

UV Completion of Composite Higgs Model

Plan

- Motivations
- Les Modèles Higgs Composite
- 1ère approche
- 2ème approche

Motivations

Motivations

- Le Modèle Standard , un **succès** théorique et expérimental
(confirmation avec la découverte du Higgs)

Motivations

- Le Modèle Standard , un **succès** théorique et expérimental
(confirmation avec la découverte du Higgs)
- Mais reste **incomplet**
 - Absence d'une théorie de la Gravitation
 - Matière Noire
 - Masse des neutrinos
 - Secteur de Higgs

Motivations

- Le Modèle Standard , un **succès** théorique et expérimental
(confirmation avec la découverte du Higgs)

- Mais reste **incomplet**

Absence d'une théorie de la
Gravitation

Matière Noire

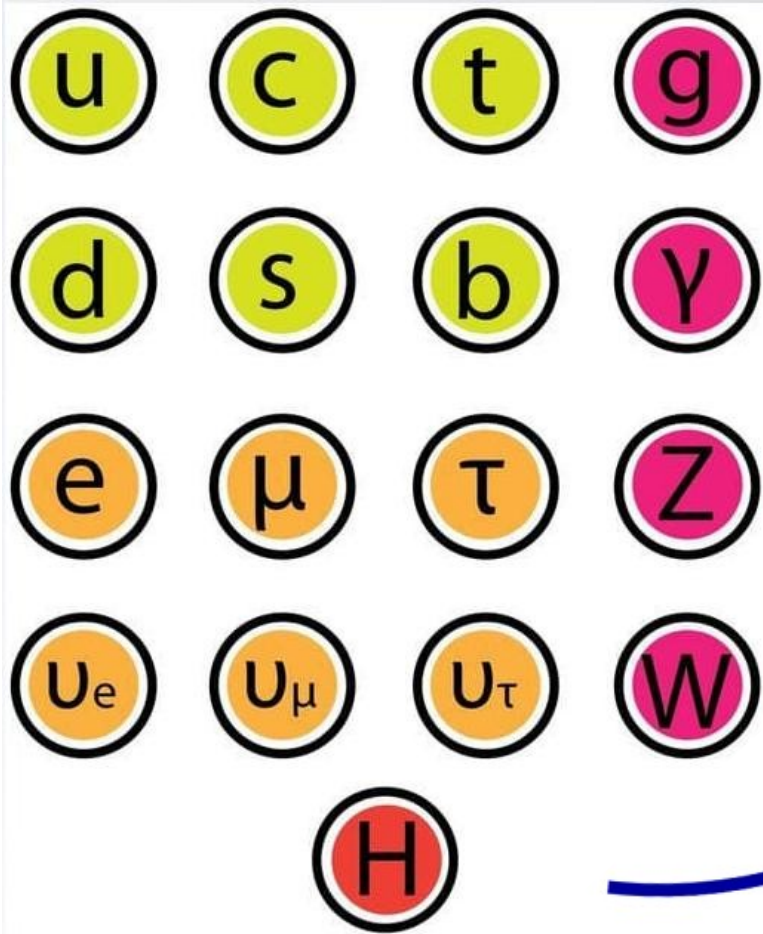

Masse des neutrinos

Secteur de Higgs

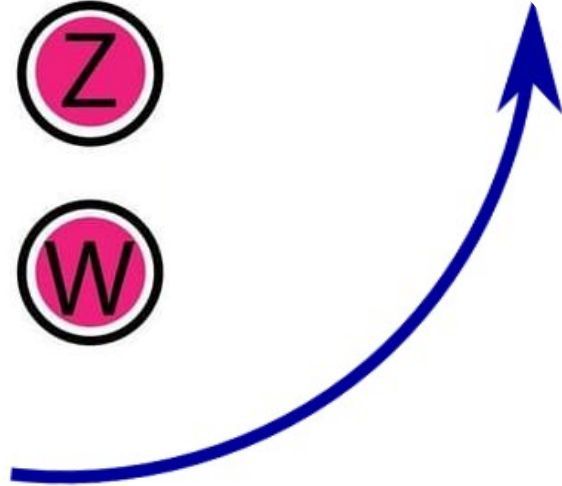

Les Particules du MS

Les Particules du MS

$$m_H = 125 \text{ GeV}$$

Les Particules du MS

$$m_H = 125 \text{ GeV}$$

$$\delta m_H \sim \Lambda^2$$

Les Particules du MS

$$m_H = 125 \text{ GeV}$$

$$\delta m_H \sim \Lambda^2$$

$$\Lambda_{Planck} \sim 10^{19} \text{ GeV}$$

Higgs Composite

Higgs Composite

► **Secteur de Higgs** \Rightarrow Nouveaux Fermions/groupe de jauge

HyperColor (HC) \sim QCD : **TechniFermions**

Higgs Composite

- **Secteur de Higgs** \Rightarrow Nouveaux Fermions/groupe de jauge

HyperColor (HC) \sim QCD : **TechniFermions**

Higgs Composite

- **Secteur de Higgs** \Rightarrow Nouveaux Fermions/groupe de jauge

HyperColor (HC) \sim QCD : **TechniFermions**

- **Symétries Globales** sont **dynamiquement brisées**

Pions (higgs, candidat matière noire...)

