians in navigating and analysing tremendous amounts of information with a variety of digital tools. Libraries are valuable to all scientific domains; however, they are of specific relevance to Humanities research which relies on access to historical and rare collections of unique artefacts (e.g. primary sources such as ancient manuscripts) and other sources to study those artefacts and works (secondary and tertiary sources) usually held within libraries and otherwise hardly accessible. A scientific</p>			
--	--	--	------------------------------------	--	--	--	--

			discipline called library and information science, an interdisciplinary or multidisciplinary field dedicated to the analysis, collection, organisation, classification, manipulation, preservation, retrieval and dissemination of information resources, has established itself at the crossroads between social sciences, humanities and computer sciences. Historically, library science has also included archival science.				
		7	Research Bibliographies	<p>Large-scale systematic lists of books and other works such as journal articles, reference and access resources. They can be physical publications (i.e. bound volumes) or digital (indexes and catalogues usually in the form of databases).</p> <p>They can be generally divided into enumerative bibliography, which results in an overview of publications in a particular category, and analytical, or critical, bibliography, which studies the production of research material (in the form of books as well as other formats, including recordings, motion pictures, videos, graphic objects, databases, CD-ROMs and websites). As a bibliography can be produced in any field, it could be considered a transversal category; however it is Humanities research especially that has traditionally relied on such tools to systematise its fields of enquiry – spanning centuries of relevant publications for many humanities disciplines – and circumscribe its research domain.</p>			
		8	Other				

6	Information Science & Technology	1	Centralised Computing Facilities	Single-sited facilities with a centralised control that enable high performance computing through supercomputers. These are relevant to all scientific domains.			
		2	Communication Networks	Facilities responsible, at national or international levels, for the provision of data communications networks, capacity and services to the research and education community in all scientific domains. The networks typically connect other networks at international, regional or metropolitan level.			
		3	Complex Data Facilities	Facilities to store huge and high dimensional data volumes and apply statistical methods to classify or cluster the data in order to extract valuable information. The facilities are relevant to Bio-Medical Sciences; Earth and Environmental Sciences; Physics; Astrophysics; Social Sciences.			
		4	Distributed Computing Facilities	Facilities for virtualisation, grid and cloud computing, or capability computing that are loosely coupled, heterogeneous, and geographically dispersed distributed system with non-interactive workloads that involve a large number of files. They federate, share and coordinate distributed resources from different organisations that are not subject to centralized control, using open, general-purpose and in some cases standard protocols and interfaces to deliver non-trivial qualities of service relevant to all scientific domains.			

		<b>5</b>	Software Service Facilities	Facilities that provide access to well fabricated software for modelling, simulation, development, control and optimization, including software libraries/ repositories or support services for the implementation of the software, their maintenance and adaptation to new hardware platforms as well consultation regarding proper use of the software as well as training facilities for users. These are relevant to all scientific domains.			
		<b>6</b>	Other				
<b>7</b>	Physics, Astronomy, Astrophysics and Mathematics	<b>1</b>	Astro-Particle and Neutrino Detectors and Observatories	Range of detectors/observatories, using interactions in water or ice for detecting astrophysical neutrinos, interactions in liquid noble gases or solids for searching for dark matter particles, and light emission in the atmosphere for the detection of gamma rays from astrophysical sources.			
		<b>2</b>	Centres for Advanced Research in Mathematics	Research Centres hosting researchers and organizing scientific events at a high level. Three different types of centres can be distinguished according to their aim: a) centres organizing high level one week conferences in mathematics or their interface with sciences and industry; b) centres organizing, over three or more months, targeted advanced scientific programmes at doctoral level or on specific research challenges; c) high-level research institutes with few permanent positions and a highly developed visitor's programme. (High level mathematics, interface between mathematics and other sciences).			

				Centres devoted to the development of the interface between mathematics and industry. Their research groups offer a wide range of mathematical expertise and are able to interact with scientists from other disciplines (life sciences, bio-medicine, material sciences, engineering, computer sciences, physics, social sciences, etc.) both in the academic or industrial frameworks. (Industrial mathematics, applied mathematics).			
		<b>3</b>	Centres for Development of Industrial Mathematics	Centres devoted to the development of the interface between mathematics and industry. Their research groups offer a wide range of mathematical expertise and are able to interact with scientists from other disciplines (life sciences, bio-medicine, material sciences, engineering, computer sciences, physics, social sciences, etc.) both in the academic or industrial frameworks. (Industrial mathematics, applied mathematics).			
		<b>4</b>	Cross-Disciplinary Centres in Mathematics	Specialised structures devoted to the interaction of mathematics with other sciences (e.g. biology, genomics, chemistry, computer sciences ...). These structures strive at developing new areas of research where mathematics is known to play a founding role as it did in the development of physics. (Cross-disciplinary centres; mathematical sciences; interaction of mathematics).			
		<b>5</b>	Extreme Conditions Facilities	All facilities where materials are studied under extreme physical conditions as in High Magnetic Field Laboratories, High Pressure Laboratories, Low Temperature Laboratories, High Radiation Facilities, and Microgravity platforms.			
		<b>6</b>	Gravitational Wave Detectors and Observatories	Instruments using laser interferometry between freely hung test masses up to several km apart in vacuum. The lengths of two perpendicular arms, defined by the test masses, are compared and fluctuations in the arm length differences are recorded and analysed for potential GW signals. Links to earth observation.			

		7	High Energy Physics Facilities	High Energy Physics Facilities include accelerators, colliders, targets, light sources and detectors of high energy particles through electrostatic or oscillating fields accelerating particles to speeds sufficient to cause nuclear and particle reactions.			
		8	Mathematics Centres of Competence	Mathematics centres of competence develop mathematical models for applications in all sciences and engineering, including social sciences, and medicine. They analyse the models, develop and implement algorithms for the simulation of the models as well as for the optimization and control of the involved processes. They provide transversal competences which allow transferring concepts and methods from one specific science to another and they also provide consulting concerning the use of methods and their implementation for specific applications. When needed, they generate the basic mathematical theory that is needed to perform the described tasks. (Mathematical modelling; numerical and statistical simulation; control theory; optimization; mathematical algorithm repository).			
		9	Micro and Nanotechnology Facilities	Micro and nanotechnology facilities deals with the understanding and control of matter at the nanoscale and microscales, at dimensions between approximately 1 and 1000 nanometres, involving imaging, measuring, modelling, and manipulating matter at this length scale.			

