

GDR Deep Underground Physics (DU ϕ /DUPhy)

Kick-off Meeting
31 May – 2nd June 2021

What is the best way to actively work together and include discussions about Underground science, ULs and DULs in this GDR?

- There is no dedicated WP → use WP2 (Low radioactivity techniques) or a more general group WP1-WP2-WP5 for discussions or do we need a new WP?
- We could have dedicated round tables about these subjects:
 - either through (online or not) meetings with a report during next GDR meetings
 - or directly during GDR general meetings
 - other ideas?
- Have at least one “underground science” talk followed by a discussion per GDR meeting?
- How increase our exchanges with Underground science community, Underground Labs, Deep Underground Labs?
