

Workshop on Open-Source Software Lifecycles

lundi 27 juillet 2020

Software Pitches: Pitches and Discussion - <https://fau.zoom.us/j/92142605646> (09:50 - 11:00)

| time | [id] title | presenter |
|-------|--|---------------------|
| 09:50 | [31] Web application prototypes for CTA | SERVILLAT, Mathieu |
| 09:55 | [27] Web-based data visualization for the Radio Neutrino Observatory in Greenland | WELLING, Christoph |
| 10:00 | [4] OrcaNet: A training organizer for Deep Learning | RECK, Stefan |
| 10:05 | [3] agnpy: numerical modelling of AGN spectra in python | NIGRO, Cosimo |
| 10:10 | [2] The joint-crab project: Towards open and reproducible multi-instrument analysis in gamma-ray astronomy | NIGRO, Cosimo |
| 10:15 | [1] gLike: likelihood maximization and profiling for astrophysical (and beyond) applications | NIGRO, Cosimo |
| 10:20 | [41] AstroAnt: astronomical analyses of ANTARES neutrino telescope data in python | BISSINGER, Matthias |
| 10:25 | [34] Software from the ESCAPE Test Science Project: Dark Matter | DOGLIONI, Caterina |
| 10:30 | [35] Discussion | |