		<b>10</b>	Nuclear Research Facilities	Nuclear Physics facilities include accelerators, colliders, targets and detectors to study the atomic nucleus, the nuclear matter including its fusion and fission. The facilities can be classified according to their objects of study (hadrons, nuclei, applications), the probes that are used to investigate them (lepton/ photon or hadron/heavy ion beams), or simply by the size of the facility and the type of reactions involved in the various nuclear processes.			
		<b>11</b>	Safety Handling Facilities	Facilities that are required to handle materials that potentially cause biosafety, chemical, radioactive, explosive, or engineering hazards. Also clean rooms and Actinide Handling Facilities would be included. Includes Biosecurity Level-4 Laboratories.			
		<b>12</b>	Space Environment Test Facilities	Includes planetary/space environment simulation chambers and space environment exposure facilities as well as space plasma physics facilities			
		<b>13</b>	Telescopes	Includes ground-based telescopes with (1) optical and/or near infrared telescopes, interferometers or (2) reflector telescopes with mirrors of different diameters, operating at radio frequencies, or infrared and/or optical wavelengths and (3) Space-borne telescopes orbiting the earth including a wide range of wavelengths, from gamma-rays to the radio.			

		<b>14</b>	Underground Laboratories	Underground spaces providing experimental areas of reduced cosmic ray background, reduced seismic noise etc. for a range of experiments in physics and particle astrophysics. Open to members of collaborations involved in installing and running experiments. These facilities also have relevance to ICT and Material Sciences, Environment, Biological and Medical Sciences, Physics.			
		<b>15</b>	Other				
<b>8</b>	Social Sciences	<b>1</b>	Data Archives, Data Repositories and Collections	A digital data archive is a centre of expertise in data acquisition, preservation, management, dissemination and promotion of an access to the national and international collections and repositories of digital data. These type of RIs are particularly acute to the social sciences, which often rely on the aggregation of longitudinal data, and to the humanities, which often rely on preservation, but they can be relevant for other domains, particularly, the life and environmental sciences and the medical sciences.			
		<b>2</b>	Data mining and Analysis (Methodological) Centres, including statistical analysis	Centres of expertise or methodological resources for extracting patterns from large data sets by combining methods from statistics and artificial intelligence. These RIs enable researchers to overcome the challenge of working with increasingly larger data-sets. Data-mining and statistical techniques populate every scientific domain but what counts as data is domain specific. Therefore, this category should be understood as specific to social sciences because it refers to data in the social sciences.			

		<b>3</b>	National Statistical Facilities (offices)	Centres of expertise responsible for the collection and publication of statistics related to the economy, population and society at international, national and regional levels. These infrastructures have been traditionally created by the states but constitute as well powerful resources for the social scientists in particular.			
		<b>4</b>	Registers and Survey-led Studies/Databases	Organized and systematic collection of data (time or spatial series) for one or more purposes (research, evidence-based policy, non-governmental organisations) in digital form or not. These type of RIs are particularly acute to the social sciences, which often rely on the aggregation of masses of longitudinal data but they can be relevant for all the other domains, that is, the humanities, the life and environmental sciences, the physical sciences and engineering, and the medical sciences.			
		<b>5</b>	Research Data Service Facilities	Facilities for clustering research data and making it permanently accessible, as well as facilities for the provision of all sorts of data services. These often include meta-infrastructures. These types of RIs are particularly relevant to Humanities and Arts; Social Sciences, Medical sciences.

# EOSC Resource Profile

An EOSC Resource is an asset made available by means of the *EOSC system* and according to the *EOSC Rules of Participation* to *EOSC End-Users* to perform a process useful to deliver value in the context of the EOSC. *EOSC Resources* include Services, Data Sources, Research Products and any other asset. More definitions [here](#).

## EOSC Resource Data Model

Basic Information						
Code	Attribute Name	Definition	Type	Multiplicity	Required	Public
ERP.BAI.0	<b>ID</b>	A persistent identifier, a unique reference to the Resource in the context of the EOSC Portal.	String (max 30)	1	Mandatory (Assigned by the EOSC Portal)	Yes
ERP.BAI.1	<b>Name</b>	Brief and descriptive name of Resource as assigned by the Provider.	String (max 80)	1	Mandatory	Yes
ERP.BAI.2	<b>Resource Organisation</b>	The name (or abbreviation) of the organisation that manages or delivers the resource, or that coordinates resource delivery in a federated scenario.	Provider ID	1	Mandatory (Filled in by the EOSC Portal)	Yes
ERP.BAI.3	<b>Resource Providers</b>	The name(s) (or abbreviation(s)) of Provider(s) that manage or deliver the Resource in federated scenarios.	Provider IDs	Multiple	Optional	Yes
ERP.BAI.4	<b>Webpage</b>	Webpage with information about the Resource usually hosted and maintained by the Provider.	URL	1	Mandatory	Yes
Marketing Information						
Code	Attribute Name	Definition	Type	Multiplicity	Required	Public

