Discussion points

- Budget at LPSC, transfers to be made for missions / organisation of the next workshop
- Next workshops:
 - Clermont-Ferrand
 - Aim for November 2021, hope to have an in-person meeting
 - Got contacted by the GDR APPEL, to have a small joint brainstorming session to gauge the interest of plasma acceleration technologies (introduction from their side + what could we do with it / wish lists from our side...)
 - Bonn:
 - UFA-DFH has accepted to maintain the funding for a meeting early 2022: date needs to be confirmed by 31/10/2021
 - Possible dates for the Bethe center: anything in the periods 07.02 — 20.02 and 26.02 — 01.04
 - Vetos during that period?

Discussion points

- Smaller / “bottom-up” / topical meetings are also highly encouraged
 - Simply get in touch!
- In the next workshops, we would also like to include a block, either at the very beginning or at the end of the workshop, to have dedicated rooms for selected hands-on / topical informal discussions
- The IRN Terascale is a very good window to showcase the work of young scientists in an informal atmosphere, but senior contributions are also very welcome in the sessions
- Other suggestions to make the most of the IRN?

Last but not least...

A big thank you to Dirk and Gilbert for steering,
along with Tilman, the IRN so smoothly...

We have big shoes to fill!