Higgs Composite

- ▶ **Secteur de Higgs** \Rightarrow Nouveaux Fermions/groupe de jauge

HyperColor (HC) \sim QCD : **TechniFermions**

- ▶ **Symétries Globales** sont **dynamiquement brisées**

Pions (higgs, candidat matière noire...)

- ▶ Évite le problème de la masse

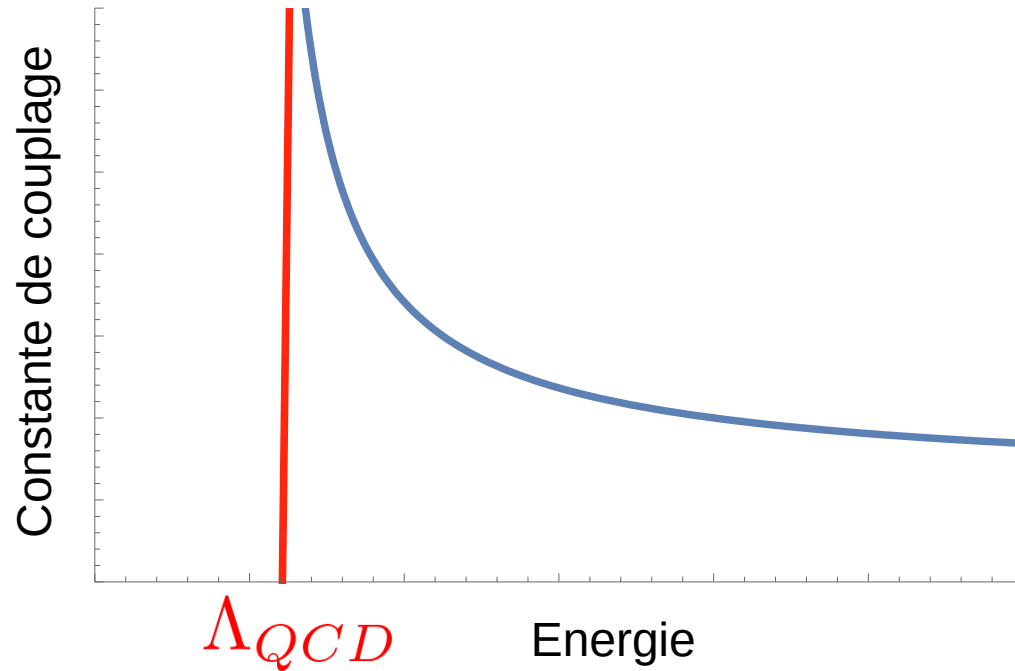

Higgs Composite

- ▶ **Contraintes sur le groupe de jauge HC ?**

- ▶ **Contraintes sur le groupe de symétrie globale G ?
(et le sous groupe conservé H ?)**

Higgs Composite

- ▶ **HC** \sim **QCD** , l'interaction doit former des états liés

Higgs Composite

- ▶ Groupe de Lie : $SU(N)$, $SO(N)$, $Sp(N)$
- ▶ Une (ou +) Représentation
- ▶ Une multiplicité N_f

Higgs Composite

- ▶ Groupe de Lie : $SU(N)$, $SO(N)$, $Sp(N)$
- ▶ Une (ou +) Représentation
- ▶ Une multiplicité N_f