<b>ERP.MRI.1</b>	<b>Description</b>	A high-level description in fairly non-technical terms of a) what the Resource does, functionality it provides and Resources it enables to access, b) the benefit to a user/customer delivered by a Resource; benefits are usually related to alleviating pains (e.g., eliminate undesired outcomes, obstacles or risks) or producing gains (e.g. increased performance, social gains, positive emotions or cost saving), c) list of customers, communities, users, etc. using the Resource.	String (max 1000)	1	Mandatory	Yes
<b>ERP.MRI.2</b>	<b>Tagline</b>	Short catch-phrase for marketing and advertising purposes. It will be usually displayed close to the Resource name and should refer to the main value or purpose of the Resource.	String (max 100)	1	Mandatory	Yes
<b>ERP.MRI.3</b>	<b>Logo</b>	Link to the logo/visual identity of the Resource. The logo will be visible at the Portal.	URL	1	Mandatory	Yes
<b>ERP.MRI.4</b>	<b>Multimedia</b>	Link to video, screenshots or slides showing details of the Resource.	URL	Multiple	Optional	Yes
<b>ERP.MRI.5</b>	<b>Use Cases</b>	Link to use cases supported by this Resource.	URL	Multiple	Optional	Yes
<b>ERP.MRI.6</b>	<b>User Value</b>					
<b>ERP.MRI.7</b>	<b>User Base</b>					
<b>ERP.MRI.8</b>	<b>Service Options</b>					
<b>ERP.MRI.9</b>	<b>Service endpoint</b>					
<b>Classification Information</b>						
Code	Attribute Name	Definition	Type	Multiplicity	Required	Public
<b>ERP.CLI.1</b>	<b>Scientific Domain</b>	The branch of science, scientific discipline that is related to the Resource.	List of controlled values	Multiple	Mandatory	Yes

<b>ERP.CLI.2</b>	<b>Scientific Subdomain</b>	The subbranch of science, scientific subdiscipline that is related to the Resource.	List of controlled values	Multiple	Mandatory	Yes
<b>ERP.CLI.3</b>	<b>Category</b>	A named group of Resources that offer access to the same type of Resource or capabilities.	List of controlled values	Multiple	Mandatory	Yes
<b>ERP.CLI.4</b>	<b>Subcategory</b>	A named group of Resources that offer access to the same type of Resource or capabilities, within the defined Resource category	List of controlled values	Multiple	Mandatory	Yes
<b>ERP.CLI.5</b>	<b>Target Users</b>	Type of users/customers that commissions a Provider to deliver a Resource.	List of controlled values	Multiple	Mandatory	Yes
<b>ERP.CLI.6</b>	<b>Access Type</b>	The way a user can access the Resource (Remote, Physical, Virtual, etc.)	List of controlled values	Multiple	Optional	Yes
<b>ERP.CLI.7</b>	<b>Access Mode</b>	Eligibility/criteria for granting access to users (excellence-based, free-conditionally, free etc.)	List of controlled values	Multiple	Optional	Yes
<b>ERP.CLI.8</b>	<b>Tags</b>	Keywords associated to the Resource to simplify search by relevant keywords.	String (max 50)	Multiple	Optional	Yes
<b>ERP.CLI.9</b>	<b>Target customer tags</b>

<b>ERP.FNI.2</b>	<b>Pricing</b>	Webpage with the information on the price scheme for this Resource in case the customer is charged for.	URL	1	Optional	Yes

# EOSC Resource Onboarding Guide

Basic Information					
Code	Attribute Name	Example Value	Guidelines for Providers	Machine-based validation	Human-based validation
<b>ERP.BAI.0</b>	<b>ID</b>	openaire.zenodo	A provider does not need to provide this ID during registration or update. This is a unique ID which EOSC Portal assigns to a resource registered in the Registry and it is used to identify a resource in the EOSC portal. In next releases, Providers can use a PID; i.e., PID Providers will offer PID services to Resource Providers to reach a point that the EOSC portal will use global PIDs.		Should examine whether the Resource has been already onboarded by any other Providers and and escalate to the EPOT for resolution.
<b>ERP.BAI.1</b>	<b>Name</b>	B2DROP	Should be descriptive from a customer point of view and should be quite simple, such that someone non-technical is able to understand what the Resource is about. This attribute will be used in the search function to prioritise results.		In general it should be taken as-is because it is specific to the Resource and the Resource name selected by the Provider. Only ask for clarifications if the name does not correspond with the name of the Resource name provided on the Resource URL or in case of obvious typo's.

<b>ERP.BAI.2</b>	<b>Resource Organisation</b>	OpenAIRE			
<b>ERP.BAI.3</b>	<b>Resource Providers</b>	CERN, GRNET			
<b>ERP.BAI.4</b>	<b>Webpage</b>	<a href="http://www.Provider.eu/Resource-name">http://www.Provider.eu/Resource-name</a> or <a href="http://Resource-name.Provider.eu">http://Resource-name.Provider.eu</a>	Create a unique URL for each Resource and provide the shortest possible alias	Validate nominal URL, reject IP or other formats	Verify if the URL refers to the web page of the Resource, this is commonly the web page of the Resource in the Catalogue of the Provider. Verify if the name on the web page corresponds to the name provided as Resource Name.
<b>Marketing Information</b>					
Code	Attribute Name	Example Value	Guidelines for Providers	Machine-based validation	Human-based validation

<b>ERP.MRI.1</b>	<b>Description</b>	B2SHARE is a user-friendly, reliable and trustworthy service that allows to store and share worldwide small-scale research data, results and metadata from diverse contexts and guarantees their long-term persistence. For the communities who need to guard against data loss, B2SAFE is a customer facing service that allow data replication and safe storage between geographically distributed centres in the EUDAT CDI. 900+ data Providers in Europe with different compatibility levels. Adoption in Latin America and Japan.	Describe the Resource in a way that helps potential customers understand it and the benefit it brings. What is the main functionality of the service? The layout and content are up to the Provider. This field is used in the search function to prioritise results. Benefits are usually related to alleviating pains (e.g., eliminate undesired outcomes, obstacles or risks) or producing gains (e.g. increased performance, social gains, positive emotions or cost saving). Description should be as quantified as possible. Please consider GDPR.		In general take as-is because it is specific to the Resource provided by the Provider. Review the text, not to qualify the quality, but more on readability and for obvious typo's, if necessary, ask for clarifications. Also point out if it does not appear to address the potential customers and explain the main functionality of the Resource. If description is excessively long suggest being more concise.
<b>ERP.MRI.2</b>	<b>Tagline</b>	Store, share and access your files and their metadata on a global scale	Marketing specialists are encouraged to be engaged in order to come up with a catch phrase that can aid Resource dissemination and visibility.		In general it should be taken as-is because it is specific to the Resource provided by the Provider. Only ask for clarifications if the tagline does not correspond to the provided Resource Description and in case of obvious typos.

