

Assemblée Générale du GDR QCD

mardi 9 mars 2021

Doctorants et postdocs (09:00 - 12:00)

time	[id] title	presenter
09:00	[11] A two-loop study into a background gauge invariant Gribov-Zwanziger type action	VAN EGMOND, Duijje
09:15	[22] Jets in hot and dense QCD	VILA, Victor
09:30	[14] Heavy flavor hadrons produced in jets with the ALICE experiment	WU, Yitao
09:45	[15] Dynamically groomed jet radius as a probe of color coherence in heavy-ion collisions	SOTO ONTOSO, Alba
10:00	[34] Gluons exploration using J/Psi photoproduction and development of hybrid gaseous detectors	GLAENZER, Aude
10:15	[37] $\Psi(2S)$: Measuring the excited cousin of J/ Ψ	GARG, Kunal
10:30	Pause café	
10:45	[17] Study of J/Psi in ultra peripheral collision and MFT commissioning	MIGLIORIN, Lucrezia Camilla
11:00	[18] Cold & Dense QCD: RGOPT improvement at next-to-next-to-leading order	FERNANDEZ, Loïc
11:15	[19] Probing the system-size dependence of parton energy loss at RHIC	FRANCISCO, Audrey
11:30	[20] Event activity dependence of quarkonium production and polarization in small collision systems	WATANABE, Kazuhiro
11:45	[21] Study of J/Psi v_2 in pp collisions	PERRIN, Sébastien
