

FCC activities in Clermont:

• Physicists involved

- Pascal Gay has joined the effort.
- A student (Tristan Miralles) in M2 internship.
- A M1 student (Floran Loustau) just started a 2-months internship.

• Activities

- Flavour Physics: search for $B^0 \rightarrow K^{*0} \tau^+ \tau^-$ in view of constraining the vertex deT.
- Currently defining another (connected) study for the M1 student.

• News

- Transmitted MoU and TL appointments for LPC.
- I've been asked to give a seminar in Padova to trigger interest there in HF.

• Work in progress :

- Revisit the study about the search for $b2sll$ transitions.
- Method in place within the new sw FW.
- Next is background production.