<b>ERP.MRI.3</b>	<b>Logo</b>	<a href="https://Resource-name.Resource-Provider.eu/Symbol.jpg">https://Resource-name.Resource-Provider.eu/Symbol.jpg</a>	Provide URL of the Resource, which must be in https, in the form of the shortest possible alias	Validate nominal URL, reject IP or other formats For the Resource located at the URL validate as follows: -Formats: png, gif, jpg, jpeg, pjpeg, tiff, vnd.adobe, vnd.microsoft -Minimum dimensions 180x120px	Verify if the URL points to a logo picture or source including a logo that relate to the Resource in question. If needed, contact requester for clarification.
<b>ERP.MRI.4</b>	<b>Multimedia</b>	<a href="http://Resource-name.Resource-Provider.eu/Multimedia">http://Resource-name.Resource-Provider.eu/Multimedia</a>	Provide URL of the Resource, in the form of the shortest possible alias	Validate nominal URL, reject IP or other formats	Verify if the URL points to multimedia that relates to the Resource in question. If needed, contact requester for clarification.
<b>ERP.MRI.5</b>	<b>Use Cases</b>	<a href="https://zenodo.org/record/1490344#.XfR8p_yxWUk">https://zenodo.org/record/1490344#.XfR8p_yxWUk</a>	Provide URL of the webpage describing a use case		Verify that the URL refers to the web page of the Resource and the screenshots and/or videos presented therein correspond to the Resource described.
<b>ERP.MRI.6</b>	<b>User Value</b>				
<b>ERP.MRI.7</b>	<b>User Base</b>				
<b>ERP.MRI.8</b>	<b>Service Options</b>				

<b>ERP.MRI.9</b>	<b>Service endpoint</b>				
<b>Classification Information</b>					
Code	Attribute Name	Example Value	Guidelines for Providers	Machine-based validation	Human-based validation
<b>ERP.CLI.1</b>	<b>Scientific Domain</b>	Natural Sciences	A second scientific domain should be used only if strictly needed		Verify that the provided value corresponds with names provided in the Resource's webpage.
<b>ERP.CLI.2</b>	<b>Scientific Subdomain</b>	Biological sciences			Verify that the provided value corresponds with names provided in the Resource's webpage.
<b>ERP.CLI.3</b>	<b>Category</b>	Aggregators & Integrators	A second category should be used only if strictly needed		Verify that the category chosen is logical to Resource description.
<b>ERP.CLI.4</b>	<b>Subcategory</b>	Software & Data			Verify that the subcategory chosen is logical to Resource description.
<b>ERP.CLI.5</b>	<b>Target Users</b>	Researchers, Research group, Research community, Research project, Research manager, Research organization, Innovators, Business	Target users should be defined as accurately and as inclusive as possible at the same time.		
<b>ERP.CLI.6</b>	<b>Access Type</b>	Virtual			

<b>ERP.CLI.7</b>	<b>Access Mode</b>	Excellence-based, peer reviewed			
<b>ERP.CLI.8</b>	<b>Tags</b>	Open Science, data, dataset, data archive, library, repository	For multi-word keywords, please use '-' to concatenate words. This field will be used in the search function to prioritise results.	Validate keywords, by inserting '-' to concatenate words not separated by commas and identify as separate keywords words that are separated by commas	In general take as-is because it is specific to the Resource and selected by the Provider. Only ask for clarifications in case of unfamiliar words and/or obvious typos.
<b>ERP.CLI.9</b>	<b>Target customer tags</b>				
<b>Geographical and Language Availability Information</b>					
Code	Attribute Name	Example Value	Guidelines for Providers	Machine-based validation	Human-based validation
<b>ERP.GLA.1</b>	<b>Geographical Availability</b>	World		Validation using the ISO 3166-1 alpha-2 standard for the 2-letter codes for representing the languages.	
<b>ERP.GLA.2</b>	<b>Language Availability</b>	English		Validation using the ISO 3166-1 alpha-2 standard for the 2-letter codes for representing the languages.	
<b>Resource Location Information</b>					
Code	Attribute Name	Example Value	Guidelines for Providers	Machine-based validation	Human-based validation

<b>ERP.RLI.01</b>	<b>Resource Geographic Location</b>				
<b>Contact Information</b>					
<b>Main Contact/Resource Owner</b>					
Code	Attribute Name	Example Value	Guidelines for Providers	Machine-based validation	Human-based validation
<b>ERP.COL1</b>	<b>First Name</b>	John			
<b>ERP.COL2</b>	<b>Last Name</b>	Smith			Check for obvious typos in the name. Confirm with a google search of the name and Provider
<b>ERP.COL3</b>	<b>Email</b>	<a href="mailto:john.smith@example.com">john.smith@example.com</a>		Validate e-mail address	
<b>ERP.COL4</b>	<b>Phone</b>	3021077755500		Validate for number (use separate input field for country prefixes)	
<b>ERP.COL5</b>	<b>Position</b>	Coordinator			
<b>ERP.COL6</b>	<b>Organisation</b>	Open Access Infrastructure for Research in Europe			
<b>Public Contact</b>					
Code	Attribute Name	Example Value	Guidelines for Providers	Machine-based validation	Human-based validation
<b>ERP.COL7</b>	<b>First Name</b>	Jack			

