

Astroparticle physics: discussion session

Possible topics (non-exhaustive non-ordered list):

- What is ok/not ok with doing theoretical astroparticle physics in France?
- Where are we strong? Where should we improve?
- Theoretical techniques: the role of heavy computation? Critical to your field?
- Formation of students before starting a PhD thesis? Adequate?
- Links with experimentalists/observers or/and experiments/observations?
- Formal/theoretical barriers: the balance between top-down and bottom-up approaches in your fields + evolution?