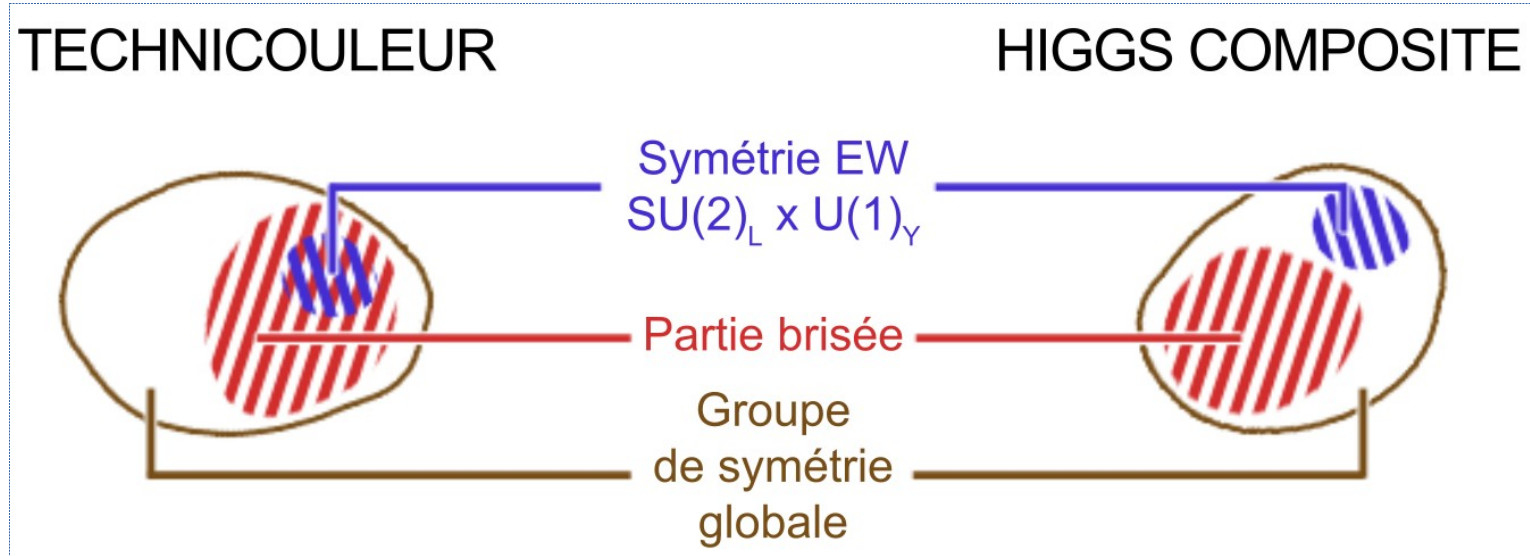

Higgs Composite

TECHNICOULEUR

HIGGS COMPOSITE

Higgs Composite

- ▶ TechniCouleur : L'échelle de confinement est la même que celle de la brisure électrofaible
- ▶ Higgs Composite : Les Pions se transforment sous la symétrie restante
 - ▶ Le Higgs est un Pion

Comment relier ça au reste du Modèle Standard ?

Higgs Composite

Comment relier ça au reste du Modèle Standard ?

- Interaction **effective** à 4 fermions (MS et nouveaux)

Higgs Composite

Comment relier ça au reste du Modèle Standard ?

- Interaction **effective** à 4 fermions (MS et nouveaux)

Higgs Composite

Comment relier ça au reste du Modèle Standard ?

- Interaction **effective** à 4 fermions (MS et nouveaux)

- Permet aux fermions MS de **ressentir la brisure électrofaible** et d'**obtenir une masse**

Higgs Composite

Comment relier ça au reste du Modèle Standard ?

- Interaction **effective** à 4 fermions (MS et nouveaux)

- Permet aux fermions MS de **ressentir la brisure électrofaible** et d'**obtenir une masse**
- Problème avec le couplage ...

Higgs Composite

Si on génère l'interaction à une échelle Λ :

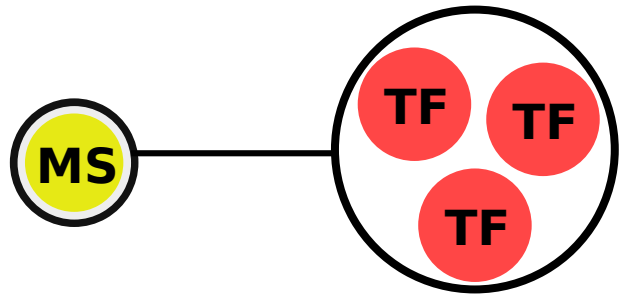

Higgs Composite

Si on génère l'interaction à une échelle Λ :

Higgs Composite

Si on génère l'interaction à une échelle Λ :

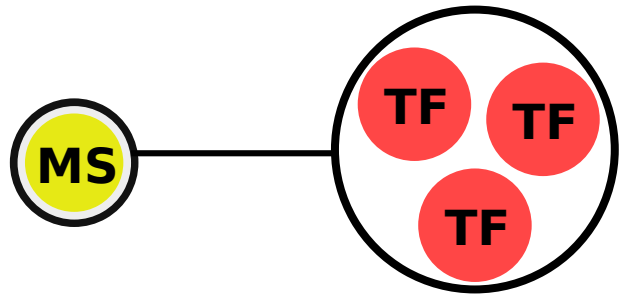

The diagram shows a yellow circle labeled "MS" connected by a horizontal line to a larger circle. Inside the larger circle are three smaller red circles, each labeled "TF".

$$= g \mathcal{O} \quad , \quad g \longrightarrow \frac{g}{\Lambda^2}$$

Higgs Composite

Si on génère l'interaction à une échelle Λ :

$$= g \mathcal{O} \quad , \quad g \longrightarrow \frac{g}{\Lambda^2}$$

On a une suppression trop importante...