<b>ERP.COI.8</b>	<b>Last Name</b>	White			Check for obvious typos in the name. Confirm with a google search of the name and Provider
<b>ERP.COI.9</b>	<b>Email</b>	<a href="mailto:jack.white@example.com">jack.white@example.com</a>		Validate e-mail address	
<b>ERP.COI.10</b>	<b>Phone</b>	3021077755501		Validate for number (use separate input field for country prefixes)	
<b>ERP.COI.11</b>	<b>Position</b>	Manager			
<b>ERP.COI.12</b>	<b>Organisation</b>	Open Access Infrastructure for Research in Europe			
<b>Other Contacts</b>					
Code	Attribute Name	Example Value	Guidelines for Providers	Machine-based validation	Human-based validation
<b>ERP.COI.13</b>	<b>Helpdesk Email</b>	<a href="mailto:helpdesk@Provider.com">helpdesk@Provider.com</a>	Email to contact your helpdesk, where users with incidents and requests will be directed.	Validate e-mail address	Verify the validity of the email address as a helpdesk email for the specific Resource (via internet search)
<b>ERP.COI.14</b>	<b>Security Contact Email</b>	<a href="mailto:secutiry@Provider.com">secutiry@Provider.com</a>	Email contact of the person or group responsible for the security aspects of the Resource.	Validate e-mail address	Verify the validity of the email address as a security email for the specific Resource (via internet search)

<b>ERP.COL.15</b>	<b>Service security name/group</b>				
<b>Maturity Information</b>					
Code	Attribute Name	Example Value	Guidelines for Providers	Machine-based validation	Human-based validation
<b>ERP.MTI.1</b>	<b>Technology Readiness Level</b>	TRL8	<a href="https://ec.europa.eu/info/funding-tenders/opportunities/portal/screen/support/faq;keywords=/2890">https://ec.europa.eu/info/funding-tenders/opportunities/portal/screen/support/faq;keywords=/2890</a>	A Resource needs to have TRL $\geq$ 7 to be visible in the portal	Verify the provided TRL according to the Classification Appendix definitions
<b>ERP.MTI.2</b>	<b>Life Cycle Status</b>	Production			

<b>ERP.MTL.3</b>	<b>Certifications</b>	-	List of certifications obtained for the Resource (including the certification body and any certificate number if available).		The certifications provided can be generic or community specific. We do not qualify the quality of a certification, the only qualification is that the certification is described on a public webpage. Verify via internet searches if the provided names give a valid result describing the certification. If not, request clarification and an URL reference describing the certification. Check whether the certification body is real and appears to offer certification.
------------------	-----------------------	---	--	--	---

<b>ERP.MTI.4</b>	<b>Standards</b>	ISO 15430, ISO 27000 Webdav	List of formal and externally recognised standards that this Resource conforms to.		The standards provided can be generic or community specific. We do not qualify a standard, the only qualification is that the standard is described on a public webpage. Verify via internet searches if the provided names give a valid result describing the standard. If not, request clarification and an URL reference describing the standard.
<b>ERP.MTI.5</b>	<b>Open Source Technologies</b>		List any open source technologies incorporated into the Resource. Please note this is for specific technologies not broad ones like HTTP or a Linux distribution.		Check that the technologies mentioned/projects exist
<b>ERP.MTI.6</b>	<b>Version</b>	3.1	Only stable releases should be referenced.		
<b>ERP.MTI.7</b>	<b>Last Update</b>	2/28/2018	The date should refer to when the updated version became available to users, not when it was developed or released internally in the Provider.	Validate for date	
<b>ERP.MTI.8</b>	<b>Change Log</b>	Upgrade of user interface. Correction of minor bugs.	Clear, staccato sentences for each updated feature should be used.		

<b>ERP.MTL.9</b>	<b>Service Valid for</b>				
<b>Dependencies Information</b>					
Code	Attribute Name	Example Value	Guidelines for Providers	Machine-based validation	Human-based validation
<b>ERP.DEL.1</b>	<b>Required Resources</b>	List of Resource IDs	List any other EOSC Resources that your Resource requires in order to operate.		
<b>ERP.DEL.2</b>	<b>Related Resources</b>	List of Resource IDs	List any other EOSC Resources that you are aware of that your service can cooperate with.		
<b>ERP.DEL.3</b>	<b>Related Platforms</b>	E.g.: WeNMR Suite for DISVIS	List any platform this Resource is part of, e.g. a thematic portal for a certain community.		Verify via an internet search the name of the platform and its relevance with the Resource
<b>Attribution Information</b>					
Code	Attribute Name	Example Value	Guidelines for Providers	Machine-based validation	Human-based validation
<b>ERP.ATL.1</b>	<b>Funding Body</b>	European Commission	Publicity guidelines of each respective funding sources should be adhered to.		
<b>ERP.ATL.2</b>	<b>Funding Program</b>	Horizon 2020			
<b>ERP.ATL.3</b>	<b>Grant/Project Name</b>	OpenAIRE2020 (643410)			

<b>Management Information</b>					
Code	Attribute Name	Example Value	Guidelines for Providers	Machine-based validation	Human-based validation
<b>ERP.MGI.1</b>	<b>Helpdesk Page</b>	<a href="http://Resource-name.Resource-Provider.eu/Helpdesk">http://Resource-name.Resource-Provider.eu/Helpdesk</a> <a href="http://helpdesk.Resource-Provider.eu">http://helpdesk.Resource-Provider.eu</a>	Link to the helpdesk where users with incidents and requests will be directed. It should allow private communication with providers (not a public forum). Create a dedicated URL for your Resources and provide the shortest possible alias.	Validate nominal URL, reject IP or other formats	For this field it should be a URL to a helpdesk portal, verify the URL by accessing the URL via a web browser.
<b>ERP.MGI.2</b>	<b>User Manual</b>	<a href="http://Resource-name.provider.eu/UserManual">http://Resource-name.provider.eu/UserManual</a>	Link to the user manual or other basic user instructional information about the Resource. Create a dedicated URL for your Resources and provide the shortest possible alias.	Validate nominal URL, reject IP or other formats	Verify if the URL refers to the web page, document or other information describing the Resource. If not ask clarification from the Provider. The quality of the content does not have to be verified, but the information provided must have a look and feel of a user manual.

