

GONG SHOW

TUESDAY, 26/04 16h30 – 17h30

- 1) **Ivano Basile** (Mons)
Emergent strings with broken supersymmetry
- 2) **Giulia Fardelli** (Uppsala)
Rebooting quarter BPS operators in $N=4$ Super Yang Mills
- 3) **Pietro Ferrero** (Oxford)
Gluon scattering in AdS from CFT
- 4) **Marius Gerbershagen** (Würzburg)
Generalizing holographic entanglement entropy beyond spatial entanglement
- 5) **Sabine Harribey** (Ecole Polytechnique)
Renormalization in tensor field theory
- 6) **Emil Have** (Edinburgh)
Non-relativistic approximations of string theory
- 7) **Cristoforo Iossa** (SISSA)
Black hole perturbations from Liouville correlators
- 8) **Bob Knighton** (ETH Zurich)
Worldsheet magic in AdS_3/CFT_2
- 9) **Francesco Mignosa** (SISSA)
On fixed points and phase transitions in five dimensions
- 10) **Andrew Rolph** (University of Amsterdam)
Quantum bit threads
- 11) **Colin Sterckx** (Université Libre de Bruxelles)
From S-folds to *exactly* marginal deformations without supersymmetry
- 12) **Marija Tomasevic** (Ecole Polytechnique)
Holography of time machines
- 13) **Ioannis Tsiaras** (Saclay)
Universal asymptotic formulae in 2d CFTs
- 14) **Manus Visser** (Geneva)
The entropy of Hawking radiation from the microcanonical action
- 15) **Nam Huy Nguyen** (Durham)
Metastable antibranes