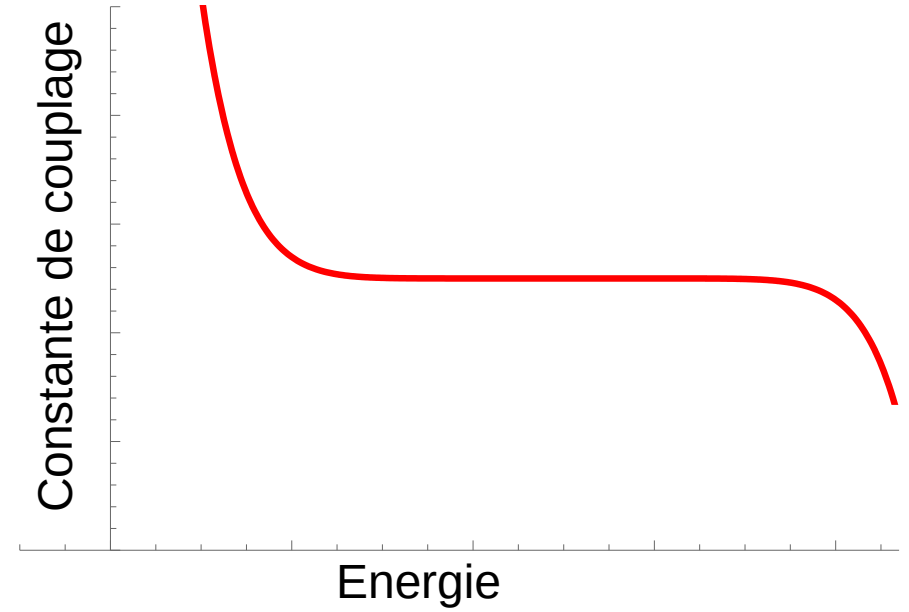

Il faut une théorie presque conforme !

Higgs Composite

- ▶ Théorie presque conforme :

Higgs Composite

► Théorie presque conforme :

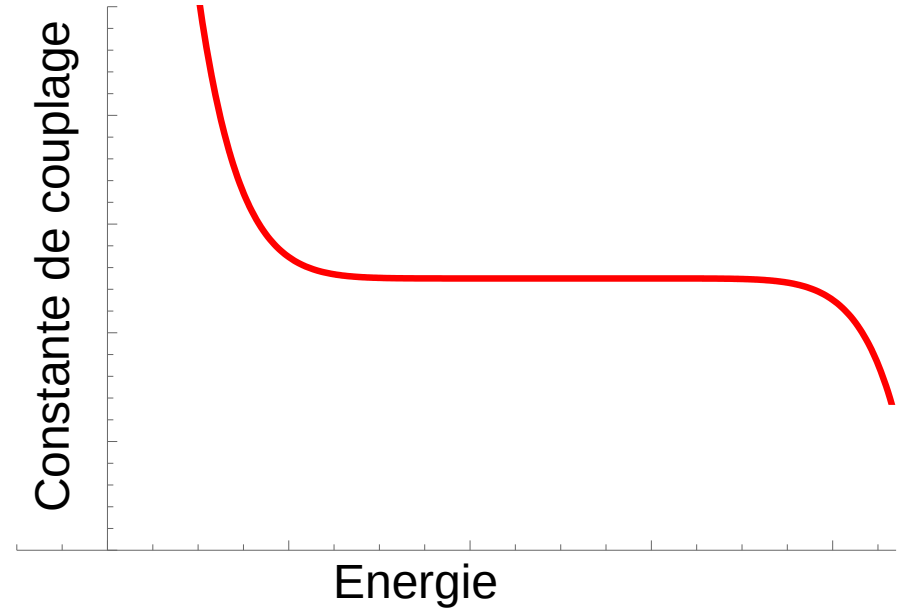

Higgs Composite

► Théorie presque conforme :

► dimension anormale : d

► Impacte l'évolution du couplage $g \longrightarrow \frac{g}{\Lambda^{2-d}}$

► Il faut passer beaucoup de temps dans ce régime

Higgs Composite

- ▶ Plusieurs modèles effectifs développés
- ▶ Prédiction directe (nouvelles particules)
- ▶ Prédiction indirecte (corrections sur des paramètres)

Les Défis

- ▶ Générer les interactions effectives

Les Défis

- Générer les interactions effectives

Les Défis

- Générer les interactions effectives

- S'assurer du « bon » comportement du nouveau secteur de jauge