<p><b>ERP.MGI.3</b></p>	<p><b>Terms Of Use</b></p>	<p><a href="http://Resource-name.provider.eu/TermsOfUse">http://Resource-name.provider.eu/TermsOfUse</a></p>	<p>Link describing the rules, resource conditions and usage policy which one must agree to abide by in order to use the Resource. Create a dedicated URL for your Resources and provide the shortest possible alias.</p>	<p>Validate nominal URL, reject IP or other formats</p>	<p>Verify that the URL refers to the web page, document or other information providing the terms of use for the Resource. If not ask clarification from the Provider. The quality of the content does not to have be verified. The content has to be publically accessible before the user logs in.</p> <p>If there is no Terms of Use / Acceptable Use Policy or the existing one appears of low quality, suggest the WISE Baseline AUP, see <a href="https://aarc-project.eu/wp-content/uploads/2019/03/AARC-I044-Implementers-Guide-to-the-WISE-Baseline-AUP.pdf">https://aarc-project.eu/wp-content/uploads/2019/03/AARC-I044-Implementers-Guide-to-the-WISE-Baseline-AUP.pdf</a></p>
-------------------------	----------------------------	--	--	---	---

<b>ERP.MGI.4</b>	<b>Privacy Policy</b>		Link to the privacy policy applicable to the Resource. Privacy policies are required for all Resources, since they will likely fall under the GDPR limitations. Create a dedicated URL for your Resources and provide the shortest possible alias.	Validate nominal URL, reject IP or other formats	Verify that the URL refers to the web page, document or other information describing the Resource privacy policy. If not ask clarification from the Provider. The quality of the content does not have to be verified.
<b>ERP.MGI.5</b>	<b>Access Policy</b>	PRACE provides HPC Resources to researchers and scientists from academia and industry through Preparatory Access (code scaling and optimization) and/or through Project Access (large-scale, computationally intensive projects) <a href="http://www.prace-ri.eu/hpc-access">http://www.prace-ri.eu/hpc-access</a>	Create a dedicated URL for your Resources and provide the shortest possible alias.		Check that the answer can be generally understood by users, and seems to relate to the service as shown on its website.
<b>ERP.MGI.6</b>	<b>Service Level</b>	<a href="http://Resource-name.Provider.eu/SLA">http://Resource-name.Provider.eu/SLA</a>	Link to a Service Level Agreement (SLA) or Service Level Specification (SLS) applicable to the Resource. Support is available in forming an SLA or SLS is available at <a href="https://wiki.eosc-hub.eu/display/EOSC/Service+Provider+Documentation">https://wiki.eosc-hub.eu/display/EOSC/Service+Provider+Documentation</a> .	Validate nominal URL, reject IP or other formats	Verify that the provided link points to a Service Level Agreement (SLA) or Service Level Specification (SLS) applicable to the Resource.

<p><b>ERP.MGI.7</b></p>	<p><b>Training Information</b></p>	<p><a href="http://Resource-name.Provider.eu/Training">http://Resource-name.Provider.eu/Training</a></p>	<p>Link to page with training information on the Resource. Create a dedicated URL for your Resources and provide the shortest possible alias.</p>	<p>Validate nominal URL, reject IP or other formats</p>	<p>Verify that the URL refers to the web page, document or other information related to training for the Resource. If not ask clarification from the Provider. The quality of the content does not have to be verified, but the information provided must have a look and feel and to be useful as training material.</p>
<p><b>ERP.MGI.8</b></p>	<p><b>Status Monitoring</b></p>	<p><a href="http://Resource-name.Provider.eu/Monitoring">http://Resource-name.Provider.eu/Monitoring</a></p>	<p>Web Page with monitoring information about this Resource.</p>	<p>Validate nominal URL, reject IP or other formats</p>	<p>Verify that the URL points to a webpage that provides monitoring information about the Resource. If not ask clarification from the Provider. We do not assess the quality and/or usefulness of the monitoring page.</p>
<p><b>ERP.MGI.9</b></p>	<p><b>Maintenance</b></p>	<p><a href="http://Resource-name.Provider.eu/Maintenance">http://Resource-name.Provider.eu/Maintenance</a></p>	<p>Web Page with information about planned maintenance windows for this Resource.</p>	<p>Validate nominal URL, reject IP or other formats</p>	<p>Verify that the URL points to a webpage that provides information on scheduled downtimes of the Resource. If not ask clarification from the Provider.</p>

<b>ERP.MGI.10</b>	<b>Service Feedback</b>				
<b>ERP.MGI.11</b>	<b>Admin Manual</b>				
<b>Access and Order Information</b>					
Code	Attribute Name	Example Value	Guidelines for Providers	Machine-based validation	Human-based validation
<b>ERP.AOI.1</b>	<b>Order Type</b>				
<b>ERP.AOI.2</b>	<b>Order</b>	<a href="https://gts.geant.net/login">https://gts.geant.net/login</a>		Validate nominal URL, reject IP or other formats

# EOSC Resource Code Lists, Taxonomies, Classifications

## Resource Scientific Domain/Subdomain

From the Revised Field of Science and Technology (FOS) Classification in the Frascati Manual by the Working Party of National Experts on Science and Technology Indicators (2007), OECD.

No.	Scientific Domain	Description	No.	Scientific Subdomain	Changes v1.13 to v3.00	Changes v1.30 to v3.00	Changes v2.00 to v3.00
1	Natural Sciences	Any of the sciences (such as physics, chemistry, or biology) that deal with matter, energy, and their interrelations and transformations or with objectively measurable phenomena.	1	Mathematics	New	Change to FOS 2017	Change to FOS 2017
			2	Computer and information sciences			
			3	Physical sciences			
			4	Chemical sciences			
			5	Earth and related environmental sciences			
			6	Biological sciences			
			7	Other natural sciences			
2	Engineering & Technology	The application of science and mathematics by which the properties of matter and the sources of energy in nature are made useful to people	1	Civil engineering			
			2	Electrical, electronic and information engineering			

			3	Mechanical engineering			
			4	Chemical engineering			
			5	Materials engineering			
			6	Medical engineering			
			7	Environmental engineering			
			8	Environmental biotechnology			
			9	Industrial biotechnology			
			10	Nano-technology			
			11	Other engineering and technology sciences			
<b>3</b>	Medical & Health Sciences	The science of dealing with the maintenance of health and the prevention and treatment of disease	1	Basic medicine			
			2	Clinical medicine			
			3	Health sciences			
			4	Medical biotechnology			
			5	Other medical sciences			

4	Agricultural Sciences	Sciences dealing with food and fibre production and processing. They include the technologies of soil cultivation, crop cultivation and harvesting, animal production, and the processing of plant and animal products for human consumption and use.	1	Agriculture, forestry, and fisheries			
			2	Animal and dairy sciences			
			3	Veterinary sciences			
			4	Agricultural biotechnology			
			5	Other agricultural sciences			
5	Social Sciences	A branch of science that deals with the institutions and functioning of human society and with the interpersonal relationships of individuals as members of society	1	Psychology			
			2	Economics and business			
			3	Educational sciences			
			4	Sociology			
			5	Law			
			6	Political sciences			
			7	Social and economic geography			
			8	Media and communications			
			9	Other social sciences			
6	Humanities	The branches of learning that investigate human constructs and concerns as	1	History and archaeology			

		opposed to natural processes (as in physics or chemistry) and social relations (as in anthropology or economics).	2	Languages and literature			
			3	Philosophy, ethics and religion			
			4	Arts			
			5	Other humanities			
7	Generic	Generic, Not targeting a specific domain.	1	Generic		Change from Interdisciplinary to Generic	Change from Interdisciplinary to Generic
8	Other		1	Other			

### Resource Category, Subcategory (and Supercategory)

Supercategories are defined to facilitate the User Interfaces and Menus with a small number of classes.

No .	Category	Description	No .	Subcategory	No .	Supercategory	Changes v1.13 to v3.00	Changes v1.30 to v3.00	Changes v2.00 to v3.00
1	Instrument & Equipment	Access to instruments and equipment	1	Spectrometer	1	Access physical & e-Infrastructures	New		
			2	Radiation					
			3	Microscopy					
			4	Laser					
			5	Geophysical					
			6	Chromatographer					
			7	Cytometer					
			8	Spectrophotometer					

			<b>10</b>	Digitisation equipment				
			<b>11</b>	Monument maintenance equipment				
			<b>12</b>	Other				
<b>2</b>	Material Storage	Access to biological, chemical, historical, archeological, cultural, etc. storage. Includes the acquisition, preparation and processing of samples and materials in view of their preservation.	<b>1</b>	Warehousing	New			
			<b>2</b>	Fulfilment				
			<b>3</b>	Assembly				
			<b>4</b>	Sorting				
			<b>5</b>	Re-working				
			<b>6</b>	Packaging				
			<b>7</b>	Quality inspecting				
			<b>8</b>	Archiving				
			<b>9</b>	Disposal				
			<b>10</b>	Repository				
			<b>11</b>	Preservation				
			<b>12</b>	Other				
<b>3</b>	Network	Ultra-fast connectivity and access to Infrastructure s' Resources	<b>1</b>	Direct Connect	Change Name (old Networking)  Deleted Subcategories: Application			
			<b>2</b>	Virtual Network				
			<b>3</b>	Load Balancer				
			<b>4</b>	VPN Gateway				
			<b>5</b>	Exchange				

			6	Content Delivery Network			Gateway, API Gateway		
			7	Traffic Manager			Added subcategories: Exchange		
			8	Other					
4	Compute	High-performance computing Resources and scalable cloud compute capacity for demanding job processes	1	Virtual Machine Management			Deleted Subcategories: Batch Processing		
			2	Container Management					
			3	Job Execution					
			4	Workload Management					
			5	Orchestration					
			6	Serverless Applications Repository					
			7	Other					
5	Data Storage	Reliable, secure and scalable cloud storage for scientific data, apps and workloads	1	Data			Change Name (old Storage)  Deleted Subcategories: Blob, Digital preservation  Added subcategories: Online		
			2	File					
			3	Queue					
			4	Disk					
			5	Online					
			6	Archive					
			7	Backup					
			8	Synchronised					

			<b>9</b>	Replicated					
			<b>10</b>	Recovery					
			<b>11</b>	Digital preservation					
			<b>12</b>	Other					
<b>6</b>	Data	Vast range of data, datasets etc to facilitate research and scientific activities	<b>1</b>	Government and agency data	<b>2</b>	Sharing & Discovery	Deleted Subcategories: Mining, Access, Management, Transfer Management, Registration, Persisten Identifier, Interlinking, Publishing, DIsccovery, Anonymisation, Preservation, Brokering, Anotation		
			<b>2</b>	Statistical data					
			<b>3</b>	Scientific/Research data					
			<b>4</b>	Online service data					
			<b>5</b>	Clinical trial data					
			<b>6</b>	Epidemiological data					
			<b>7</b>	Data archives					
			<b>8</b>	Other					Added subcategories: All new
<b>7</b>		Research findings	<b>1</b>	Preparation		New			
			<b>2</b>	Discovery					

	Scholarly Communication	available to the wider academic community and beyond	3	Analysis				
			4	Writing				
			5	Publication				
			6	Outreach				
			7	Assessment				
			8	Other				
8	Software	Software, platforms and tools offered-as-a-service or deployed-on-demand	1	Software Repository		Deleted Subcategories: Tool, Component, Algorithm, Developer		
			2	Platform				
			3	Software Package				
			4	Libraries				
			5	Other		Added subcategories: Software Repository, Software Package, Libraries		
9	Application	End-user applications (apps) offered-as-a-service or deployed-on-demand	1	Communication		Deleted Subcategories: Porting, Scaling, Developer		
			2	Collaboration				
			3	Productivity				
			4	Business				
			5	Education		Added subcategories: Communication, Collaboration, Social/Networking, Utilities, Applications Repository

### Resource Target Users

No.	Target Users	Description	Changes v1.13 to v3.00	Changes v1.30 to v3.00	Changes v2.00 to v3.00
1	Researchers	Someone who conducts scientific research, i.e., an organized and systematic investigation by using scientific methods.	New		
2	Research groups	A research group is a group of researchers working together on a particular issue or topic. Research groups may be composed of researchers all from the same subject/discipline or from different subjects/disciplines.			
3	Research communities	Research communities provide an infrastructure through which scientists of discipline-specific scientific areas are able to advance their research goals, reaching out to other researchers.			

4	Research projects	A privately or publicly funded project on a research topic.		
5	Research networks	Research networks aim to stimulate interaction between researchers and promote information exchange.		
6	Research managers	Someone in an organization whose job is to manage a research initiative aiming to the development of new scientific results, products or ideas.		
7	Research organisations	A public or private legal entity (e.g. academia, business, industry, public services, etc.) representing the User.		
8	Students	A person who is studying at a university or other place of higher education.		
8	Innovators	The group or individual which is the first to try new ideas, processes, goods and services. Innovators are followed by early adopters, early majority, late majority, and laggards, in that order.		
9	Businesses	An organization or economic system where goods and services are exchanged for one another or for money. Businesses can be privately owned, not-for-profit or state-owned.		
10	Providers	A Provider is an organisation that provides different kind of solutions and/or services or other Resources to end users and other organizations. This broad term incorporates all businesses and organisations that provide products and solutions that are offered for free, on-demand, pay per use or a hybrid delivery model.		
11	Funders	Individual or organization financing a part or all of a project's cost as a grant, investment, or loan.		
12	Policy Makers	Individuals (usually members of the board of directors) who have the authority to set the policy framework of an organization.		
13	Research Infrastructure Managers	A RI Manager is a type of Project Coordinator who specializes in research infrastructures. They are responsible for things like managing researchers, making sure costs are on budget and serving as a liaison between reserach staff and project stakeholders.		
14	Provider Managers	A Provider Manager is an individual within an organisation that is responsible for the quality of the Resources provided and monitors the delivery of the Resource.		

15	Resource Managers	Resource Managers are typically responsible for managing Service level agreements with customers and external Providers.			
16	Other				

### Resource Access Type

No.	Access Type	Description	Changes v1.13 to v3.00	Changes v1.30 to v3.00	Changes v2.00 to v3.00
1	Physical	Resources require a physical presence of the user. The user can only access the RI if he is physically present in the specific location that the RI is offered.	New	New	
2	Remote	Resources are delivered remotely with the use of a physical infrastructure. The user is able to remotely work with the physical RI without the need of physical presence.			
3	Virtual	The Resource is delivered through a virtual infrastructure that the use may access virtually through the web or an intranet.			
4	Mail-in	Samples are sent in to for e.g. analysis and the results are returned to the user without the user actually accessing the RI			
5	Other				

### Resource Access Mode

No.	Access Mode	Description	Changes v1.13 to v3.00	Changes v1.30 to v3.00	Changes v2.00 to v3.00
1	Free	Users can freely access the Resource provided, registration may be needed.	New	New	
2	Free conditionally	Users are granted access based on defined policies; such policies usually apply to Resources being offered with “sponsored use” to meet some national or EU level objective; for instance, a country may offer Resources with “sponsored use” to support national researchers involved in international collaborations.			

3	Peer-reviewed	Users are selected based on scientific excellence evaluation, originality, quality and technical and ethical feasibility of an application evaluated through peer review conducted by internal or external experts of the activity to be supported by the Resource			
4	Paid	Users need to pay a fee to access the Resource			
5	Other				

### Resource Geographical Availability

Values for this Attribute are all countries in the [ERV: EOSC Resource Profile#Resource Geographic Location](#) and the following area aggregates.

No.	Country	Definition	Changes v1.13 to v3.00	Changes v1.30 to v3.00	Changes v2.00 to v3.00

### Resource TRL

According to [Horizon 2020](#)

No.	Technology Readiness Level	Description	Changes v1.13 to v3.00	Changes v1.30 to v3.00	Changes v2.00 to v3.00
1	TRL1	Basic principles observed			

2	TRL2	Technology concept formulated	Use of EU definitions	Use of EU definitions
3	TRL3	Experimental proof of concept		
4	TRL4	Technology validated in lab		
5	TRL5	Technology validated in relevant environment (industrially relevant environment in the case of key enabling technologies)		
6	TRL6	Technology demonstrated in relevant environment (industrially relevant environment in the case of key enabling technologies)		
7	TRL7	System prototype demonstration in operational environment		
8	TRL8	System complete and qualified		
9	TRL9	Actual system proven in operational environment (competitive manufacturing in the case of key enabling technologies; or in space)		

#### Resource Life Cycle Status

No.	Life Cycle Status	Description	Changes v1.13 to v3.00	Changes v1.30 to v3.00	Changes v2.00 to v3.00
1	Concept	Concept development	Updates in Description	New	Updates in Description
2	Discovery	Researching users needs, exploring technological or policy constraints			
3	Design	Resource in design			
4	Preparation	Resource in preparatory phase			
5	Planned	Resource plan defined			
6	Alpha	Resource prototype available for closed set of users			
7	Beta	Resource being developed while available for testing publicly			
8	Implementation	Resource in deployment			

9	Production	Resource available in the live environment			
10	Operation	Resource offered			
11	In containment	Resource active, but generally not available to new users			
12	Retirement	Resource is not anymore offered			
13	Termination	Resource dissolution, dismantling			
14	Other				

### Resource Funding Body

No.	Funding Body	Changes v1.13 to v3.00	Changes v1.30 to v3.00	Changes v2.00 to v3.00
1	Academy of Finland (AKA) - Finland	New	New	
2	Agency for Environment and Energy Management (ADEME) - France			
3	Agency for Innovation by Science and Technology (IWT) - Belgium			
4	Agency for Science, Innovation and Technology (MITA) - Lithuania			
5	Alfred Wegener Institute for Polar and Marine Research (AWI) - Germany			
6	Alternative Energies and Atomic Energy Commission (CEA) - France
